

Agenda for F2F Meeting (18-20 January)

Expectations approved by the group:

1. Finalize agreement on scope of the group & definition, such as the purpose of accountability (as discussed, a strawman proposal is being drafted and will be circulated shortly)
2. Agree on WS1 vs WS2 classification criteria + priorities. This should enable to provide clarity about expected outcome of WS1
3. Conclude inventory work from work areas, and as such, the assessment of ICANN's current situation with regards to accountability (please note this should include a list of the main contingencies we would "stress test" our proposals against).
