

**Answers to the Top 10 Questions About the Proposed Next-Generation
Registration Directory Services to Replace WHOIS
17 September 2014 – 13:00-14:30 UTC
Chat Transcript**

Charla Shambley:Welcome to the EWG Webinar -- Answers to the Top 10 Questions About the Proposed Next-Generation Registration Directory Services to Replace WHOIS

Charla Shambley>Please note that chat sessions are being archived and follow the ICANN Expected Standards of Behavior: <https://www.icann.org/resources/pages/expected-standards-2012-05-15-en>

Charla Shambley:Thank you for joining this webinar - please remember to join the bridge if you wish to voice comments and/or questions. Dial-in numbers can be found here: <http://adigo.com/icann/> ...
Password: 48291

Carlton Samuels:Morning all

Michele Neylon:we will be starting shortly

Hayley Laframboise:This session is now being recorded

Charla Shambley:Your lines have been unmuted at this time if you have a question for the EWG members

Joly MacFie:Apologies for arriving late. Who will the validators be?

Luc Seufer:Where and how would the RDS be hosted? (sorry if missed the answer, I joined late)

Joly MacFie:Would/could there be a mechanism that registrants could be reliably contacted without necessarily revealing their data?

Joly MacFie:(by the genral public).

Julie Ruff:Who is going to validate the accreditators and who is going to accredit the validators?

Olivier Crepin-Leblond:translation, transliteration and also what language does the front end of the RDS have? What portion of the RDS system is multilingual?

Olivier Crepin-Leblond:Who will "own" the data?

Olivier Crepin-Leblond:because as you know, every bit of data has its own worth

Michele Neylon:yup

Joly MacFie:There was the bit about no bulk usage in the spec

Joly MacFie:Data is not by nature copyrightable.

Olivier Crepin-Leblond:but by nature, it can be sold

Charla Shambley:Thank you for joining today's Webinar.

Michele Neylon:ciao

Dev Anand Teelucksingh:Thanks, look forward to viewing the entire webinar

Carlton Samuels:@OCL: Indeed it can be.
