Meeting Notes

1. The GP asked for clarification on normalization process. The following information was shared:
   - UNICODE NORMALIZATION FORMS (https://unicode.org/reports/tr15/)
   - CompositionExclusion.txt (http://www.unicode.org/Public/12.0.0/ucd/CompositionExclusions.txt).

2. It is confirmed that the Unicode Standard lists 09DC LETTER RRA, 09DD LETTER RHA, and 09DF LETTER YYA in the list of characters cannot be derived from the UnicodeData.txt file. Therefore, the GP agreed to move forward with the existing normalized form of these three letters with the following edits to the proposal:
   a. Explicitly note to the preferable of singleton code point for these three letters in the repertoire table.
   b. Not allow the single Nukta to be in the repertoire and so it cannot be combined with other characters except these three letters.

3. After the edits, the GP agreed to share the LGR version 4.4 to the IP.
