Stress Test 18 was among the plausible scenarios that could test how and whether the ICANN community could challenge actions taken by the ICANN corporation. The rationale to develop this stress test involves two factors:

First, ICANN community members were aware that some GAC members had expressed a desire to change the GAC’s historical method of using consensus for its decision-making, where “consensus is understood to mean the practice of adopting decisions by general agreement in the absence of any formal objection”. Moreover, it would take only a simple majority of GAC members to change its decision-making methods to a lesser standard, such as majority voting.

Second, the CCWG realized that ICANN’s present bylaws obligate the board to seek “a mutually acceptable solution” if it decided not to follow GAC advice. That level of required deference is unique to the GAC and not required for advice from other AC and SOs. More important, the board’s obligation to seek a mutually acceptable solution applies to all GAC advice, even if that advice were not supported by GAC consensus, and even if a significant minority of GAC members opposed that advice.

For these reasons, CCWG added Stress Test 18 to the draft proposal, and the stress test working party concluded that existing accountability measures were not adequate to let the community hold the ICANN board accountable for its actions if the board were obliged to seek a negotiated solution with the GAC.

<tbody>
<tr>
<td>Consequence(s): Under current Bylaws, ICANN must seek a mutually acceptable solution if it rejects GAC advice, even if governments were divided in their support for the GAC advice.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>EXISTING ACCOUNTABILITY MEASURES</th>
<th>PROPOSED ACCOUNTABILITY MEASURES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current ICANN Bylaws (Article XI) require ICANN to try to find a mutually acceptable solution for GAC advice. This is required for any GAC advice, not just for GAC consensus advice. Today, GAC adopts formal advice according to its Operating Principle 47: “consensus is understood to mean the practice of adopting decisions by general agreement in the absence of any formal objection.” But the GAC may at any time change its procedures to use majority voting instead of its present consensus.</td>
<td>One proposed measure would amend ICANN Bylaws (Article XI, Section 2, item 1j) to require trying to find a mutually acceptable solution where GAC advice was supported by GAC consensus. The GAC could change its Operating Principle 47 to use majority voting for GAC advice, but ICANN bylaws would require trying to find a mutually acceptable solution only on advice that had GAC consensus. GAC can still give ICANN advice at any time, with or without consensus.</td>
</tr>

</table>

| CONCLUSIONS: Existing measures are inadequate. | Proposed measures are adequate. |
In order to address Stress Test 18, CCWG proposed an amendment to ICANN bylaws regarding the board’s obligations with respect to GAC advice. The amendment would preserve the requirement for ICANN’s board to seek a mutually acceptable solution, but only for GAC advice that was supported by consensus among GAC members.

The rationale for proposing this bylaws change in response to Stress Test 18 is two-fold:

First, CCWG wants to reserve the ICANN’s board’s obligation to negotiate with the GAC for only that advice which is supported by a consensus of governments. GAC advice that is opposed by a significant minority of governments should not trigger the board’s obligation to enter bi-lateral negotiations with the GAC on a matter that affects the global Internet community. A negotiation between ICANN board and GAC should be reserved for resolving differences between ICANN and governments – not to resolve differences among governments themselves.

Second, the proposed bylaws change would provide a strong incentive for the GAC to continue seeking consensus for the advice it provides to ICANN, which is the practice presently used by the GAC. While the GAC could at any time change its decision-making methods, this bylaws change would continue to elevate the influence of GAC advice that was supported by consensus of GAC members. Similar incentives for consensus policy and advice are already present in the ICANN bylaws, which require supermajority support for policy recommendations coming from GNSO and ccNSO.

The rationale above is meant to explain why Stress Test 18 was developed, and to explain why CCWG proposes a bylaws amendment to preserve ICANN board’s obligation to seek a mutually acceptable solution when GAC advice is supported by consensus.

**Description of the proposed change to ICANN bylaws:**

The proposal is to amend ICANN Bylaws, Article XI Section 2 clause j as seen below. (Addition is bold and underlined) Clause k is also shown for completeness but is not being amended.

j: The advice of the Governmental Advisory Committee on public policy matters shall be duly taken into account, both in the formulation and adoption of policies. In the event that the ICANN Board determines to take an action that is not consistent with the Governmental Advisory Committee advice, it shall so inform the Committee and state the reasons why it decided not to follow that advice. **With respect to Governmental Advisory Committee advice that is supported by consensus, the Governmental Advisory Committee and the ICANN Board will then try, in good faith and in a timely and efficient manner, to find a mutually acceptable solution.**

k: If no such solution can be found, the ICANN Board will state in its final decision the reasons why the Governmental Advisory Committee advice was not followed, and such statement will be without prejudice to the rights or obligations of Governmental Advisory Committee members with regard to public policy issues falling within their responsibilities.

Note that the proposed Bylaws change for Stress Test 18 does not interfere with the GAC’s method of decision-making. If the GAC decided to adopt advice by majority voting or methods other than today’s consensus process, ICANN would still be obligated to give GAC advice due consideration: “advice shall be duly taken into account, both in the formulation and adoption of policies.”
Moreover, ICANN would still have to explain why GAC advice was not followed: “In the event that the ICANN Board determines to take an action that is not consistent with the Governmental Advisory Committee advice, it shall so inform the Committee and state the reasons why it decided not to follow that advice.”

The only effect of this Bylaws change is to limit the kind of advice where ICANN is obligated to “try, in good faith and in a timely and efficient manner, to find a mutually acceptable solution”. That delicate and sometimes difficult consultation requirement would only apply for GAC advice that was approved by consensus, in order to avoid forcing the board to arbitrate between sovereign governments with divergent views.

The GAC currently uses the following consensus rule for its decisions: “consensus is understood to mean the practice of adopting decisions by general agreement in the absence of any formal objection.” The proposed bylaws change above recognizes that GAC may, at its discretion, amend its Operating Principle 47 regarding “Provision of Advice to the ICANN Board.”

NTIA has advised that the bylaws amendment arising from Stress Test 18 is an essential element of the community’s proposal.

It is noted that GAC Representatives are continuing to discuss the proposal.
