1 Welcome and Introduction

2 Update on Technology Issues

3 At-Large Website Metrics Update

4 ATLAS II Rec 31 Group chat applications - demo of NCUC chat

5 ICANN 56 app and web schedule

Welcome and Introduction

About the Technology Taskforce (TTF)

◉ The Technology Taskforce (TTF) evaluates and reviews Information and Communication Technologies that can help the ICANN At-Large Community (including the At-Large Advisory Committee (ALAC)) better able to accomplish their role in ICANN activities.

◉ It is open to anyone interested in Information and Communication Technology and how they can be applied to solve the needs of ICANN At-Large and other ICANN communities

About the At-Large Technology Taskforce (TTF)

1

Who can be in the TTF?

The Technology Task Force (TTF) consists of members from the At-Large community and other members of AC/SOs.
We welcome anyone from the At-Large community to join us by emailing ICANN At-Large Staff at staff@atlarge.icann.org

2

How often do we meet?

We have one to two conference calls per month., occasionally we Have speciality detailed demonstration of technologies

3

TTF Workspace where we document our activities

Update on Technology Issues

◉ The TTF has a a [Technology Issues wiki page](#) that seeks to track possible technology related issues for raising with ICANN Staff. Two Issues of note:

  ○ Making Adobe Connect recordings more accessible by exporting Adobe Connect recordings from Flash only recordings to formats like MP4

  ○ [LACRALO mailing list issues](#)

Adobe Connect Recordings

- ⊙ Adobe Connect recordings require Adobe Flash for playback ; making such recordings inaccessible to persons with mobile devices

- ⊙ The experience of playing back Adobe Connect recordings on PCs is very cumbersome compared to playing back of videos on video sharing websites

Adobe Connect Recordings

- Based on the [suggestions given by the TTF](#) , ICANN has configured their Adobe Connect account to allow for ICANN staff (at no additional cost) to export Adobe Connect recordings to MP4 format.

- At-Large Staff are currently testing the process to convert Adobe Connect recordings to MP4 and to upload to YouTube. Here's the recording of the At-Large Technology Taskforce conference call on April 18 2016 on YouTube https://www.youtube.com/watch?v=y3rstINbZJo

LACRALO Mailing list

- The issues regarding the LACRALO mailing list issues can be found at https://community.icann.org/x/z4VZAg

- submitted budget proposal to fix the bugs in ICANN's machine translation tool used for the LACRALO mailing lists

- New ICANN staff - Mark Segall, Delivery Manager, Community Services and Corinna Ace, Product Manager are treating the issue more formally

At-Large Website Metrics Update

ATLAS II Rec 31
Group chat applications
– demo of NCUC chat

Recommendation 31

ICANN and the ALAC should investigate the use of simple tools and methods to facilitate participation in public comments, and the use of crowdsourcing.

Assigned to

- Technology Task Force
- At-Large Social Media WG
- RALO chairs

Summary of Implementation of Rec 31

- The TTF has evaluated Loomio (https://www.loomio.org/) and reviewed Kavi (https://www.kavi.com/)

- The TTF is to review tools such as
    - Confluence Questions for the Wiki
    - Discourse
    - Group chat like Slack
    - eXo Platform (https://www.exoplatform.com/)
    - Kailo(http://kialo.com/)
