

NCSG ExCom Call

28 July 2017 | 1600 UTC

Agenda

- * Membership applications
- * Election preparations
- * Temporary alternate councillor appointment
- * Constituency review
- * Member removal procedures
- * AOB

Responses to RFI

Zina Ibrahim -

ICANN's mission is noble in helping to understand about the Internet sector; One of factual reason and also the unified functionalities of the systems that support the Internet.

Having competence on unique identifiers around the world, it is my honor to better understand the best practices and knowledge in order to mingle with the community of Icann.

My coherent interests:

Identifying The Strategic Issues of Internet Governance through Icann and its Affiliates?

Understanding also the problems that affect individuals internet users?

What are the non-commercial issues?

Shavkat Sabirov –

My interests based on non-commercial issues through the local and regional community of the CIS and Central Asia countries. I know the local community very well. I have expertise and experience. There are regional RIPE NCC meeting, ccTLD and IPv6 training, seminars on copyrights law for the domain space and round tables for preventing CSAM in Internet (in collaboration INHOPE) in Central Asia and Kazakhstan.

I've spoke with M. Yakushev about promotion of the gTLDs and special activities for newTLDs in our region. We are going to organize IGF for Central Asia in nearest future. TLDcon (CIS conference) will be in Almaty in two weeks.

NCSG membership will provide me more information and knowledge. And the local community will have one voice at the NCSG as minimum. I think that our region must have the voice at ICANN.

Responses to RFI

Alapini Muriel -

During the session of the Fellows where the NGSC was presented, as a final user, I thought it was within a group that I could talk and work to impact my community. Furthermore as a final internet user and a young Francophone woman, I want to integrate the NGSC into ICANN to:- engaging Francophone users in the work of the community

- serve as a bridge between the NCUC and French-speaking users through the dissemination of useful information

- be an example for young women to become interested and involved in the community

That's why i want to join the NGSC in ICANN

International Centre for Leadership Development Nigeria, ICLDNG–

My name is Felix Iziomoh, Executive Director International Centre for Leadership Development Nigeria, www.icldng.org[\[icldng.org\]](http://www.icldng.org)

I am writing this email in respect of Aishatu Ibrahim our Abuja coordinator, I introduced her to ICANN because she is has a degree in computer science, also presently running her masters in computer science and a member of Nigeria Computer Society and Computer professional Association of Nigeria, this is the reason I introduced her to international computer society and ICANN.

Please kindly accord her the membership, our source funding are facebook, Internet society, International Institute for Global Leadership, Pollination project and some organizations locally.

Oliana Sula -

I lecture full-time at the second main public university in Albania, University "Aleksander Moisiu" Durrës and Estonian Business School Tallinn, I think that they both are classified as non-commercial organizations, I am not sure at the current state how those organizations can join at an organizational basis as Higher Education Institutions although I can represent them of course as at any other event. This is in my understanding of your question. Please let me know what do you need specifically. My interest on NCSG is mainly research based as I teach and research ethical issues dealing with that.

Vrikson Acosta -

I have been involved in ICANN for several years, working in the area of civil society/academics. As a matter of fact, I was awarded a full fellowship to attend the inauguration and first course at the Center for Entrepreneurship & Internet for the Latin America & Caribbean region, CEILAC, in Asunción, Paraguay.

Claire Craig –

Thanks for your note requesting further information to assess my application to join the NCSG. I do hope that although some time has passed since I applied, that the information I am submitting is accepted in support for my application.

First, let me address the reason for my delay in responding. After attending ICANN 58 as a newcomer and fellow in Copenhagen, Denmark, I returned home convinced that the NCSG was the group for which I felt my skills and passion were most suitable, although at the time I was still very hazy about what that contribute could be. Therefore, when I received your note asking me to provide you with information about why I wanted to join the group, I felt that I needed to step back that give it some further thought.

I have recently attended ICANN 59 in Johannesburg again as a fellow, and this time working with my coach, Renata Aquino Ribeiro, who is a member of the NCUC, I was able to attend more targeted sessions and network with other members of the NCUC so I believe that I am now in a better position to identify how my interests may be relevant to this group.

I am interested in topics that relate to Information and Communication Technology for Development (ICTD), more specifically connectivity, infrastructure (Internet Exchange Points) and Internet Governance. I am also currently researching the workings of the multi-stakeholder model, and it forms the theoretical framework for an ICTD research project that I am currently working on for my PhD. I am interested in the application of policies on these issues as they relate to Latin America and the Caribbean region (LAC) and Small Island Developing States (SIDS). I would at the University of the West Indies as the Manager of

Responses to RFI

Application Support and I am aligned to the academic community which fits within the remit of the NCSG. I am also on the Coordinating Team the Caribbean Network Operators' Group (CaribNOG) and work closely with the Sr Manager, Stakeholder Engagement - The Caribbean at ICANN in delivering the LACi program throughout the Caribbean. We are currently in the process of hosting CaribNOG 14 later this year.
