### Meeting Notes

The WG discussed the following agenda items:

- 1. Status of the Repertoire work.** Each WG member shared the progress and problem faced while he/she was processing languages. The issues are:
  - a. The code point is used in a language, but it is not in the MSR-2.
  - b. The reference sources for language with EGIDS 3 or more are hard to find and sometime, two sources say different things.
  - c. It is not clear which codepoint it a character is representing. Some solution on this is needed.
- 2. Second check.** The WG agreed that the second check by another pair of eyes is useful. Therefore, second check approaches were discussed. It was agreed that an additional column for second check will be added in Google Sheet. Each member is required to select languages with EDIGS 2 and 3 for second check and note the checking result in the additional column.
- 3. Preparation for ICANN60.** The WG discussed the presentation content and agreed to include the list of short-listed languages, the work progress of the WG and the common problems. It would also include the Principles for Inclusion and Exclusion of Code Points for Latin Script Root Zone LGR.
