

Guiding Principles for the CWG

Inspired by the Requirement of the USG and Net Mundial

- Stability and Security of the Internet
 - All proposals by the CWG must insure the continued stability or security of the Internet.
- Policy Based bottom up system
 - All proposals by the CWG must have at their core a bottom up policy based system to Support and enhance the multi-stakeholder model and meet the needs and expectation of the global customers and partners of the IANA services;
- Transparency
 - The CWG should operate in a transparent manner
 - Transparency requirements should be an integral part of all the recommendations of the CWG.
- Accountability
 - All proposals should include appropriate accountability mechanisms which include regular proactive and independent assessment of the conformity of decisions wrt policies as well corrective mechanisms.
- Evolution
 - Solutions proposed by the CWG should contain clear evolution mechanisms such that solutions can evolve to meet future requirements and challenges.
