Meeting Notes

The GP members discussed the pending editing parts of the proposal. The GP agreed to the text in section 6.3.4 Generic Glyph pointing to the data in the Appendix D.7. The GP discussed and finalized the the text in section 5.3.2 as a conclusion of the d, l, and t with Caron Above cases discussed in Appendix D.8.

The GP then continued discussion regarding the test result of Dotless l and l. The test results showed that the down-casing behaviors of browsers own-casing were not influenced by the Turkish locale, a Capital l (without dot) was down-cased to a small letter i (with dot). This is in contrast of other applications e.g. Microsoft office which depend on Turkish locales.

The GP visited the existing text in Appendix D.5.2, Mats volunteered to revise the text taking the findings into account. The conclusion of variant was not reached. It would be continued in the next meeting.

Next meeting: Thursday 4 June 2020 16:00UTC.
