IANA NAMING FUNCTION AGREEMENT

This IANA Naming Function Agreement (this “Agreement”) is dated as of [●] 2016 and is entered into by and between Internet Corporation for Assigned Names and Numbers, a California nonprofit public benefit corporation (“ICANN”) and [PTI], a California nonprofit public benefit corporation (the “Contractor”) and is effective as of the last date on which all of the conditions set out in Section 1 have been satisfied (the “Effective Date”). ICANN and Contractor may each be referred to individually as a “Party” and collectively as the “Parties.”

WHEREAS, on 14 March 2014, the National Telecommunications and Information Administration (“NTIA”) announced (“March 14 Announcement”) the transition of NTIA’s stewardship role of key Internet domain name functions to the global multi-stakeholder community;

WHEREAS, [●];

WHEREAS, ICANN and Contractor desire to enter into this Agreement pursuant to which Contractor will perform serve as the IANA functions operator for the naming function in order to ensure the continuity of root operations after the Transition.1

NOW, THEREFORE, for good and valuable consideration, the sufficiency of which is hereby acknowledged, the Parties agree as follows:

ARTICLE I: CONDITIONS PRECEDENT

Section 1.1 Condition Precedent

This Agreement shall be effective as of the last date on which the following conditions have been satisfied: (i) ICANN is released from its obligations [to coordinate root zone management as currently performed by the National Telecommunications and Information Administration, United States Department of Commerce (“DOC”), as may be added to or modified by the DOC and ICANN, pursuant to its contract with the DOC, effective as of 01 October 2012 (including any extension thereof)]2 (the “IANA Naming Function”) and (ii) ICANN has accepted the responsibility to perform the IANA Naming Function.3

1 Note to ICANN – See Paragraph 97 of the CWG Proposal.
2 Note to CWG – Discuss proper scope.
3 Note to CWG – Discuss proper scope.
4 Note to ICANN – Consider adding a second step between clauses (i) and (ii) above to make it clear that stewardship has transferred from DOC to the multi-stakeholder community. Otherwise, the plain language is somewhat confusing because ICANN is released from the IANA Naming Function responsibilities in clause (i), and then accepts that responsibility in clause (ii).
ARTICLE II: REPRESENTATIONS AND WARRANTIES

Section 2.1 ICANN’s Warranties. ICANN represents and warrants that (i) it has all necessary rights and powers to enter into and perform its obligations under this Agreement, and (ii) the execution, delivery and performance of this Agreement by ICANN has been duly authorized by all necessary corporate action.

Section 2.2 Contractor Warranties. Contractor represents and warrants that (i) it has all necessary rights and powers to enter into and perform its obligations under this Agreement; and (ii) the execution, delivery and performance of this Agreement by Contractor has been duly authorized by all necessary corporate action.

Section 3.2 Performance of IANA Functions

Section 3.3 Separation of Policy Development and Operational Roles

Section 3.4 Transparency and Accountability

Note to ICANN – Adding a heading to make clear that ICANN has obtained all other third party approvals, and consents to enter into this Agreement, and that entering into this Agreement will not trigger a breach or acceleration of rights in favor of a third party. Basically a “Consents” and “No Breach” clause.

Note to ICANN – Per Paragraph 97 of the CWG Proposal, ICANN shall grant PTI the rights and obligations to serve as the IANA Functions Operator (IFO) for the IANA Naming Functions. There should be sections added at the beginning of Article III with a clear appointment of PTI and grant of rights from ICANN. There should also be a description of the services to be provided by PTI and a reference to the SOW.
