Kathy: Note Global Public Interest in Work Track 2

Nadira Alaraj: OMG....to much details

Stephanie Perrin: Is that where the definition of public interest has now landed?

Rafik: @Farzaneh I think canases of string like .book managed by a sole registry and not open to others

Farzaneh Badii: we probably have to give Avri 90 minutes to explain this

Farzaneh Badii: but this is a very important issue and has global implications

Stephanie Perrin: I have lost track on that one, am on the mailing list but have heard nothing in recent months (global PI)

Bruna Santos: this questionnaire was huge and a great start to understanding the topics

Farzaneh Badii: do you have the link handy Bruna?

Rafik: the new gTLD program was enough complicated and detailed, the applicant guidebook around 400 pages

Farzaneh Badii: I read parts of that. made me dizzy
