   The (ŋ) LATIN SMALL NETTER N WITH DESCENDER from Chechen language is not included as the writing system has changed back to Cyrillic. It is no longer relevant to the Latin GP. Mirjana will prepare the letter to the IP and circulate via mailing list. The letter then will be sent to the IP by 15 December.

2. **Resolutions on opening issues from processed languages.**

   a. The issue in Chechen language: It's no longer relevant.

   b. The "Click Consonant" for KhoeKhoe, the language in Botswana:

      The WG decided to exclude this code point from the MSR-3 candidate list. It might be discussed later when there is sufficient information. The WG request ICANN staff to reach out to the colleague in Africa to get number of users and status of these characters.
