

# Global Public Interest (GPI) Framework Process FY21 Pilot [DRAFT]

**Note:** This document illustrates the ICANN Board's GPI process; community groups that decide to pilot the GPI framework are welcome to use or not to use the Board's proposed process in designing their own respective processes.

This process only refers to the GPI portion of the decision making. It does not overtake or change other information points or decision-making processes that are necessary for each decision that the Board takes.
