Annex 03 – Recommendation #3: Redefining ICANN’s Bylaws as “Standard Bylaws” and “Fundamental Bylaws”

KEY DISCUSSION ITEMS:

1. Clarify that IFR provisions apply only to IANA’s domain name management function (since it is part of CWG-Stewardship requirements).
2. Discuss clarification of process for change of Articles of Association, as requested by IPC and BC.
   a. Noting our lawyer’s memo on the topic (Nov 23rd): […] In the case of ICANN, if the Empowered Community is not provided a right to approve amendments to the Articles, there is a risk that Fundamental Bylaw provisions could be undermined by amendment of the Articles by the ICANN Board, given the hierarchical relationship described above. Thus, we recommend including an approval right with respect to amendments to ICANN’s Articles in favor of the Empowered Community in the same way the Empowered Community has approval rights with respect to Fundamental Bylaws. […]

1. Summary

- Currently, the Internet Corporation for Assigned Names and Numbers (ICANN) only has one class of Bylaws.
  - All ICANN Bylaws can be changed by a 2/3 vote of the ICANN Board.
  - The Board is not required to consult the ICANN community or the wider public before changing these, but has voluntarily done so up to this point.
- The CCWG-Accountability recommends splitting the ICANN Bylaws into “Fundamental Bylaws” and “Standard Bylaws” where Fundamental Bylaws will be more difficult to change.
- Specifically, the CCWG-Accountability recommends that:
  - Public consultations be required on all changes to ICANN Bylaws, both Fundamental and Standard.
  - The requirement for public consultations is added to the ICANN Bylaws as a Fundamental Bylaw to ensure that ICANN must continue to engage with the community in the future.
  - Any changes to Fundamental Bylaws require approval from both the ICANN Board and community as outlined in the respective Community Power (see Recommendation #4: Ensuring Community Involvement in ICANN Decision-making: Seven New Community Powers).
Annex 03 - Recommendation #3

- The threshold for ICANN Board approval for changing a Fundamental Bylaw is raised from 2/3 to 3/4.

- Why is the CCWG-Accountability recommending this?
  - The CCWG-Accountability felt that it was crucial to ensure that ICANN Bylaws that embody the purpose of the organization (Mission, Commitments, and Core Values) and are meant to ensure the accountability of the ICANN Board cannot be changed by the ICANN Board acting alone.

2. CCWG-Accountability Recommendations

- The CCWG-Accountability recommends:
  - Splitting the ICANN Bylaws into Fundamental Bylaws and Standard Bylaws. Examples of Fundamental Bylaws include:
    - The Mission, Commitments, and Core Values.
    - The process for amending Fundamental Bylaws and Articles of Incorporation.
    - The Seven Community Powers.
    - The Community Mechanism as the Sole Designator, i.e., the “Empowered Community.”
    - The Internet Assigned Numbers Authority (IANA) Function Review, Special IANA Function Review, and the Separation Process required by the IANA Stewardship Transition Proposal with regards to IANA’s domain name management function.
    - The Post-Transition IANA (PTI) Governance and Customer Standing Committee also required by the IANA Stewardship Transition Proposal.
    - The right of inspection is granted to the Sole Designator, as outlined Recommendation #1
  - Designating ICANN Bylaws as Fundamental Bylaws that would be more difficult to change. Remaining (or Standard) Bylaws would also require consultation before they can be changed.
  - Requiring approval for any changes to Fundamental Bylaws and Articles of Incorporation from both the ICANN Board and community as outlined in the respective Community Power (see Recommendation #4: Ensuring Community Involvement in ICANN Decision-making: Seven New Community Powers).
  - Raising the threshold for ICANN Board approval for changing a Fundamental Bylaw or Articles of Incorporation from 2/3 to 3/4.

3. Detailed Explanation of Recommendations

- What is a Fundamental Bylaw?
ICANN Bylaws describe how power is exercised in ICANN, including setting out the organization's Mission, Commitments, and Core Values. Together with the Articles of Incorporation, the Bylaws are an essential part of ICANN because they set the scope of the organization's corporate authority, determine its governance framework, and define working practices.

Today, ICANN Bylaws can be changed by a resolution of the Board upon a 2/3 majority vote. The CCWG-Accountability believes that the set of key Bylaws fundamental to ICANN’s stability and operational continuity and essential for the community’s decisions-rights should be given additional protection from changes by requiring community approval of any amendments. These key Bylaws will be identified as Fundamental Bylaws.

As such, the CCWG-Accountability proposes to make Fundamental Bylaws harder to change than Standard Bylaws in two ways:

1. By sharing the authority to authorize changes between the ICANN Board and the ICANN community (organized through its Supporting Organizations (SOs) and Advisory Committees (ACs) in the Empowered Community outlined in Recommendation #1: Establishing an Empowered Community for Enforcing Community Powers).
2. By requiring a higher threshold to authorize changes to Fundamental Bylaws than for Standard Bylaws.

The establishment of Fundamental Bylaws would indirectly enhance ICANN’s accountability to the global Internet community by sharing the authority of decision-making more widely and increasing the difficulty of amending these key aspects of ICANN.

This recommendation is important in the context of the IANA Stewardship Transition because the historic contractual relationship with the U.S. Government provided assurance to the community that the fundamental nature of ICANN was unlikely to be changed without widespread agreement. Without that relationship in place, procedural protections and more widely shared decision-rights on core components of ICANN’s scope and authority should help maintain the community’s confidence in ICANN.

Establishing Fundamental Bylaws

To implement the establishment of Fundamental Bylaws, a new provision would be added to the Bylaws that sets out:
1. Which sections of the Bylaws are Fundamental Bylaws (i.e., a list of the fundamental articles/sections/subsections).
2. How new Fundamental Bylaws can be defined and how existing Fundamental Bylaws can be amended or removed.

**Adding New or Amending Existing Fundamental Bylaws**

While the CCWG-Accountability recommends fortifying certain aspects of the ICANN Bylaws, the global public interest would not be served if ICANN could not fundamentally evolve in response to the changing Internet environment. Therefore, the CCWG-Accountability recognizes the importance of the ability to define new Fundamental Bylaws over time, or to amend or remove existing ones.

The following steps would be required to establish a new Fundamental Bylaw or to amend or remove an existing one, where the ICANN Board (or the staff through the ICANN Board) is proposing the addition or amendment:

- The Board proposes a new Fundamental Bylaw, amendment of a Fundamental Bylaw, or removal of a Fundamental Bylaw.
- The Board approves the addition, amendment, or removal of the Fundamental Bylaw with a 3/4 vote of all standing Directors.
- The community approves the addition, amendment, or removal of the Fundamental Bylaw by deciding to use its power as an Empowered Community to approve the change (see Recommendation #4: Ensuring Community Involvement in ICANN Decision-making: Seven New Community Powers).

If the addition, amendment, or removal of the Fundamental Bylaw is agreed upon by both the ICANN Board and the community:
• The new/revised Fundamental Bylaw would appear in the Bylaws, and an appropriate reference to the text as a Fundamental Bylaw would be added (if needed) to the part of the Bylaws that lists them.
• In the case of an amendment to existing Bylaws text, the text would be updated.
• In the case of a removal, the text would be removed.

14 The CCWG-Accountability does not propose that the community gain the power to directly propose changes to the Bylaws.

15 **Which of the Current Bylaws Would Become Fundamental Bylaws?**

The CCWG-Accountability suggests that only critical aspects of the ICANN Bylaws be defined in the Fundamental Bylaws to avoid introducing unnecessary rigidity into ICANN’s structures. The CCWG-Accountability concluded that suggesting that all changes to ICANN Bylaws should face the same thresholds that are proposed for Fundamental Bylaws would harm, not help, ICANN's overall accountability.

16 The CCWG-Accountability views “critical aspects” as those that define ICANN’s Mission, Commitments, and Core Values, the requirements of the IANA Stewardship Transition, and the core accountability tools the community requires.

17 Accordingly, the CCWG-Accountability recommends that the following aspects be made Fundamental Bylaws as a part of Work Stream 1:

1. The Mission, Commitments, and Core Values.
3. The process for amending Fundamental Bylaws and/or Articles of Incorporation.
4. The powers set out in Section 7 of this report.
5. The Community Mechanism as the Sole Member Model.
6. The IANA Function Review and the Separation Process required by the CWG-Stewardship’s Proposal with regards to IANA’s domain name management function.
7. The PTI Governance and Customer Standing Committee (CSC) structures, also required by the CWG-Stewardship’s Proposal.
8. The right of inspection is granted to the Sole Designator, as outlined in Recommendation #3.

18 To address the question related to whether the ICANN Bylaw regarding location of ICANN’s headquarters should be a Fundamental Bylaw, the CCWG-Accountability referred to the Affirmation of Commitments paragraph 8(b), where “ICANN affirms its commitments to: (b) remain a not for profit corporation, headquartered in the United States of America with offices around the world to meet the needs of a global community…” and determined that ICANN’s present Articles of Incorporation already state that ICANN is a nonprofit public benefit corporation organized under California law:
“3. This Corporation is a nonprofit public benefit corporation and is not organized for the private gain of any person. It is organized under the California Nonprofit Public Benefit Corporation Law for charitable and public purposes.”

Any change to ICANN’s Articles of Incorporation would require approval by the Board:

“9. These Articles may be amended by the affirmative vote of at least two-thirds of the directors of the Corporation. When the Corporation has members, any such amendment must be ratified by a two-thirds (2/3) majority of the members voting on any proposed amendment.”

Under the proposal for the Empowered Community, the Empowered Community would need to approve any change to ICANN’s present status as a California nonprofit public benefit corporation.

The “headquartered” commitment in 8b is already in the current ICANN Bylaws, at Article XVIII Section 1:

“OFFICES. The principal office for the transaction of the business of ICANN shall be in the County of Los Angeles, State of California, United States of America. ICANN may also have an additional office or offices within or outside the United States of America as it may from time to time establish.”

While the Board could propose a change to this Bylaws provision, the Empowered Community mechanism could block the proposed change.

In its Initial Draft Report, the CCWG-Accountability asked commenters whether Bylaws Article XVIII Section 1 should keep its current status as a Standard Bylaw, or be designated as a Fundamental Bylaw.

Two considerations suggest that the CCWG-Accountability should not propose that Article XVIII be designated as a Fundamental Bylaw:

- Public comment on the first and second draft was evenly split on the question of whether to designate Article XVIII a Fundamental Bylaw. Supporting this designation were several commenters from the Commercial Stakeholders Group of GNSO. Governments were among those expressing strong opposition.
- Second, the Empowered Community could block any proposed change to ICANN Bylaws Article XVIII, which states, “The principal office for the transaction of the business of ICANN shall be in the County of Los Angeles, State of California.”

Community Power: Approve Changes to Fundamental Bylaws

Establishing Fundamental Bylaws would ensure that critical aspects of the powers and processes required to maintain ICANN’s accountability to the community, and the organization’s Mission, Commitments, and Core Values, can only be changed as a result of broad consensus of both the ICANN Board and the community.

Through the Empowered Community, SOs and ACs would have to give positive assent to any change proposed by the ICANN Board before the change was finalized, as part of a joint
decision process between the ICANN Board and the community. By creating this special joint decision process, authority to change fundamental aspects of ICANN’s governing framework is shared more broadly than it is today.

The CCWG-Accountability is working under the assumption that the Bylaws provisions that are recommended to become Fundamental Bylaws are not likely to change frequently. Where changes are made, they are unlikely to arise on short notice or will be needed to deal with short-term operational situations. The CCWG-Accountability therefore does not believe that this Community Power, as proposed, poses any challenges to ICANN’s ongoing operational viability or efficiency.

Such changes require a high degree of community assent, as the purpose of this power is to make changing Fundamental Bylaws possible only with very wide support from the community.

For further information about the four other community powers recommended by the CCWG-Accountability, see Recommendation #4: Ensuring Community Involvement in ICANN Decision-making: Seven New Community Powers.

4. Changes from the “Second Draft Proposal on Work Stream 1 Recommendations”

This is a list of key changes from the Second Draft Proposal, which affect this section:

- Change from Sole Member to Sole Designator/Empowered Community (see Recommendation #1: Establishing an Empowered Community for enforcing Community Powers).
- Change from 3/4 voting support in the second draft to four in favor and not more than one objecting in the third draft for the community to approve changes to Fundamental Bylaws.

5. Stress Tests Related to this Recommendation

N/A

6. How does this meet the CWG-Stewardship Requirements?

These recommendations meet the CWG-Stewardship requirement that the CCWG-Accountability recommend the creation of Fundamental Bylaws and that these include the following:

- ICANN Budget: Community rights regarding the development and consideration of the ICANN Budget.
- ICANN Board: Community rights regarding the ability to appoint/remove Directors of the ICANN Board, and recall the entire Board.
7. How does this address NTIA Criteria?

35 Support and enhance the multistakeholder model.
   - Ensuring the multistakeholder model accountability mechanisms cannot be modified without the Empowered Community’s approval.

36 Maintain the security, stability, and resiliency of the Internet DNS.
   - Establishing Fundamental Bylaws that provide additional protections to ICANN Bylaws that are critical to the organization’s stability and operational continuity.

37 Meet the needs and expectation of the global customers and partners of the IANA services.
   - N/A

38 Maintain the openness of the Internet.
   - N/A

39 NTIA will not accept a proposal that replaces the NTIA role with a government-led or an inter-governmental organization solution.
