# SSR Recommendation 28 Implementation

Incidence Response and Notification

31 December 2015

## Project Status

### [Identifier Systems SSR Activities Reporting](#)

As part of our continuing commitment to transparency and accountability, the Identifier Systems SSR department publishes an activities report. The report describes the activities ICANN performs to maintain the security, stability, and resiliency of the Internet's global identifier systems. These activities include collaboration with ICANN, security and operations, and public safety communities, where our staff serves several roles.

- The 1H 2015 activities report highlights ICANNs collaboration and stakeholder activities from January 1 through June 15, 2014. It summarizes activities performed as part of the identifier system SSR threat awareness and preparedness remit. It also provides progress reports on analytics or productivity improvement projects as well.

See Recommendation 25 for additional details on ICANNs risk management work.

## Implementation Notes

This recommendation is in progress.

The Risk Committee of the Board has agreed on the ERM strategy that the organization should pursue, and that this strategy includes at the minimum annual updates on risk assessments, mitigation plans assessment and risk governance
