Meeting Notes

1. Round table for each script leaders to share feedback on the reference LGR.

The NBGP co-chair invited each script leader to share his feedback. There was no further comment on the variants and rules for the published reference LGRs.

It was raised that the panel-review mechanism is not available in the second-level, therefore, the confusable cases should also be taken into consideration of the LGR as well. The GP were aware that there are UDRP mechanism for the similarity contentions but it seems to be fixing the problem after the damage is done.

The GP discussed and agreed that the confusable cases should be captured, at least, in the descriptive part of the LGR.

2. How the NBGP will response on the public comment

The Co-chair invited each script leaders were invited to post the list of confusable cases and other comments directly to the public comment at <https://www.icann.org/public-comments/reference-lgrs-second-level-2020-08-24-en>.

3. AOB

The NBGP was informed about the upcoming [ICANN69 schedule](#).
