Minority Statement

As a CCWG-Accountability member, I would like to make this minority statement regarding **Recommendation 6** (Human Rights)

I express my opposition to replacing “within its mission” in the beginning of the proposed text by “within its core value” for the following reason:

- The respect of internationally recognized Human rights should be within ICANN mission only and not be expended to cover other aspects such as the content. If we remove “within its mission”, the commitment could concern other things not included in the ICANN mission.

I can live with “within its mission and core values”, but can’t accept the removal of the ICANN mission as the borders of the scope of this bylaw provision.
