

WHAT IS THE EUROPEAN REGIONAL AT-LARGE ORGANIZATION (EURALO)?

Go beyond simply using the Internet. If you are a **European end user organization** concerned with Internet-related issues, you can help influence its operation, growth and development.

EURALO unites European voices of ICANN's At-Large community, including Internet-related civil society and consumer interests, to ensure their views are included in the bottom-up, consensus-based, multistakeholder ICANN policy development process.

Our current membership includes approximately 35 organizations working on Internet-focused issues, including Internet Society (ISOC) chapters and consumer groups across Europe formed into individual At-Large Structures.

Each RALO is governed by its own organizing documents, including a memorandum of understanding with ICANN. Playing a key role in ICANN's regional strategies, EURALO partners with ICANN's Global Stakeholder Engagement team to raise awareness of the critical infrastructure for the Domain Name System.

Members of the At-Large community at the Second At-Large Summit held in London in June 2014.

THE AT-LARGE ORGANIZATIONAL STRUCTURE

5 REGIONAL AT-LARGE ORGANIZATIONS (RALOs) — OVER 200 AT-LARGE STRUCTURES (ALSes)

The At-Large Structures form the basis of the At-Large community, representing the interests of individual Internet end users worldwide.

The five RALOs unite our ALSes based on their geographic regions, namely Africa (AFRALO), Asia, Australasian and Pacific Islands (APRALO), Europe (EURALO), Latin American and the Caribbean Islands (LACRALO), and North America (NARALO).

THE EUROPEAN REGIONAL AT-LARGE ORGANIZATION (EURALO)

Our region represents a large number of Internet users in the world. EURALO has a significant voice in influencing ICANN's multistakeholder policy development. Why don't you consider joining as an individual or with your organization? The Internet is yours.

SEAT #15 ON THE ICANN BOARD IS SELECTED BY THE ALAC AND THE AT-LARGE COMMUNITY

AT-LARGE ADVISORY COMMITTEE (ALAC) — 15 MEMBERS

WHAT WE DO

Our community offers numerous opportunities for individuals and organizations interested in engaging with ICANN. Want to gain knowledge about ICANN issues concerning end users? We encourage you to join the RALO and ALAC teleconferences that take place monthly or to get involved in our capacity-building webinar programs. Want to influence Internet policies such as Directory Services (WHOIS) and new gTLDs? You may learn, discuss, and debate with members in our working groups, as well as help draft policy advice on behalf of the ALAC and At-Large community. Have interests in areas other than strictly Internet policy? You are also welcome to contribute in terms of advancing accessibility and inclusion at ICANN, testing communication and collaboration tools, and designing project proposals among other At-Large community-wide efforts. By gaining experience, you will also have the opportunity to assume positions in the RALOs, the ALAC, and other important decision-making bodies in ICANN. Want to join us? Contact: staff@atlarge.icann.org.

WHAT IS ICANN?

ICANN's mission is to help ensure a stable, secure and unified global Internet. To reach another person on the Internet, you have to type an address into your computer or other device – a name or a number. That address has to be unique so computers know where to find each other. ICANN helps coordinate and support these unique identifiers across the world. ICANN was formed in 1998 as a not-for-profit public-benefit corporation and a community with participants from all over the world. For more information please visit: icann.org.

WHAT IS THE AT-LARGE COMMUNITY?

We are a growing global community of over 200 At-Large Structures (ALSes) and independent members. Our membership is diverse, ranging from Internet-related consumer rights groups, academic organizations, computer clubs, technical communities, to civil society and capacity-building organizations, etc. We share a passion for furthering the development of ICTs and contributing to policies that influence the technical coordination of the Domain Name System to better serve end users. We gather associations that reach out to end users to represent their interests.
