### Meeting Notes

1. The GP discussed the draft response letter to the IP's Greek-Latin cross script variant query. It was agreed to start analyzing each variant mapping with five possible categories: 1- Same as Latin; 2-In Greek but not in Latin; 3- in Latin but not in Greek (yet); 4-adds in-script variants in Latin; and 5-not in Latin repertoire. Bill volunteered to revise the draft letter. It was also noted that the Cyrillic-Greek-Latin GPs meeting might take place at ICANN66.
2. Meikal volunteered to lead the proposal finalizing for submission on 10 October to the IP. It will not be the final version, but it will capture all the concluded resolutions and also provide summaries of the open issues. All members were requested to stop adding any new edits/comments on the Google Doc. Meikal will continue produce the submitting version (version 5) offline.
3. The GP continued the Sharp S and SS discussion and concluded that they are variant code points. The disposition of Sharp S → SS is 'allocatable', and the disposition of SS → Sharp S is 'blocked'. Denis will clean up the *Appendix: IDNA Compatibility: Latin Small Letter Sharp S (β) U+00DF* document. The GP agreed to use single consistent term for Sharp S across the document.
4. Next meeting is 26 September 2019 at 16:00 UTC
