

Maryam Bakoshi: Dear All, welcome to the NCSG Pre-ICANN62 Webinar

Farell FOLLY: THx

Farell FOLLY: hello Maryam

Maryam Bakoshi: Welcome!

Joan Kerr: Hello everyone

Joan Kerr: Maryam, no audio

Rafik: hi

Akinremi Peter Taiwo: Hi all

Joan Kerr: I can hear you

Joan Kerr: Could you hear me

Maryam Bakoshi 2: Please try speaking again

Joan Kerr: I tried

Collin Kurre 2: hi everyone! on app with dial in, clunky interface but I'll do my best :)

Maryam Bakoshi 2: Did you dial in?

Farell FOLLY: maybe maryam should unmute you first Joan

Collin Kurre 2: sorry, dial out\*

Joan Kerr: Thanks Farell. I dialed in

Rafik: GNSO is our home :)

Shah Zahidur Rahman: Hi all

Louise Marie Hurel: hi all

Louise Marie Hurel: apologies for the delay

Stephanie Perrin: can we get scroll control please, need to catch up on what I missed on the call so far

Rafik: thanks Farzaneh for giving the context :)

Rafik: other PDP is subsequent procedures for new gTLD program as the WG will publish its initial report after panama meeting

Rafik: and there is the Rights Protection Mechanism

Poncelet Ileleji: RPM good and also GNSO-newgTLD-WG

Stephanie Perrin: we need to caucus as an NCSG group as to how we feel about the other PDPs affected by GDPR compliance and WHOIS lack of policy. This includes Thick transition, PPSAI IRT, and "picket fence" items in the contracted parties contracts, notably the 2013 RAA

James Njoege Gitau: Sorry everyone today I am in late and I am still struggling with technology.

Poncelet Ileleji: That's right @Stephanie, it will be good you take the lead with Rafik on this NCSG Caucus

Stephanie Perrin: The RDS group is on hold for the moment, but it is unrealistic in my view to try to pour all these issues into EPDPs and expect a good outcome. History does not show us winning with that kind of approach.

Rafik: @stephanie it is not the goal to have everything in EPDP, that is why I am bagging you guys in Pc about working on scope first :)

Rafik: thanks Poncelet that is the idea is to organize ourselves as group between those who will appoint and those following and monitoring the discussions as observers to build group positions

Poncelet Ileleji: @Rafik, the Scoping I agree +1

Stephanie Perrin: I know it is not our goal Fik, but I do believe it is a BC goal.

Stephanie Perrin: I don't think there is consensus on the Council yet, do you?

Rafik: @stephanie that is we have to be vocal and do our homework

Rafik: I know Susan was pushing on last call

Stephanie Perrin: Precisely what I am proposing.

Rafik: but they may be surprised

Poncelet Ileleji: We should push for it @Stephanie and Rafik

Stephanie Perrin: If folks are looking for how to be engaged on privacy, I would urge them to take a look at the privacy proxy records. We are heading to a very unfortunate outcome on

the IRT in my view, it may be that privacy proxy services are going to be priced out of existence. This has serious implications for registrants in non GDPR countries.

Stephanie Perrin: The cost model that ICANN is imposing on registrars and privacy proxy services providers appears to be too high.

Poncelet Ileleji: Invariable non GDPR countries are going to be indirectly affected by it, So its worth engaging

Akinremi Peter Taiwo: @Stephanie. Could you throw more light on the privacy proxy services with links.

Stephanie Perrin: Here is the page on the now complete PDP  
<https://gnso.icann.org/en/group-activities/active/ppsai>

Akinremi Peter Taiwo: Thanks

Stephanie Perrin: the i at the end of that link may need to be deleted....

Stephanie Perrin: I will dig up the IRT link, stay tuned

Rafik: you can also ask us at Panama meeting, happy to answer

Su Sonia Herring: the link works even with the i at the end, thank you for sharing stephanie

Stephanie Perrin: Here is a list on GNSO ongoing projects....note the grey ones at the bottom, all IRTs, several of which are directly impacted by policy changes rolling out of the GDPR. you will see a link to the PPSAI IRT there....<https://gnso.icann.org/sites/default/files/file/field-file-attach/projects-list-19apr18-en.pdf>

Su Sonia Herring: is this privacy proxy services wg still active?

Rafik: @Su it is implemenation phase with IRT

Rafik: the WG delivered its recommendations and passed it to IRT

Su Sonia Herring: okay thank you rafik :)

Rafik: Stephanie was talking about IRT where in many times there is risk of implementation diverge from recommendations or adding things never agrred

Rafik: sorry I have to listen to other call, but happ to answer questions in chat

Renata Aquino Ribeiro: finally managed to get here

Renata Aquino Ribeiro: adobe really playin tricks today

Benjamin Akinmoyeje: Great job

Joan Kerr: Great session

Joan Kerr: Thanks for this

Renata Aquino Ribeiro: thanks Farzaneh

Su Sonia Herring: thank you everyone for setting this webinar it was helpful

Poncelet Ileleji: Thanks Farzi and Buy to All,

Maryam Bakoshi 2: Thank you everyone for attending the call. Good bye
