Comparison of Enforcement Mechanisms¹

The chart below compares how each the community powers set forth in the CCWG-Accountability 2nd Draft Proposal could be enforced (a) under the current bylaws model, (b) using the Multistakeholder Enforcement Mechanism proposed by the ICANN Board (MEM), (c) by a Sole Designator and (d) by a Sole Member. The columns comparing the three models (MEM, Sole Designator, and Sole Member) are shaded as follows to indicate similarities and differences between the three models: green where there is general agreement/consistency, yellow where there is relatively close alignment but with some differences and purple where there are material differences. “Direct enforcement” means the ability to go directly to court to enforce and “indirect enforcement” means the ability to enforce through the power to remove directors/recall the board.
