

Parameters and Questions to Map and Compare Effectiveness of Accountability

Comparison Parameter	Corresponding Questions	Option A
Legitimacy	Is one of the options more legitimate in its nature due to higher scope for transparency, inclusivity and rationality?	
Legality	Is legality of one of the options more apparent and/or easy to establish?	
Feasibility (Practical)	Is implementation of one of the options more practically feasible due to exclusivity of system, simplicity of design and legality of process?	
Viability (Financial)	Is one of the options more viable due to the simplicity of operation, including of level of attention and resource required from the community to make the mechanism work?	
Acceptability (Recognition)	Is one of the options more supported and recognized due to historic reasons or current legal and stability concerns?	
Rationality	Is explaining one of the options, internally and externally more easy due to its rationality and simplicity of design?	
Utility	Does one of the options provide improved review and redress?	
Inclusivity	Does one of the options provide better consultation and extend accountability to more relevant stakeholders?	
Indispensability	Is one of the options indispensable due to some legal and strategic reasons?	
Tenacity	Is one of the options more tenacious due to higher potential of ensuring check and balance and predictability on one hand, and of mitigating capture and immunities on other?
