Annex 08 – Recommendation #8: Improving Fortifying ICANN’s Request for Reconsideration Process

KEY DISCUSSION ITEMS:

1. While some concerns were raised, the group should discuss whether they can be discussed as part of implementation. The following concerns will be addressed in implementation:

   • Concerns raised during comment:
     i. There is a recommendation that this tool should not be regarded in isolation but rather as one among other mechanisms.
     ii. Concern was raised that the Ombudsman is not sufficiently equipped and knowledgeable to do substantive evaluation. It is also suggested that an independent party, such as the Ombudsman, provide an initial assessment to the Board as to the merit of any and all Reconsideration Requests.
     iii. There is a call for Reconsideration Requests to be transparent and fully communicated to all ICANN stakeholders.

2. Note: High level legal comments have been integrated in this version.

1. Summary

   1. Currently, any person or entity may submit a Request for Reconsideration or review of an ICANN action or inaction as provided for in Article IV, Section 2 of ICANN’s Bylaws.

   2. The CCWG-Accountability proposes a number of key reforms to ICANN’s Request for Reconsideration process, whereby the ICANN Board of Directors is obliged to reconsider a recent decision or action/inaction by ICANN’s Board or staff, including:

      • Expanding the scope of permissible requests.
      • Extending the time period for filing a Request for Reconsideration from 15 to 30 days.
      • Narrowing grounds for summary dismissal.
      • Making the ICANN Board of Directors responsible for determinations on all requests (rather than a committee handling staff issues).
      • Making ICANN’s Ombudsman responsible for initial substantive evaluation of the requests.

   3. The CCWG-Accountability also proposes several enhancements to transparency requirements and firm deadlines in issuing of determinations are also proposed, including:
Recommendation #8

- Recordings/transcripts of Board discussion should be posted at the option of the requestor.
- Provision of a rebuttal opportunity to the Board Governance Committee’s (BGC’s) final recommendation before a final decision by the ICANN Board should be provided.
- Hard deadlines should be added to the process, including an affirmative goal that final determinations of the Board be issued within 60 days from request filing wherever possible, and in no case more than 120 days from the date of the request.

ICANN’s Document and Information Disclosure Policy (DIDP) will be addressed in Work Stream 2. The CCWG-Accountability recommends that the policy should be improved to accommodate the legitimate need for requestors to obtain internal ICANN documents that are relevant to their requests.

2. CCWG-Accountability Recommendations

5 Modify Article IV, Section 2 of ICANN’s Bylaws to reflect the following changes:

- Expanding the scope of permissible requests.
- Extending the time period for filing a Request for Reconsideration from 15 to 30 days.
- Narrowing the grounds for summary dismissal have been narrowed.
- Requiring The ICANN Board of Directors must make determinations on all requests to be made by the ICANN Board of Directors (rather than a committee handling staff issues).
- Requiring ICANN’s Ombudsman should make the initial substantive evaluation of the requests.
- Requiring recordings/transcripts of Board discussion should be posted at the option of the requestor.
- Providing of a rebuttal opportunity to the BGC’s final recommendation before a final decision by the ICANN Board.
- Adding Hard deadlines should be added to the process, including an affirmative goal that final determinations of the Board be issued within 60 days from request filing wherever possible, and in no case more than 120 days from the date of the request.

3. Detailed Explanation of Recommendations

6 The CCWG-Accountability proposes a number of key reforms to ICANN’s Request for Reconsideration process, whereby the ICANN Board of Directors is obliged to reconsider a recent decision or action/inaction by ICANN’s Board or staff, and which is provided for in Article IV, Section 2 of ICANN’s Bylaws.

7 The key reforms proposed include:
The scope of permissible requests has been expanded to include Board/staff actions or inactions that contradict ICANN's Mission, Commitments, and/or Core Values and for reconciling conflicting/inconsistent "expert opinions."

The time for filing a Request for Reconsideration has been extended from 15 to 30 days.

The grounds for summary dismissal have been narrowed and the ICANN Board of Directors must make determinations on all requests (rather than a committee handling staff issues).

ICANN's Ombudsman will make the initial substantive evaluation of the requests to aid the BGC in its recommendation.

Requestors are provided an opportunity to rebut the BGC's recommendation before a final decision by the entire ICANN Board.

More transparency requirements and firm deadlines in issuing of determinations.

**Standing**

Amend "who" has proper standing to file a Request for Reconsideration to widen its scope by including Board/staff actions/inactions that contradict ICANN's Mission, Commitments, and/or Core Values (was only policies before). It is noted that under the existing ICANN Bylaws, paragraph two significantly reduces the rights purportedly granted in paragraph one of the Request for Reconsideration.

ICANN's Bylaws could be revised (added text in red below):

1. ICANN shall have in place a process by which any person or entity materially affected by an action or inaction of the ICANN Board or staff may request the review or reconsideration of that action or inaction by the Board.

2. Any person or entity may submit a Request for Reconsideration or review of an ICANN action or inaction to the extent that he, she, or it have been adversely affected by:

Commented [BT2]: Legal comment - “BGC Determination or Recommendation”

1)Consider adding “Rebuttal opportunity” between “BGC Recommendation” and “ICANN Board Action on Recommendation”
Annex 08 - Recommendation #8

a. One or more ICANN Board or staff actions or inactions that contradict established ICANN policy/policies, its Mission, Commitments, and/or Core Values; or

b. One or more actions or inactions of the ICANN Board/staff that have been taken or refused to be taken without consideration of material information, except where the party submitting the request could have submitted, but did not submit, the information for the Board's consideration at the time of action or refusal to act; or

c. One or more actions or inactions of the ICANN Board/staff that are taken as a result of the Board's reliance on false or inaccurate material relevant information.

cd. Note: The language proposed in recommendations for ICANN Bylaw revisions are conceptual in nature at this stage. The CCWG-Accountability’s external legal counsel and the ICANN legal team will draft final language for these revisions to the Bylaws.

In a letter dated 15 April 2015, the CWG-Stewardship request indicated “As such, any appeal mechanism developed by the CCWG-Accountability should not cover Country Code Top Level Domain (ccTLD) delegation/redelegation issues as these are expected to be developed by the ccTLD community through the appropriate processes.” As requested by the CWG-Stewardship, decisions regarding ccTLD delegations or revocations would be excluded from standing until relevant appeals mechanisms have been developed by the ccTLD community, in coordination with other interested parties.

Disputes related to Internet number resources, protocols and parameters are out of scope of the Independent Review Request for Reconsideration Process (IRP).

Goals

The CCWG-Accountability recommendations aim to:

- Broaden the types of decisions that can be re-examined to include Board/staff action/inaction that contradicts against ICANN’s Mission, Commitments, and/or Core Values (as stated in Bylaws/Articles) and for the purpose of reconciling conflicting/inconsistent expert panel opinions.
- Provide more transparency in the dismissal and reconsideration processes.
- Provide the Board Governance Committee with the reasonable right to dismiss frivolous requests, but not solely on the grounds that the complainant failed to participate in a relevant policy development or Public Comment Period or that the request is vexatious or querulous.
- Propose to amend paragraph nine on BGC summary dismissal as follows:
  - The Board Governance Committee shall review each Request for Reconsideration upon its receipt to determine if it is sufficiently stated. The Board Governance Committee may summarily dismiss a Request for Reconsideration if:
    - The requestor fails to meet the requirements for bringing a Reconsideration Request; or
(ii) (iii) It is frivolous, querulous or vexatious; or (iii) the requestor had no notice and opportunity to, but did not, participate in the public comment period relating to the contested action, if applicable.

- The Board Governance Committee’s summary dismissal of a Request for Reconsideration shall be documented and promptly posted on the website.

**Composition**

The CCWG-Accountability determined there is need to rely less on the ICANN legal department (which holds a strong legal obligation to protect the corporation) to guide the BGC on its recommendations. More ICANN Board member engagement is needed in the overall decision-making process.

Requests should no longer go to ICANN’s lawyers (in-house or external legal counsel) for the first substantive evaluation. Instead, the Requests for Reconsideration will go to ICANN’s Ombudsman, who will make the initial recommendation to the BGC because the CCWG-Accountability believes that the Ombudsman may have more of an eye for fairness to the community in looking at requests. Note that the ICANN Bylaws charge the BGC with these duties, which means the BGC would utilize the Ombudsman instead of its current practice of using ICANN’s lawyers to aid the BGC in its initial evaluation.

All final determinations of Requests for Reconsideration (other than requests that have been summarily dismissed by the BGC as discussed above) are to be made by the entire ICANN Board (not only requests about Board actions as is the current practice).

Amend paragraph three:

3. The Board has designated the BGC to review and consider any such Request for Reconsideration. The BGC shall have the authority to:

- Evaluate requests for review or reconsideration.
- Summarily dismiss insufficient requests.
- Evaluate requests for urgent consideration.
- Conduct whatever factual investigation is deemed appropriate.
- Request additional written submissions from the affected party, or from other parties.
- Make a final determination on Reconsideration Requests regarding staff action or inaction, without reference to the Board of Directors;
- Make a recommendation to the Board of Directors on the merits of the request, as necessary.

Delete paragraph 15 since the Board will make all final decisions regarding requests related to staff action/inaction.

**Decision-Making**

Transparency improvements are needed regarding the information that goes into the ICANN Board’s decision-making process and the rationale for why decisions are made.
ultimately taken. Recordings and transcripts should be posted of the substantive Board discussions atop the option of the requestor.

A rebuttal opportunity to the BGC’s final recommendation (although requestors cannot raise new issues in a rebuttal) needs to be provided before the full Board finally decides.

Hard deadlines to the process are to be added, including an affirmative goal that final determinations of the Board be issued within 60 days from request filing wherever possible, and in no case more than 120 days from the date of the request.

It is proposed that the rules for a Request for Reconsideration be amended as follows:

The Board Governance Committee (BGC) shall make a final determination or a recommendation to the Board with respect to a Request for Reconsideration within 30 days following its receipt of the request, unless impractical, in which case it shall report to the Board the circumstances that prevented it from making a final recommendation and its best estimate of the time required to produce such a final determination or recommendation. In any event, the BGC’s final recommendation to the Board shall be made within 90 days of receipt of the request. The final recommendation shall be promptly posted on ICANN’s website and shall address each of the arguments raised in the request. The requestor may file a rebuttal to the recommendation of the BGC within 15 days of receipt of it, which shall also be promptly posted to ICANN’s website and provided to the entire Board for its evaluation.

The Board shall not be bound to follow the recommendations of the BGC. The final decision of the Board and its rationale shall be made public as part of the preliminary report and minutes of the Board meeting at which action is taken. The Board shall issue its decision on the recommendation of the BGC within 60 days of receipt of the Request for Reconsideration or as soon thereafter as feasible. Any circumstances that delay the Board from acting within this timeframe shall be identified and posted on ICANN’s website. In any event, the Board’s final decision shall be made within 120 days of receipt of the request. The final decision shall be promptly posted on ICANN’s website.

In any event, the Board’s final decision shall be made within 120 days of decision on the recommendation is final.

Accessibility

The CCWG-Accountability recommends that the time deadline for filing a Request for Reconsideration be extended from 15 to 30 days from when requestor learns of the decision/inaction except as otherwise described below.

Amend paragraph five so that it reads as follows:

1. All Requests for Reconsideration must be submitted to an e-mail address designated by the BGC within 30 days after:
   a) For requests challenging Board actions, the date on which information about the challenged Board action is first published in a resolution, unless the posting of the resolution is not accompanied by a rationale. In that instance, the request must be submitted within 30 days from the initial posting of the rationale; or
   b) For requests challenging staff actions, the date on which the party submitting the request became aware of, or reasonably should have become aware of, the challenged staff action; or
c) For requests challenging either Board or staff inaction, the date on which the affected person reasonably concluded, or reasonably should have concluded, that action would not be taken in a timely manner.

Due Process

ICANN’s DIDP is an important issue to be addressed in Work Stream 2 and should be improved to accommodate the legitimate need for requestors to obtain internal ICANN documents that are relevant to their requests.

All briefing materials supplied to the Board should be provided to the requestor so that they may know the arguments against them and have an opportunity to respond (subject to legitimate and documented confidentiality and privilege requirements).

Final decisions should be issued sooner. Changes will include an affirmative goal that final determinations of the Board should be issued within 60 days from request filing wherever possible, and in no case more than 120 days from the date of the request.

Requestors should be provided more time to learn of action/inaction and to file the request.

Transparency improvements throughout the process are called for, including more complete documentation and prompt publication of submissions and decisions including their rationale.

4. Changes from the “thirdSecond Draft Proposal on Work Stream 1 Recommendations”

Minor edits: None.

5. Stress Tests Related to this Recommendation

6. How does this meet the CWG-Stewardship Requirements?

N/A
7. How does this address NTIA Criteria?

38 Support and enhance the multistakeholder model.
   - By enhancing ICANN’s appeals mechanisms and binding arbitration processes and further fortifying and expanding their remit, the community is further empowered.

39 Maintain the security, stability, and resiliency of the Internet DNS.
   - These accountability measures were designed to contribute to maintaining the operational functioning of the organization.

40 Meet the needs and expectation of the global customers and partners of the IANA services.
   - These accountability measures were designed to contribute to maintaining the operational functioning of the organization.

41 Maintain the openness of the Internet.
   - The accountability measures help to mitigate the likelihood of problematic scenarios by ensuring that robust accountability mechanisms are in place.

42 NTIA will not accept a proposal that replaces the NTIA role with a government-led or an inter-governmental organization solution
