

# **Korea Internet Governance Alliance(KIGA)'s Comments on the Third Draft Proposal of the Cross Community Working Group on Enhancing ICANN Accountability**

Dec. 21<sup>st</sup>, 2015

Korea Internet Governance Alliance(KIGA) appreciates the continued progress towards a successful transfer of the IANA functions to the global community that is displayed in the 'Third Draft Proposal of the Cross Community Working Group on Enhancing ICANN Accountability (CCWG)'

We would also like to express our appreciation to the members and participants of the CCWG for the determination and tenacity that has produced this third iteration of their proposal

Overall, we support the 'Third Draft Proposal of the CCWG on Enhancing ICANN's Accountability' including the establishment of the sole designator model of the empowered community and the proposal for granting seven powers to the multi-stakeholder community.

Additionally, we would like to point out that there is a need to outline specific details regarding the implementation of the sole designator model. The model contains the relatively novel concept of 'sole designator' and specific legal aspects of how the seven powers will be exercised needs to be clearly outlined in order to assist the community understand the model better.

We look forward to further progress towards a successful transition of the IANA functions.

Thank you.
