

Ozan Sahin: (6/30/2016 07:56) Hello, my name is Ozan Sahin and I will be monitoring this chat room. In this role, I am the voice for the remote participants, ensuring that they are heard equally with those who are "in-room" participants.

Jacqueline Morris: (07:56) Great. Hi Ozan.

Ozan Sahin: (07:56) Ø When submitting a question that you want me to read out loud on the microphone in this session, please provide your name and affiliation if you are representing one, start your sentence with <QUESTION> and end it with <QUESTION>. When submitting a comment that you want me to read out loud on the microphone, once again provide your name and affiliation if you have one then start your sentence with a <COMMENT> and end it with <COMMENT>. Text outside these quotes will be considered as part of "chat" and will not be read out loud on the mic.

Ozan Sahin: (07:57) Any questions or comments provided outside of the session time will not be read aloud.

Ozan Sahin: (07:57) All chat sessions are being archived and follow the ICANN Expected Standards of Behavior:

<http://www.icann.org/en/news/in-focus/accountability/expected-standards>

Ozan Sahin: (07:57) Hi Jacqueline

Glenn McKnight: (08:04) Hi

Laura Bengford: (08:05) Hello Everyone!

Ariel Liang: (08:31) Check out the At-Large site:

<http://atlarge.icann.org>

James Gannon: (08:33) Ariel, will I have slide control for my pres?  
(Also for some reason it wont let me PM you)

Laura Bengford: (08:37) We will also post the Analytics on the WIKI with the additional suggestions. Thanks Corinna and congrats At-large for the improvements.

Daniel K. Nanghaka: (08:51) Great presentation James

James Gannon: (08:51) 56 days uptime

seun ojedeji: (08:58) We don't have hosting space perhaps, as i think we do you some sys admin experience ;-

seun ojedeji: (09:03) @james could you let us know the hardware configs for that instance of your friend

seun ojedeji: (09:03) it will be good for planning

James Gannon: (09:04) This is currently on a 12.micro AWS instance which is a 2ghz 2gb instance with a 10gb database in the background

Glenn McKnight: (09:04) We need a date for the demo with the TTF

seun ojedeji: (09:05) Hmm...and that of your friend that scales up to 12000 concurrent is with same configs?

James Gannon: (09:05) No!

James Gannon: (09:05) No if you scale users you would need to scale hardware with it, that instance will do about 250 users

Glenn McKnight: (09:06) James if you have a minute after the call to set a date.

James Gannon: (09:06) Yes glen

seun ojedeji: (09:07) Okay yeah thats the point. Thanks. it may be good

to know if atlarge can get a space on your current instance for testing as well. Before we go for our hosting

James Gannon: (09:07) Lets discuss

Albert Daniels: (09:09) Thank you Dev!

Ozan Sahin: (09:09) This meeting has been adjourned thank you for joining
