ccNSO: what it is and how it works?

Join in and learn more about the Country Code Names Supporting Organization, its structure and work within ICANN.

Welcome!

In this course you will learn about the Country Code Names Supporting Organization (ccNSO) – a body within the ICANN structure created for and by the country code top level domain (ccTLD) managers.

The ccNSO provides a platform to nurture consensus, technical cooperation and skill building among ccTLDs and facilitates the development of voluntary best practices for ccTLD managers. It is also responsible for developing and recommending global policies to the ICANN Board for a limited set of issues relating to ccTLDs.
Thank you!
