

Fulfilment of Requirements

NTIA Requirements

The National Telecommunications and Information Administration (NTIA) [has requested](#) that ICANN “convene a multistakeholder process to develop a plan to transition the U.S. government stewardship role” with regard to the IANA Functions and related Root Zone management. In making its announcement, the NTIA specified that the transition proposal must have broad community support and meet the following principles:

- Support and enhance the multistakeholder model
- Maintain the security, stability, and resiliency of the Internet DNS
- Meet the needs and expectation of the global customers and partners of the IANA services
- Maintain the openness of the Internet.

NTIA also specified that it would not accept a proposal that replaces the NTIA role with a government-led or an intergovernmental organization solution.

The group has assessed these criteria against CCWG-Accountability Work Stream 1 proposals. The following table documents how these proposals meet the relevant criteria and where in this report the relevant measures and details can be found. This includes a list of the stress tests conducted to assess whether the proposals would also meet the criteria in case of contingencies.

Criteria	Key proposals	Relevant stress tests	Assessment
Support and enhance the multistakeholder model	Enhancements of ICANN’s Accountability are all enhancements to ICANN’s multistakeholder model. The community empowerment mechanism relying on the Sole Member Community Model is deeply multistakeholder. CWG-Stewardship Dependencies

In the transmittal letter for the CWG-Stewardship transition plan to the ICG the CWG-Stewardship noted the following regarding its dependencies on the CCWG-Accountability work:

“The CWG-Stewardship proposal is significantly dependent and expressly conditioned on the implementation of ICANN-level accountability mechanisms proposed by the Cross Community Working Group on Enhancing ICANN Accountability (CCWG-Accountability). The co-Chairs of the CWG-Stewardship and the CCWG-Accountability have coordinated their efforts and the CWG-Stewardship is confident that the CCWG-Accountability Work Stream 1 recommendations, if implemented as expected, will meet the requirements that the CWG-Stewardship has previously communicated to the CCWG-Accountability. If any element of these ICANN level accountability mechanisms is

not implemented as contemplated by the CWG-Stewardship proposal, this proposal will require revision.”

The CWG-Stewardship requirements of the CCWG-Accountability are detailed on pages 20-21 of the CWG-Stewardship proposal transmitted on 25 June 2015. The Work Stream 1 proposals from the CCWG-Accountability address all of these conditions.

1. ICANN Budget

The proposal related to community rights regarding the development and consideration of the ICANN Budget and the IANA Budget can be found in Section 7.1.

The proposal includes the ability for the community to veto the IANA Budget, or the ICANN Budget. The description of the IANA Budget is aligned in this report with the CWG-Stewardship’s description. Continuity measures are set up to ensure that the use of this power does not interfere with the Post-Transition IANA (PTI)’s continuity of operations.

2. ICANN Board and Community Empowerment Mechanisms

The proposals include the ability for the community to appoint and remove members of the Board, recall the entire Board, exercise oversight with respect to certain key ICANN Board decisions and approve amendments to ICANN’s Fundamental Bylaws. Description of these mechanisms can be found in Section 7.3 (Removal of Individual Board Directors) and Section 7.4 (recall of the entire Board). The CCWG-Accountability details its proposals to ensure that the use of such powers does not interfere with the continuity of ICANN’s operations.

3. IANA Function Review and Separation Process

The CCWG-Accountability proposals include the incorporation into the ICANN Bylaws of the sections of the Affirmation of Commitments related to the regular mandated reviews. A section related to the IANA Function Review and Special IANA Function Review will fit into these new sections of the Bylaws. Its specifications will be based on the requirements detailed by the CWG-Stewardship and the Bylaw drafting process will include the CWG-Stewardship.

The incorporation into the Bylaws of the procedure to implement a Separation Process should it arise from a Special IANA Function Review, including provision for the creation of the Separation Cross-Community Working Group (SCWG), its functions and voting thresholds for approving the end-result of the SCWG process (which could include a separation) is agreed on. Its specifications will be based on the requirements detailed by the CWG-Stewardship and the Bylaw drafting process will include the CWG-Stewardship.

As requested by the CWG-Stewardship, the community can use the Independent Review process (see Section 5.1) to challenge a decision by the Board not to implement a recommendation coming out of an IANA Function Review.

4. Customer Standing Committee

The incorporation into the Bylaws of the Customer Standing Committee into the Bylaws is agreed on, and the CWG-Stewardship can either draft its own Bylaw proposal or be included into a joint effort.

5. Appeals Mechanism

CCWG-Accountability proposals include significant enhancement of ICANN's existing appeals mechanisms, including the IRP. The IRP will be available to TLD managers to challenge ICANN decisions including with respect to issues relating to the IANA functions (with the exception of ccTLD delegations and redelegations, as requested by the CWG-Stewardship). Its standard of review will be based on ICANN's Mission and Core Values, which includes compliance with documented policies. The decisions of the IRP will be binding on the ICANN Board.

Further detail on the IRP can be found in Section 5.1.

6. Post-Transition IANA (PTI) Governance

The incorporation into the Bylaws of governance provisions related to PTI is anticipated. Specifications with respect to these PTI governance provisions will be based on the requirements to be detailed by the CWG-Stewardship and the Bylaw drafting process will include the CWG-Stewardship.

7. Fundamental Bylaws

The list of Bylaw sections that will be granted the status of Fundamental Bylaws includes all Bylaw sections relating to community powers (including Budget and Board removal/recall), the enhancements of the IRP and, considering this specific condition, the IANA Function Review and Separation Process, Customer Standing Committee, and PTI Governance.

Changing these Fundamental Bylaws will require, upon proposal by the Board, prior approval of the community with a 75% threshold, through the Community Mechanism as Sole Member.

Further detail on the Fundamental Bylaws can be found in Section 4.
