08:06:41 From Poncelet Ileleji to Everyone : Good Day Folks

08:07:40 From Raoul Plommer to Everyone : Hi Poncelet :)

08:14:18 From Poncelet Ileleji to Everyone : Am good Raoul, refreshing my knowledge

08:14:54 From Adam Peake to Everyone : We will discuss DNSSEC, am important security extension Patrick just mentioned, in a later webinar.

08:16:48 From Ioana Stupariu (NPOC) to Everyone : For the attendees with legal background present here, could anyone explain a bit what cybersquatting (and other similar threats) is? Or will there be a separate session covering this?

08:23:40 From Nathalie Peregrine to Everyone : GNSO website; https://gnso.icann.org/en

08:25:20 From Maryam Bakoshi to Everyone : ICANN Learn website: https://learn.icann.org

08:26:27 From Nathalie Peregrine to Everyone : GNSO Council: https://gnso.icann.org/en/about/council

08:27:41 From Maryam Bakoshi to Everyone : Get to know the GNSO course: https://learn.icann.org/#/online-courses/ea1e7978-2499-4f75-80d5-295091f36dd5

08:37:20 From Patrick Jones to Everyone : To Ioana's earlier question, cybersquatting is a term for when a registrant registers a domain name, particularly of a well-known brand, trademark or individual, with the hope of reselling for profit. As the number of domain names registered grew substantially in the early to mid 1990s, many based on famous brands & trademark

owners, that led to the creation of domain name dispute resolution processes such as the UDRP. We'll talk more about these rights protection processes in a future webinar.

08:38:24 From Patrick Jones to Everyone : The Uniform Domain Name Dispute Resolution Policy (UDRP) is an example of a consensus policy that Emily is covering now.

08:44:41 From Poncelet Ileleji to Everyone : Thank you Emily

08:45:58 From Raymond Mamattah (ICANN70 Fellow) to Everyone : I thought I ever came across city code names. What is the status of this?

08:47:22 From Emily Barabas to Everyone : I can speak to that

08:49:38 From Patrick Jones to Everyone : Decisions about what is allowable for registration within a top-level domain are decided by the registry operator. If the TLD is a country-code, those decisions are subject to local law. City names were not blocked in the legacy TLDs (.com, .net, .org, etc). But certain generic registries have rules about what is allowable and by whom

08:50:13 From Raymond Mamattah (ICANN70 Fellow) to Everyone : The city code names was a topic we discussed during the fist Ghana School on Internet Governance (GhanaSIG) fellowship. I would like to get any WG/WP working on this for our Fellows.

08:50:47 From Svitlana Tkachenko (ICANN70 Fellow) to Everyone : Yes, please

08:50:55 From Patrick Jones to Everyone : To Raymond's question, it depends on what TLD space you're talking about

08:52:38 From Emily Barabas to Everyone : Here is the Work Track 5 report: https://community.icann.org/display/NGSPP/New+gTLD+Subsequent+Procedures+PDP+Home?preview=/60490848/120817416/Work%20Track%205%20Final%20Report%20to%20the%20New%20gTLD%20SubPro%20PDP%20WG%20-%2022%20October%202019.pdf

08:57:15 From Emily Barabas to Everyone : Hand up

08:57:40 From Raoul Plommer to Everyone : Thanks to everyone for attending! Which webinar do we have next week?

08:58:20 From Svitlana Tkachenko (ICANN70 Fellow) to Everyone : Thank you, Emily!

08:58:25 From Raymond Mamattah (ICANN70 Fellow) to Everyone : Thanks @Emily Barabas

08:58:41 From Rodrigo Alexandre to Everyone : thank you

08:59:05 From Raoul Plommer to Everyone : My sound is fine now but I don't want to hold anyone any longer. Thank you for participating!
