

Dear all,

To ensure full transparency around the polling, the staff have reviewed the recording for the call and crosschecked the results. The Adobe Connect recording is available here for your viewing as well: <https://icann.adobeconnect.com/p2ner13u4kd/>.

Please note that the instructions regarding participation in the polls were as follows:

- Anyone on the call was invited to participate in the poll (members & participants).
- To participate, participants in the Adobe Connect room used either a red or green tick to respond to the poll question.
- Those on audio-only could express their position over the phone.
- After the polls, analysis would be conducted to assess participation from CCWG members (for the purposes of these results, the members' names are in bold font).

The Chairs conducted four polls in a group that varied between 85-90 participants. The text used as the basis for the polls is Paragraph 72 of the CCWG report (see attached slide for the text as well as the 2nd bullet highlighted in red). The first two poll questions were based on objections and the second two poll questions were based on expressions of support.

Summary of results:

- 11 objections to removing the 2nd bullet in Paragraph 72 (in red on the slide)
 - (2 CCWG member objections)
- 27 objections to sending the report forward as it is currently, with the full text in Paragraph 72
 - (8 CCWG member objections, including all ALAC members)
- 36 support removing the language in the 2nd bullet in Paragraph 72 (in red on the slide)
 - (10 CCWG members supporting)
- 14 support sending the report forward as it is currently, with the full text in Paragraph 72
 - (2 CCWG members supporting)
