Registry Registration Data Directory Services
Consistent Labeling and Display Policy

The key words "MUST", "MUST NOT", "REQUIRED", "shall", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", and "MAY" in this document are to be interpreted as described in RFC 2119, which is available at http://www.ietf.org/rfc/rfc2119.txt.

Registry Operators SHALL implement these requirements in conjunction with Section 1 of Specification 4 of the "Base Registry Agreement approved on 9 January 2014" ("Base Registry Agreement") in order to comply with WHOIS (available via port 43) and web-based directory services requirements.

1. In responses to domain name object queries the below fields MUST be included either (1) immediately after the "Registrar IANA ID" field or (2) immediately before the last field ("URL of the ICANN Whois Inaccuracy Complaint Form: https://www.icann.org/wicf/") in the following order:
   - Registrar Abuse Contact Email
   - Registrar Abuse Contact Phone

2. In responses to domain name object queries the following fields are considered optional and should be treated as described in clarification 1 of the "Advisory: Clarifications to the Registry Agreement, and the 2013 Registrar Accreditation Agreement (RAA) regarding applicable Registration Data Directory Service (Whois) Specifications" ("WHOIS Advisory"):
   - Registrar Registration Expiration Date
   - Reseller

3. If shown, the "Reseller" field MUST appear immediately before the "Domain Status" field.

4. If shown, the value of the "Reseller" field MUST be the name of the organization, in case the Reseller for the name is a legal entity, or a natural person name otherwise.

5. If shown, the "Registrar Registration Expiration Date" field MUST appear immediately after the "Registry Expiry Date" field.

6. The value section (i.e., right-hand side of the colon) of the following fields MUST follow the below format specifications:
   a) "Registrar Abuse Contact Email" (as defined in the EPP RFCs for email fields)
   b) "Registrar Abuse Contact Phone" (as defined in the EPP RFCs for phone fields)
   c) "Reseller" is defined as token (see Extensible Markup Language 1.1)
   d) "Registrar Registration Expiration Date" (as defined in the EPP RFCs for date fields)
7. Registry Operator MUST update the name of keys in the output of the domain name, name server, and registrar objects as follows. The following table shows keys that are renamed from its original version in Specification 4 of the Base Registry Agreement. All other specifications in the Whois Advisory (e.g. format specifications of the value section) remain unchanged.

<table>
<thead>
<tr>
<th>Original key in Specification 4 of the Registry Agreement</th>
<th>New key name</th>
<th>Object query where the key appears</th>
</tr>
</thead>
<tbody>
<tr>
<td>Domain ID</td>
<td>Registry Domain ID</td>
<td>domain name</td>
</tr>
<tr>
<td>WHOIS Server</td>
<td>Registrar WHOIS Server</td>
<td>domain name, registrar, name server</td>
</tr>
<tr>
<td>Referral URL</td>
<td>Registrar URL</td>
<td>domain name, registrar, name server</td>
</tr>
<tr>
<td>Sponsoring Registrar</td>
<td>Registrar</td>
<td>domain name</td>
</tr>
<tr>
<td>Sponsoring Registrar IANA ID</td>
<td>Registrar IANA ID</td>
<td>domain name</td>
</tr>
<tr>
<td>Registrar Name</td>
<td>Registrar</td>
<td>registrar</td>
</tr>
<tr>
<td>Registrant ID</td>
<td>Registry Registrant ID</td>
<td>domain name</td>
</tr>
<tr>
<td>Admin ID</td>
<td>Registry Admin ID</td>
<td>domain name</td>
</tr>
<tr>
<td>Tech ID</td>
<td>Registry Tech ID</td>
<td>domain name</td>
</tr>
</tbody>
</table>

8. If the "Billing Contact" is shown, Registry Operator MUST update the name of keys in the output of the domain name as defined as follows. The following table shows keys that are renamed from its original version in the Whois Advisory. All other specifications in the WHOIS Advisory (e.g. format specifications of the value section) continue to apply.

<table>
<thead>
<tr>
<th>Original key in the WHOIS Advisory</th>
<th>New key name</th>
<th>Object query where the key appears</th>
</tr>
</thead>
<tbody>
<tr>
<td>Billing ID</td>
<td>Registry Billing ID</td>
<td>domain name</td>
</tr>
</tbody>
</table>

9. In responses to domain name object queries the following field MUST be included before the footer ">>> Last update of Whois database: <date and time> <<<<".

- URL of the ICANN Whois Inaccuracy Complaint Form: https://www.icann.org/wicf/

10. A Registry Operator that is permitted to provide redacted RDDS output in its registry agreement MAY treat the following fields as optional regardless of the existence of data in the Registry's Shared Registration System (SRS) as described in clarification 1 of the Whois Advisory. The redacted RDDS output MUST be consistent with the relevant RDDS provisions in the Registry Operator's registry agreement.
Proposed Policy Language for review by the Thick Whois Implementation Review Team
Date: 29 June 2016

- Registry Registrant/Admin/Tech ID
- Registrant/Admin/Tech Name
- Registrant/Admin/Tech Organization
- Registrant/Admin/Tech Street
- Registrant/Admin/Tech City
- Registrant/Admin/Tech State/Province
- Registrant/Admin/Tech Postal Code
- Registrant/Admin/Tech Country
- Registrant/Admin/Tech Phone
- Registrant/Admin/Tech Phone Ext
- Registrant/Admin/Tech Fax
- Registrant/Admin/Tech Fax Ext
- Registrant/Admin/Tech Email

11. The field "Registry Admin/Tech/Billing/Registrant ID:" refers to the Repository Object Identifier (ROID) for the Contact object as specified in RFC 5733 (called Admin/Tech/Registrant ID in Specification 4 of the Registry Agreement).

12. The implementation of an RDAP service in accordance with the "RDAP Operational Profile for gTLD Registries and Registrars" is required for all gTLD registries in order to achieve consistent labeling and display.

13. Registry Operator MAY output additional RDDS fields, as defined in the WHOIS Advisory, without further approval by ICANN. The key and the value of each additional field MUST NOT: include browser executable code (e.g., Javascript); provide confidential information of any sort; or cause a negative impact to the security, stability, or resiliency of the Internet’s DNS or other systems. Prior to deployment, Registry Operator SHALL provide and update the list of all the additional fields supported to ICANN.

Effective Date: 1 February 2017.

The Registry Operators for the .COM, .NET and .JOBS gTLDs shall be subject to this Policy upon the Policy Effective Date for the transition from thin to thick.
Implementation Notes

1. On 27 April 2015, ICANN published an Advisory in response to questions from both registries and registrars regarding the applicable Registration Data Directory Services (commonly known as WHOIS) specifications. Registry Operators should continue to consult this Advisory to be in compliance with the Registry Agreement.

2. The following section describes example outputs for the query objects:

Domain Name Data:

• **Query format:** whois EXAMPLE.TLD

• **Response format:**

  Domain Name: EXAMPLE.TLD
  Registry Domain ID: D1234567-TLD
  Registrar WHOIS Server: whois.example-registrar.tld

Background:

This Consensus Policy is a product of policy implementation directed by ICANN Board resolutions 2014.02.07.08 - 2014.02.07.09, which adopted the GNSO Council Policy Recommendations for a new Consensus Policy on Thick Whois.

Recommendation #1 of the Thick Whois Policy Development Process (PDP) Working Group (WG), adopted by the GNSO Council on 31 October 2013, states: "The provision of thick Whois services, with a consistent labelling and display as per the model outlined in specification 3 of the 2013 RAA, should become a requirement for all gTLD registries, both existing and future."
The Final Report of the Thick Whois Policy PDP WG further included in its Section 7.2 'Implementation Considerations' guidance related to the timeline and requirements for implementing the transition from thin to thick Whois. It specifically notes that “The WG does emphasize that implementation of one part of the recommendation (for example, transition of existing thin gTLD registries to thick model) should not unnecessarily delay the implementation of another part of the recommendation (for example, the consistent labeling and display of such data)".

As a consequence, ICANN staff and the Implementation Review Team (IRT) agreed that consistent labeling and display could be decoupled from the implementation of the transition from thin to thick.

ICANN submitted a draft proposal for implementation of the consistent labeling and display requirement for Public Comment on 3 December 2015. After considering the community's feedback in collaboration with the Thick Whois IRT, ICANN revised its proposal as reflected in this Consensus Policy.

It should be noted that ICANN’s objective in implementing the GNSO Policy recommendations has been to minimize the impact to contracted parties and to the overall Registration Data Directory Services (RDDS) systems by seeking to synchronize, where appropriate, this implementation with other related initiatives such as the adoption of the Registration Data Access Protocol (RDAP).
