REQUEST DESCRIPTION

1. Activity: Please describe your proposed activity in detail

This is a recurring request and as such it should become part of the ICANN regular budget. For six years the SSAC has produced and provided a workshop on security and stability issues at the IGF. The SSAC has previously asked for funding for an SSAC member to travel to the IGF to support this workshop and each time it has been denied as part of the process for special funding requests. The issues discussed at the workshop are selected from the SSAC priorities from the previous year that have resulted in published documents and would be most applicable to the IGF attendees. These include: dangers to the Internet economy from irresponsibility at scale; best practices for protecting domain names; best practices for DNSSEC deployment; best practices for mitigating DNS attacks; and DNS blocking. This workshop is important for making the wider community aware of SSAC work and key security and stability issues. Thus, for FY16 the SSAC again is requesting that the travel and related expenses for the SSAC member who will produce and present the workshop should be covered by ICANN. Assistance is requested from Finance to identify the budget estimate.
