The purpose of this document is to carry out Task 8 of the <u>RDS PDP WG Phase 1 work plan</u>. As noted in that plan, the bulk of the WG's work will involve recommending requirements for registration directory services.

Recognizing that the Board recommended that the EWG Final Report should be the starting point for this PDP and that EWG efforts, although not policy development, were very comprehensive with extensive and thorough consideration of public input, this document identifies *possible* requirements for registration data and directory services from the <u>EWG Final Report</u> along with *possible* requirements obtained from <u>additional Key Inputs</u> such as the sources identified by <u>input-gathering sub-teams</u> on Data, Purpose and Privacy and in the <u>PDP Issue Report</u>, and *possible* requirements suggested by SG/C/SO/AC Inputs and WG Members.

After *possible* requirements are gathered into a comprehensive and inclusive list, which is compiled without debate on the merits of each of the *possible* requirements, the WG will design a very systematic approach to maximize efficiency in discussing and attempting to reach consensus on recommended requirements for registration directory services. These requirements will help the WG reach an informed decision about if and why a next-generation system is needed to replace today's WHOIS system.

Organization

The *possible* requirements listed in this document are organized as follows:

- 1. *Possible* Requirements that map to one or more of the eleven (11) questions in the charter. Note that the same requirement may address multiple questions.
- 2. Possible Requirements that may not map to any question identified in the charter.
- 3. Possible Foundational Questions that must be answered based on all other requirements.

As stated above, all of the *possible* requirements in this document are derived from cited Key Input documents (listed in Annex A), supplemented by any additional *possible* requirements suggested by WG members or SGs, Cs, SOs and ACs during outreach.

After the WG confirms that this list of *possible* requirements is sufficiently complete to serve as the foundation for WG deliberation, the WG should continue through its work plan until reaching Task 12 where it will systematically consider each *possible* requirement individually with the goal of trying to reach as strong a consensus as possible as to whether the WG supports the *possible* requirement, including how it is worded.

The grouping of the requirements into the 11 charter questions should not be seen as fixed. The WG should feel free to move *possible* requirements under different questions and even to include a given requirement under more than one question if that seems useful, as long as the duplication is noted.

The order of the *possible* requirements within the various sections in this document is primarily based on the order in which the 11 questions are posed in the WG's charter. The WG may decide to change the order to provide a more useful presentation but this should be done with full consideration of the reasons why the order was established in the framework. Due to interdependencies, WG deliberation will likely be iterative, especially on fundamental questions pertaining to purpose, data, and privacy.

Numbering

Possible requirements are numbered using the notation [QQ-D#-R#] for ease of use and scalability as this list evolves. Specifically, "QQ" identifies the associated question as follows:

- FQ Foundational Questions: Questions to be answered based on all other requirements
- **OQ** Other Questions: Questions that may not fit within the 11 charter questions
- **UP** Users/Purposes: Who should have access to gTLD registration data and why?
- **GA** Gated Access: What steps should be taken to control data access for each user/purpose?
- **DA** Data Accuracy: What steps should be taken to improve data accuracy?
- **DE** Data Elements: What data should be collected, stored, and disclosed?
- **PR** Privacy: What steps are needed to protect data and privacy?
- **CX** Coexistence: What steps should be taken to enable coexistence?
- **CM** Compliance: What steps are needed to enforce these policies?
- **SM** System Model: What system requirements must be satisfied by any implementation?
- **CS** Cost: What costs will be incurred and how must they be covered?
- **BE** Benefits: What benefits will be achieved and how will they be measured?
- RI Risks: What risks do stakeholders face and how will they be reconciled?

This "QQ" will be followed by "D##" which identifies by number a key input document from Annex A.

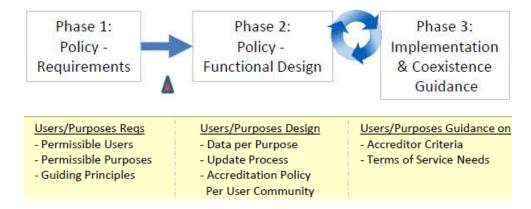

Finally, "R##" sequentially numbers within each document all *possible* requirements. For example, [UP-D01-R03] is the third *possible* user/purpose requirement extracted from the EWG Final Report [01], while [DE-D01-R04] is the fourth *possible* data element requirement taken from that same document.

Possible requirements are not necessarily quoted verbatim from key input documents, but rather phrased as needed to describe a *possible* requirement for gTLD registration directory services or registration data. In particular, *possible* fundamental requirements should not be specific to today's WHOIS system or a next-generation replacement, since the goal is to enable WG deliberation and consensus as the basis for answering foundational questions posed by the WG charter.

Users/Purposes (UP)

The following *possible* requirements address the charter question on Users and Purposes (UP): Who should have access to gTLD registration data & why?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any **prerequisites or dependencies** contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet **Phase 1** policy requirements should be considered in **Phase 2**, while implementation or coexistence guidance for Phase 2 policies should be considered in **Phase 3**. In addition, an initial attempt has been made to **group similar requirements by code (C) and keyword (K)**, allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
[UP-D01-R01]	"In support of ICANN's mission to coordinate the global Internet's system of unique identifiers, and	None	1	Α	а

	that Registrar may make available to the public through a public-access service described in [RAA]				
	Subsection 3.3 and (b) on the manner in which Registrar may make such data available. Registrar				
	shall comply with any such Consensus Policy.				
[UP-D06-R09]	Rights in Data. Registrar disclaims all rights to exclusive ownership or use of the data elements listed	Depends on Access PR(s) for	2	EA	m
	in [RAA] Subsections 3.2.1.1 through 3.2.1.3 for all Registered Names submitted by Registrar to the	Public Access, Data Element			
	Registry Database for, or sponsored by Registrar in, each gTLD for which it is Accredited. Registrar	PR(s) for collection of listed			
	does not disclaim rights in the data elements listed in [RAA] Subsections 3.2.1.4 through 3.2.1.6 and	elements			
	Subsections 3.3.1.3 through 3.3.1.8 concerning active Registered Names sponsored by it in each				
	gTLD for which it is Accredited, and agrees to grant non-exclusive, irrevocable, royalty-free licenses				
	to make use of and disclose the data elements listed in [RAA] Subsections 3.2.1.4 through 3.2.1.6				
	and 3.3.1.3 through 3.3.1.8 for the purpose of providing a service or services (such as a Whois				
	service under Subsection 3.3.4) providing interactive, query-based public access. Upon a change in				
	sponsorship from Registrar of any Registered Name in each gTLD for which it is Accredited, Registrar				
	acknowledges that the registrar gaining sponsorship shall have the rights of an owner to the data				
	elements listed in [RAA] Subsections 3.2.1.4 through 3.2.1.6 and 3.3.1.3 through 3.3.1.8 concerning				
	that Registered Name, with Registrar also retaining the rights of an owner in that data. Nothing in				
	this Subsection prohibits Registrar from (1) restricting bulk public access to data elements in a				
	manner consistent with this Agreement and any Specifications or Policies or (2) transferring rights it				
	claims in data elements subject to the provisions of this Subsection 3.5.				

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
[UP-D06-R10]	From 3.7.7.: Registrar shall agree that it will not process the Personal Data collected from the Registered Name Holder in a way incompatible with the purposes and other limitations about which it has provided notice to the Registered Name Holder in accordance with [RAA] Subsection 3.7.7.4.	Depends on Permissible Purposes, Data Element PR(s) for collection of Personal Data, Privacy PR(s) stating limitations	1	Α	а
[UP-D06-R11]	Handling by ICANN of Registrar-Supplied Data. before receiving any Personal Data from Registrar, ICANN shall specify to Registrar in writing the purposes for and conditions under which ICANN intends to use the Personal Data. ICANN may from time to time provide Registrar with a revised specification of such purposes and conditions, which specification shall become effective no fewer than thirty (30) days after it is provided to Registrar. ICANN shall not use Personal Data provided by Registrar for a purpose or under conditions inconsistent with the specification in effect when the Personal Data was provided. ICANN shall take reasonable steps to avoid uses of the Personal Data by third parties inconsistent with the specification.	Depends on Permissible Purposes, Data Element PR(s) for collection of Personal Data, Privacy PR(s) stating conditions	2, 3	A	а
[UP-D07-R01]	From Specification 4, Section 1.10: "Offering searchability capabilities on the Directory Services is optional but if offered by the Registry Operator it shall comply with the specification described in this [New gTLD Registry Agreement] section [as detailed in [UP-D07-R02 to R07]	Precedes [UP-D07-R02 to R07], Similar to [GA-D01-R19] [DE-D32-R04], Depends on Permissible Purposes involving this functionality	2	CA	i
[UP-D07-R02]	* From Section 1.10.1: Registry Operator will offer searchability on the web-based Directory Service.	Supports [UP`-D07-R01], Depends on Permissible Purposes involving this functionality	2	CA	i
[UP-D07-R03]	* From Section 1.10.2: Registry Operator will offer partial match capabilities, at least, on the following fields: domain name, contacts and registrant's name, and contact and registrant's postal address, including all the sub-fields described in EPP (e.g., street, city, state or province, etc.).	Supports [UP-D07-R01], Depends on Permissible Purposes involving this functionality	2	CA	i
[UP-D07-R04]	* From Section 1.10.3: Registry Operator will offer exact-match capabilities, at least, on the following fields: registrar id, name server name, and name server's IP address (only applies to IP addresses stored by the registry, i.e., glue records).	Supports [UP-D07-R01], Depends on Permissible Purposes involving this functionality	2	CA	i
[UP-D07-R05]	* From Section 1.10.4: Registry Operator will offer boolean search capabilities supporting, at least, the following logical operators to join a set of search criteria: AND, OR, NOT.	Supports [UP-D07-R01], Depends on Permissible Purposes involving this functionality	2	CA	i
[UP-D07-R06]	* From Section 1.10.5: Search results will include domain names matching the search criteria.	Supports [UP-D07-R01], Depends on Permissible	2	CA	i

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
		Purposes involving this functionality			
[UP-D07-R07]	* From Section 1.10.6: Registry Operator will: 1) implement appropriate measures to avoid abuse of this feature (e.g., permitting access only to legitimate authorized users); and 2) ensure the feature is in compliance with any applicable privacy laws or policies.	Supports [UP-D07-R01], Depends on Permissible Purposes involving this functionality	2	CA	j
[UP-D08-R01]	[gTLD directory services must support] Legal Actions investigating possible legal claims arising from use of a domain name, including contacting registrant or its legal representative.	Variant of [UP-D01-R11]	1	A, IA	a, d
[UP-D08-R02]	[gTLD directory services must support] Providing a public record of domain name ownership, accessible by the public for any lawful use.	Variant of [UP-D01-R14]	1	Α	а
[UP-D09-R01]	In Recommendations 2 -4, the WHOIS Policy Review Team (WHOIS RT) recommends that the ICANN board oversee the creation of a single [gTLD registration data] policy document, and reference it in subsequent versions of agreements with Contracted Parties. In doing so, ICANN should clearly document the current [and recommended next-generation?] gTLD WHOIS policy as set out in the gTLD Registry and Registrar contracts and GNSO Consensus Policies and Procedure.	Depends on Policies to be defined in P2	3	A	а
[UP-D13-R01]	based on the review of ICANN's procedure for handling WHOIS conflicts with privacy law, the following User/Purpose-related requirements from past accreditation agreements are unchanged: Registrars must notify registrants of: 1) the purposes for the collection of any personal data, and 2) the intended recipients of the data.	Depends on Permissible Purposes, Permissible Users, Data Element PR(s)	1	DA	b
[UP-D14-R01]	The 2013 RAA Data Retention Waiver and Discussion Document lists and describes all data elements that can be collected by the registrars in accordance with the 2013 RAA and it provides reasons / legitimate purposes for that collection and retention. The following possible User/Purpose requirement stems from this document: Registrars should have access to standard data elements.	Related to [DE-D14-R01], Depends on standard data elements such as those defined by [DE-D06-R08] and Permissible Purposes	1	А	а
[UP-D14-R02]	According to the 2013 RAA Data Retention Waiver and Discussion Document, the public community should have access to WHOIS Information (described in the WHOIS Specification) in order to mitigate abuse, address hijacking, theft and slamming.	Depends on WHOIS Specification	1	CA	j
[UP-D14-R03]	According to the 2013 RAA Data Retention Waiver and Discussion Document, registrars should have access to and be able to collect records of communications with the registrant regarding the registration (log files including communication sources, IP, ISP, behaviour on the website, method of transmission, source IP address, HTTP header, email, Skype handle associated with communication) in order to mitigate fraud prevention, for billing disputes, for commercial purposes.	None	1	EA, A	m, a
[UP-D16-R01]	Under the current ICANN UDRP and URS policies for new gTLDs, contact data published in WHOIS is required to identify registrants for legal purposes. The UDRP and URS policies rely on contact data that is published publicly in [gTLD registration directory services], where potential complainants can see it, and so UDRP and URS dispute resolution service providers can use the data to administrate	Related to [UP-D01-R12], Depends on Access PR(s) for Public Access, Data Element PR(s) for Contacts	1	IB	k

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
	required communications.				
[UP-D18-R01]	 based on the WHOIS Inter-Registrar Transfer Policy, Section I.A.4.5: "For purposes of facilitating transfer requests, Registrars should provide and maintain a unique and private email address for use only by other Registrars and the Registry: 4.5.1 This email address is for issue related to transfer requests and the procedures set forth in this policy only. 4.5.2 The email address should be managed to ensure messages are received by someone who can respond to the transfer issue. 4.5.3 Messages received at such email address must be responded to within a commercial reasonable timeframe not to exceed seven (7) calendar days." 	Depends on Data Element PR(s)	2	IB	k
[UP-D18-R02]	 based on the WHOIS Inter-Registrar Transfer Policy, Section I.A.4.6: 4.6.1 "Registrars will establish a Transfer Emergency Action Contact ("TEAC") for urgent communications relating to transfers. The goal of the TEAC is to quickly establish a real-time conversation between registrars (in a language that both parties can understand) in an emergency. Further actions can then be taken towards a resolution, including initiating existing (or future) transfer dispute or undo processes." 4.6.2 "Communications to TEACs will be reserved for use by ICANN-Accredited Registrars, gTLD Registry Operators and ICANN Staff. The TEAC point of contact may be designated as a telephone number or some other real-time communication channel and will be recorded in, and protected by, the ICANN RADAR system. Communications to a TEAC must be initiated in a timely manner, within a reasonable period of time following the alleged unauthorized loss of a domain." 	Depends on Data Element PR(s)	2	IB	k
[UP-D18-R03]	 based on the WHOIS Inter-Registrar Transfer Policy, Section I.A.5.5 to I.A.5.6: 5.5 "Registrar-generated "AuthInfo" codes must be unique on a per-domain basis." 5.6 "The "AuthInfo" codes must be used solely to identify a Registered Name Holder, whereas the FOAs still need to be used for authorization or confirmation of a transfer request, as described in Section 2 and Section 4 of [the Inter-Registrar Transfer] policy." 	Depends on Data Element PR(s)	2	IB	k
[UP-D18-R04]	based on the WHOIS Inter-Registrar Transfer Policy, Section I.b.1.1: "In general, registrants must be permitted to update their registration/WHOIS data and transfer their registration rights to other registrants freely."	Depends on Data Element PR(s), Data Accuracy PR(s)	1	IB	k
[UP-D19-R01]	based on the ICANN Governmental Advisory Committee (GAC) proposed principles and recommendations related to gTLD WHOIS services on the basis of general public policy issues, gTLD WHOIS [that is, registration directory] services should reflect and respect the following functions: [detailed in [UP-D19-R02 to R09]	Precedes [UP-D19-R02 to R09]	1	IA	d

[UP-D21-R05]	According to Article 29 WP's comments on ICANN's procedures for handling WHOIS conflicts with privacy law (and related correspondence), "Purpose definition is a central element in determining whether a specific processing or use of personal data is in accordance with EU data protection legislation."	Depends on Definition of personal data such as [DE-D26-R09]	1	А	а
[UP-D21-R06]	"Article 29 WP acknowledges the legitimacy of the purpose of the making available of some personal data through the WHOIS services[t]his publicity is necessary in order to put the person running a Website in a position to face the legal and technical responsibilities which are inherent to the running of such a site."	None	1	DA, EA	b, e
[UP-D22-R01]	In sum, from the Article 29 WP's Opinion 2/2003, we could draw out the following possible Purpose requirements: [detailed in [UP-D22-R02 to R05]	Precedes [UP-D22-R02 to R05]	1	Α	а
[UP-D22-R02]	* Need a well-defined purpose;	Supports [UP-D22-R01], Depends on Privacy PR(s) for Processing/Use	1	A, CA	a, j
[UP-D22-R03]	* Data collected should be relevant (and not excessive) for defined purpose;	Supports [UP-D22-R01], Depends on Data Element PR(s)	1	А	а
[UP-D22-R04]	* Bulk access to WHOIS data for direct marketing should be limited;	Supports [UP-D22-R01], Depends on Access PR(s) for Bulk Access, Same as [UP- D21-R04]	1	CA	i, j
[UP-D22-R05]	* Data subjects should be provided with unambiguous and informed consent.	Supports [UP-D22-R01], Depends on Privacy PR(s) for Consent	1	EA	I
[UP-D22-R06]	According to the Article 29 WP's Opinion 2/2003, "From the data protection viewpoint it is essential to determine in very clear terms what is the purpose of the WHOIS and which purpose(s) can be	Depends on Original Purpose	1	Α	а

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
	considered as legitimate and compatible to the original purpose."				1
[UP-D22-R07]	In the Article 29 WP's Opinion 2/2003, the WP states "its support for limitation of bulk access for direct marketing issues."	Depends on Access PR(s) for Bulk Access	1	EA	I
[UP-D23-R01]	"Specification of purpose is an essential first step in applying data protection laws and designing data protection safeguards for any processing operation. Indeed, specification of the purpose is a pre-requisite for applying other data quality requirements, including the adequacy, relevance, proportionality and accuracy of the data collected and the requirements regarding the period of data retention. The principle of purpose limitation is designed to establish the boundaries within which personal data collected for a given purpose may be processed and may be put to further use. The principle has two components: the data controller must only collect data for specified, explicit and legitimate purposes, and once data are collected, they must not be further processed in a way incompatible with those purposes." p.4	Depends on Permissible Purposes, Data Accuracy PR(s), Data Element PR(s)	1	А	a
[UP-D23-R02]	"When we share personal data with others, we usually have an expectation about the purposes for which the data will be used. There is a value in honouring these expectations and preserving trust and legal certainty, which is why purpose limitation is such an important safeguard, a cornerstone of data protection. Indeed, the principle of purpose limitation inhibits 'mission creep', which could otherwise give rise to the usage of the available personal data beyond the purposes for which they were initially collected." p.4	Same as [DE-D23-R01], Depends on Permissible Purposes, Privacy PR(s) on personal data	1	A	а
[UP-D23-R03]	"On the other hand, data that have already been gathered may also be genuinely useful for other purposes, not initially specified. Therefore, there is also a value in allowing, within carefully balanced limits, some degree of additional use. The prohibition of 'incompatibility' in Article 6(1)(b) does not altogether rule out new, different uses of the data – provided that this takes place within the parameters of compatibility." p.4	Depends on Permissible Purposes, Privacy PR(s) on personal data	1	А	а
[UP-D23-R04]	"The principle of purpose limitation - which includes the notion of compatible use - requires that in each situation where further use is considered, a distinction be made between additional uses that are 'compatible', and other uses, which should remain 'incompatible'. The principle of purpose limitation is designed to offer a balanced approach: an approach that aims to reconcile the need for predictability and legal certainty regarding the purposes of the processing on one hand, and the pragmatic need for some flexibility on the other." p.5	Depends on Permissible Purposes, Privacy PR(s) on personal data	1	A	а
[UP-D23-R05]	Council of Europe "CoE Resolution (73) 22 requires the information to be 'appropriate and relevant with regard to the purpose for which it has been stored' and - in the absence of 'appropriate authorisation' - prohibits its use 'for purposes other than those for which it has been stored' as well as its 'communication to third parties'." p.8.	Depends on Permissible Purposes, Access PR(s) for authorization, Privacy PR(s) on personal data	1	А	а
[UP-D23-R06]	"When applying data protection law, it must first be ensured that the purpose is specific, explicit and legitimate. This is a prerequisite for other data quality requirements, including adequacy, relevance and proportionality (Article $6(1)(c)$), accuracy and completeness (Article $6(1)(d)$) and	Depends on Permissible Purposes, Data Accuracy PR(s), Access PR(s) for	1	Α	a

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
	requirements regarding the duration of retention (Article 6(1)(e))." p. 12	authorization, Privacy PR(s) on personal data			
[UP-D23-R07]	"In cases where different purposes exist from the beginning and different kinds of data are collected and processed simultaneously for these different purposes, the data quality requirements must be complied with separately for each purpose." p. 12	Depends on Permissible Purposes, Data Accuracy PR(s), Data Element PR(s)	1	А	а
[UP-D23-R08]	"If personal data are further processed for a different purpose: the new purposes must be specified (Article 6(1)(b)), and it must be ensured that all data quality requirements (Articles 6(1)(a) to (e)) are also satisfied for the new purposes." p. 12 [detailed in [UP-D23-R09 to R10]	Precedes [UP-D23-R09 to R10], Depends on Permissible Purposes, Data Accuracy PR(s)	1	F	h
[UP-D23-R09]	* "First building block: purpose specification. Collection for 'specified, explicit and legitimate' purpose"	Supports [UP-D23-R08], Depends on Permissible Purposes	1	А	a
[UP-D23-R10]	* "Second building block: compatible use. Article 6(1)(b) of the Directive also introduces the notions of 'further processing' and 'incompatible' use, and requires that further processing must not be incompatible with the purposes for which personal data were collected." In particular, Article 6(1)(b) requires that personal data should not be 'further processed in a way incompatible' with those purposes and recital 28 states that the 'purposes of processing further to collection shall not be incompatible with the purposes as they were originally specified'." p.12	Supports [UP-D23-R08], Depends on Permissible Purposes, Original Purpose, Privacy PR(s) on personal data	1	F	h
[UP-D23-R11]	"Transparency: There is a strong connection between transparency and purpose specification. When the specified purpose is visible and shared with stakeholders such as data protection authorities and data subjects, safeguards can be fully effective. Transparency ensures predictability and enables user control." p. 13	Depends on Permissible Purposes, Privacy PR(s)	1	AA	ad
[UP-D23-R12]	"Predictability: If a purpose is sufficiently specific and clear, individuals will know what to expect: the way data are processed will be predictable. This brings legal certainty to the data subjects, and also to those processing personal data on behalf of the data controller. Predictability is also relevant when assessing the compatibility of further processing activities. In general, further processing cannot be considered predictable if it is not sufficiently related to the original purpose and does not meet the reasonable expectations of the data subjects at the time of collection, based on the context of the collection." p. 13	Depends on Permissible Purposes, Original Purpose, Privacy PR(s)	1	A, IA	a, d
[UP-D23-R13]	"User control: User control is only possible when the purpose of data processing is sufficiently clear and predictable. If data subjects fully understand the purposes of the processing, they can exercise their rights in the most effective way. For instance, they can object to the processing or request the correction or deletion of their data." p. 14	Depends on Permissible Purposes, Privacy PR(s)	1	A, EA	a, e
[UP-D23-R14]	"Personal data must be collected for explicit purposes. The purposes of collection must not only be specified in the minds of the persons responsible for data collection. They must also be made explicit. In other words, they must be clearly revealed, explained or expressed in some intelligible form. It follows from the previous analysis that this should happen no later than the time when the	Depends on Permissible Purposes, Data Element PR(s) on Collection, Privacy PR(s) on personal data	1	A, IA	a, d

[UP-D26-R31]	* [personal data may be processed only if] processing is necessary for the purposes of the legitimate interests pursued by the controller or by the third party or parties to whom the data are disclosed, except where such interests are overridden by the interests for fundamental rights and freedoms of the data subject which require protection under [the <u>Directive</u>] Article 1 (1).	Supports [UP-D26-R25], Depends on Legitimate Interests, Fundamental Rights and Freedoms	1	IA, EA	d, m
[UP-D26-R32]	According to the <u>Directive</u> , Member States shall prohibit the processing of personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, trade-union membership, and the processing of data concerning health or sex life. [This requirement] shall not apply where:] (a) the data subject has given his explicit consent to the processing of those data, except where the laws of the Member State provide that the prohibition referred to in paragraph 1 may not be lifted by the data subject's giving his consent; or (b) processing is carried out in the course of its legitimate activities with appropriate guarantees by a foundation, association or any other non-profit-seeking body with a political, philosophical, religious or trade-union aim and on condition that the processing relates solely to the members of the body or to persons who have regular contact with it in connection with its purposes and that the data are not disclosed to a third party without the consent of the data subjects; or (c) the processing relates to data which are manifestly made public by the data subject or is necessary for the establishment, exercise or defence of legal claims.	Depends on Definition of personal data such as [DE-D26-R09], Data Element PR(s)	1	EA	m
[UP-D26-R33]	According to the <u>Directive</u> , processing of data relating to offences, criminal convictions or security measures may be carried out only under the control of official authority, or if suitable specific safeguards are provided under national law, subject to derogations which may be granted by the Member State under national provisions providing suitable specific safeguards. However, a complete register of criminal convictions may be kept only under the control of official authority.	Depends on National Law, Official Authority	1	A, IA	a, d

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
[UP-D26-R34]	According to the Directive, where the data have not been obtained from the data subject, Member States shall provide that the controller or his representative must at the time of undertaking the recording of personal data or if a disclosure to a third party is envisaged, no later than the time when the data are first disclosed provide the data subject with at least the following information, except where he already has it: (a) the identity of the controller and of his representative, if any; (b) the purposes of the processing; (c) any further information such as • the categories of data concerned, • the recipients or categories of recipients, • the existence of the right of access to and the right to rectify the data concerning him in so far as such further information is necessary, having regard to the specific circumstances in which the data are processed, to guarantee fair processing in respect of the data subject. [The above requirement] shall not apply where, in particular for processing for statistical purposes or for the purposes of historical or scientific research, the provision of such information proves impossible or would involve a disproportionate effort or if recording or disclosure is expressly laid down by law. In these cases Member States shall provide appropriate safeguards.	Same as [GA-D26-R07], Depends on Permissible Purposes, Permissible Users, Access PR(s), Data Element PR(s), Definition of personal data such as [DE-D26-R09]	1	EA	m
[UP-D26-R35]	According to the <u>Directive</u> Article 25, Member States shall provide that the transfer to a third country of personal data which are undergoing processing or are intended for processing after transfer may take place only if, without prejudice to compliance with the national provisions adopted pursuant to the other provisions of this Directive, the third country in question ensures an adequate level of protection.	Depends on Privacy PR(s) on Adequacy	1	EA	m
[UP-D27-R01]	According to the European Data Protection Supervisor, Registrar Accreditation Agreement (RAA) gTLD registration data element specifications "should only require collection of personal data, which is genuinely necessary for the performance of the contract between the Registrar and the Registrant (e.g. billing) or for other compatible purposes such as fighting fraud related to domain name registration."	Depends on Permissible Purposes, Data Element PR(s) - RAA, Definition of personal data such as [DE-D26-R09]	1	A, IA	a, d
[UP-D27-R02]	According to the European Data Protection Supervisor, personal data should only be collected to perform the contract between Registrar and Registrant, and that it should be retained no longer than is necessary for these purposes. "This data should be retained for no longer than is necessary for these purposes. It would not be acceptable for the data to be retained for longer periods or for other, incompatible purposes, such as law enforcement purposes or to enforce copyright."	Depends on Definition of personal data such as [DE-D26-R09], Data Element PR(s) on Retention	1	J	0
[UP-D28-R01]	"The people or bodies that collect and manage personal data are called "data controllers". They must respect EU law when handling the data entrusted to them." (Note: they manage the data for the purpose for which it was collected.)	Same as [PR-D28-R01], Similar to [UP-D26-R14], Depends on Definition of personal data such as [DE-D26-R09], EU Law	1	EA	m

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
[UP-D28-R02]	"The privacy rights of individuals supplying their personal data must be respected by anyone collecting and processing that data. The Data Protection Directive lays down a series of rights and duties in relation to personal data when it is collected and processed."	Variant of [GA-D28-R01], Depends on Definition of personal data such as [DE-D26-R09], Data Protection Directive	1	A, IA	a, d
[UP-D28-R03]	The EU Privacy Directive "refers to the persons or entities which collect and process personal data as 'data controllers'. For instance, a medical practitioner is usually the controller of his patients' data; a company is the controller of data on its clients and employees; a sports club is controller of its members' data and a library of its borrowers' data." [gTLD registration directory services? must] ensure that Uses/Purposes are consistent with those allowed by law and the purpose for which the data was collected.	Same as [PR-D28-R02], Depends on Definition of personal data such as [DE-D26-R09]	1	EA	m
[UP-D28-R04]	"Data controllers determine 'the purposes and the means of the processing of personal data'. This applies to both public and private sectors."	Same as [PR-D28-R03] [OQ-D28-R01], Depends on Definition of personal data such as [DE-D26-R09]	1	EA	m
[UP-D28-R05]	"Data controllers must respect the privacy and data protection rights of those whose personal data is entrusted to them. They must: • collect and process personal data only when this is legally permitted; • respect certain obligations regarding the processing of personal data; • respond to complaints regarding breaches of data protection rules; • collaborate with national data protection supervisory authorities.	Same as [PR-D28-R04], Depends on Definition of personal data such as [DE-D26-R09]	1	EA	m
[UP-D30-R01]	The WP29 recalls its long-standing position that massive and indiscriminate surveillance of individuals can never be considered as proportionate and strictly necessary in a democratic society, as is required under the protection offered by the applicable fundamental rights. Additionally, comprehensive oversight of all surveillance programmes is crucial. pg. 4	Same as [RI-D30-R02] [SM- D30-R01]	1	AB	р
[UP-D30-R02]	The requirement for a third country to ensure an adequate level of data protection was further defined by the CJEU in SchremsIt also indicated that the wording 'adequate level of protection' must be understood as "requiring the third country in fact to ensure, by reason of its domestic law or its international commitments, a level of protection of fundamental rights and freedoms that is essentially equivalent to that guaranteed within the European Union by virtue of the Directive read in the light of the Charter" pg.10	Same as [GA-D30-R01] [PR- D30-R05] [CM-D30-R03]	1	A, IA	a, d
[UP-D30-R03]	The WP29 has already explained the way it applied the core EU data protection principles to transfers of personal data to third countries in its Working Document 12 'Transfers of personal data to third countries: Applying Articles 25 and 26 of the EU data protection directive'. The WP29 tried to find the equivalent safeguards which ensure a level of protection equivalent to the principles guaranteed in the Directive, notably regarding purpose limitation, data quality and proportionality,	Same as [DE-D30-R01] [PR-D30-R06] [CM-D30-R04], Depends on Definition of personal data such as [DE-D26-R09], EU Data Protection	1	EA	m

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
	transparency, security, rights of access, rectification and opposition, data retention and restrictions on onward transfers. pg. 11	Directive [D29]			
[UP-D30-R04]	WP29 stresses that any interference with the fundamental rights to private life and data protection need to be justifiable in a democratic society. The CJEU criticised the fact that the Safe Harbour decision did not contain any finding regarding the existence, in the United States, of rules adopted by the State intended to limit any interference. Nor does it refer to the existence of effective legal protection against interference of that kind.pg 11	Same as [GA-D30-R02] [GA-D30-R03] [DE-D30-R03] [PR-D30-R07] [CX-D30-R02] [SM-D30-R02] [RI-D30-R03]	1	IA	d
[UP-D30-R05]	In order to evaluate if any interference would be justifiable in a democratic society, the assessment was conducted in light of the European jurisprudence on fundamental rights which sets four essential guarantees for intelligence activities [as detailed in [UP-D30-R06 to R08]	Precedes [UP-D30-R06 to R08], Same as [GA-D30-R04] [PR-D30-R08] [SM-D30-R03]	1	IA	d
[UP-D30-R06]	* Processing should be in accordance with the law and based on clear, precise and accessible rules: this means that anyone who is reasonably informed should be able to foresee what might happen with her/his data where they are transferred;	Supports [UP-D30-R05], Similar to [UP-D30-R21], Depends on Laws and Rules	1	A, EA	a, l
[UP-D30-R07]	* Necessity and proportionality with regard to the legitimate objectives pursued need to be demonstrated: a balance needs to be found between the objective for which the data are collected and accessed and the rights of the individual;	Supports [UP-D30-R05], Depends on Permissible Purposes, Rights of the Individual	1	EA	r
[UP-D30-R08]	* An independent oversight mechanism should exist, that is both effective and impartial: this can either be a judge or another independent body, as long as it has sufficient ability to carry out the necessary checks;	Supports [UP-D30-R05]	1	IA	d
[UP-D30-R09]	Effective remedies need to be available to the individual: anyone should have the right to defend her/his rights before an independent body. pg. 12	None	1	EC, IA	ab , d
[UP-D30-R10]	Scope of application of the EU data protection framework and, in particular, of the Directive 95/46/EC principles: The WP29 recalls that under the EU data protection legal framework, and in particular under the Directive (Article 4(1)), Member States laws apply not only to the processing operations carried out by data controllers established on their territory, but also where data controllers (although not established in the EU), make use of equipment situated on EU territory, in particular for the collection of personal data. As a consequence, EU Member State law applies to any processing that takes place prior to the transfer to the U.S., either in the context of activities of an organisation established in the EU or through the use of equipment situated in the EU used by an organisation not established in the EU. pg. 12	Same as [DE-D30-R04] [CM-D30-R06] [SM-D30-R04], Depends on Definition of personal data such as [DE-D26-R09], EU Directive (Article 4(1))	1	EC	ab
[UP-D30-R11]	It is therefore crucial to clarify in the Principles that in case of such contradiction, the provisions of the data processing contract and particularly the instructions of the organization transferring the data out of the EU will prevail. Without such clarification, the Principles could be interpreted and applied in a manner that offers too much control capacities to the Shield Agent and this would put the EU data exporter at risk of violating his obligations as a data controller under EU data protection	Depends on Obligations of Data Controllers [DE-D29- R01]	1	EC, EA	ab , m

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
	law to which it is subject when transferring data to a Shield organisation acting as an Agent. In				
	addition, this lack of clarity gives the impression that the processor might reuse the data as he				
	wishes.pg 16				
[UP-D30-R12]	Annex II, I.5. provides, among others, for exemptions from the Principles when data covered by the	Same as [PR-D30-R11] [CM-	1	ID	g
	Privacy Shield is used for reasons of national security, public interest, law enforcement, or following	D30-R09]			
	statute, government regulation or case law which creates conflicting obligations or explicit				
	authorisations. Without full knowledge of U.S. law at both the Federal and at state level, it is difficult				
	for the WP29 to assess the scope of this exemption and to consider whether those limitations are justifiable in a democratic society. It would be essential that the European Commission also includes				
	in its draft adequacy decision an analysis of the level of protection where those exemptions would				
	apply. pg. 17				
[UP-D30-R13]	The Data Retention Limitation principle (Article 6(1)e of the Directive) is a fundamental principle in	Same as [DE-D30-R09],	1	IA	d
[61 550 1(15]	EU data protection law imposing that personal data must only be kept as long as necessary to	Depends on Permissible	_	",	
	achieve the purpose for which the data have been collected or for which they are further	Purposes, Definition of			
	processed.pg 17	personal data such as [DE-			
		D26-R09]			
[UP-D30-R14]	Moreover, the WP29 emphasises that a general right to object (on compelling grounds relating to	Same as [PR-D30-R12],	1	EA	m
	the data subject's particular situation), being understood as a right to ask to terminate the	Depends on Privacy Shield			
	processing about one's data whenever the individual has compelling legitimate grounds relating to				
	his particular situation, should be offered within the Privacy Shield. The WP29 strongly recommends				
	that the draft adequacy decision makes clear that the right to object should exist at any given				
	moment, and that this objection is not limited to the use of the data for direct marketing. pg. 20				
[UP-D30-R15]	It should be clarified that in any case, the Choice principle cannot be used to circumvent the Purpose	Same as [PR-D30-R13],	1	IA	d
	limitation principle. Choice should be applicable only where the purpose is materially different but	Depends on Compatible			
	still compatible since the processing for incompatible purpose is prohibited (Annex II, II.5.a). It has to	Purposes, Privacy PR(s) on			
	be clarified that the right to opt-out cannot enable the organisation to use data for incompatible	Choice and Limitation of			
[UD D20 D4C]	purposes.pg 20	Purpose	1		
[UP-D30-R16]	The WP29 recommends also inserting a clear reference to the Purpose Limitation principle (Annex II, II.5) within the conditions for onward transfers to a third party controller (Annex II, II.3.a). This	Depends on Compatible	1		m
	would make clear that onward transfers may not take place where the third party controller will	Purposes			
	process data for an incompatible purpose. pg. 21				
[UP-D30-R17]	The WP29 notes that the Accountability for Onward Transfer principle (Annex II, II.3) explains that	Depends on Permissible	1	EA	m
[61 250 1(17]	personal data may be transferred to a third party acting as an Agent only for limited and specified	Purposes, Definition of	_		'''
	purposes, but does not explicitly say that these limited and specified purposes have to be	personal data such as [DE-			
	compatible with the initial purposes for which the data were collected as well as with the	D26-R09]			
	instructions of the controller. More clarity is needed on this point. pg. 21	,			

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
[UP-D30-R18]	PPD-28 imposes limits on the use of signals intelligence collected in bulk as regards the purpose of	Depends on PPD-28 Bulk	1	Α,	a,
	the use. These six purposes for which data can be collected in 'bulk', including counter-terrorism	Collection Purposes		CC	q
	and other forms of serious (transnational) crimes. The WP29's analysis suggests that the purpose				
	limitation is rather wide (and possibly too wide) to be considered as targeted.pg.38				
[UP-D30-R19]	The WP29 recalls that it has consistently considered that massive and indiscriminate collection of	None	1	EA	r
	data in any case cannot be regarded as proportionate.pg. 39				
[UP-D30-R20]	WP29 notes that also targeted data processing, or processing that is 'as tailored as feasible', can still	None	1	EA	m
	be considered to be massive. Whether or not such massive data collection should be allowed or not				
	is currently subject to proceedings before the CJEU. For this reason, the WP29 shall not make a final				
	assessment as to the legality of targeted, but massive data processing. However, it stresses that if				
	targeted, but massive data processing would be allowed, the targeting principles should apply to				
	both the collection and the subsequent use of the data, and cannot be limited to just the useThe				
	WP29 is, at this stage, not convinced these purposes are sufficiently restricted to ensure the data				
	collection is indeed restricted to what is necessary and proportional. pg.40				
[UP-D30-R21]	4.2.1 Access by law enforcement authorities to personal data should be in accordance with the law	Same as [GA-D30-R07],	1	CC	q
	and based on clear, precise and accessible rules. pg.53	Similar to [UP-D30-R06],			
		Depends on Definition of			
		personal data such as [DE-			
		D26-R09], Laws and Rules			
[UP-D30-R22]	Since all applicable rules to limit access by law enforcement authorities to data transferred under	Same as [GA-D30-R08],	1,	CC	q
	the Privacy Shield are based on the Constitution, on statutory law and on transparent policies of the	Depends on Constitution,	2		
	Department of Justice, a presumption of accessibility of these rules is taken into account by the	Law, DoJ Policies, Privacy			
	WP29. However, the clarity and precision of the rules can only be assessed in each individual type of	Shield			
	procedure and request for access. The WP29 therefore regrets to note that, based on the available				
	details in Annex VII to the Privacy Shield and the findings in the draft decision, such an assessment				
[110 000 000]	cannot be done at this moment. pg 53				
[UP-D30-R23]	Necessity and proportionality with regard to the legitimate objectives pursued need to be	None	1	CC,	q,
	demonstrated. The WP29 duly notes that requesting access to data for law enforcement purposes			EA	r
	can be considered to pursue a legitimate objective. For instance, Article 8(2) ECHR accepts				
	interferences to the right to the protection for private life by a public authority "in the interests of				
	() public safety, () for the prevention of disorder or crime". However, such interferences are only				
[110 020 024]	acceptable when they are necessary and proportionate pg.53	C	1	ГА	
[UP-D30-R24]	According to the settled case-law of the CJEU, the principle of proportionality requires that the	Same as [GA-D30-R09] [DE-	1,	EA	r
	legislative measures proposing interferences with the rights to private life and to the protection of	D30-R11] [PR-D30-R15],	2		
	personal data "be appropriate for attaining the legitimate objectives pursued by the legislation at	Depends on Definition of			
	issue and do not exceed the limits of what is appropriate and necessary in order to achieve those	personal data such as [DE-			

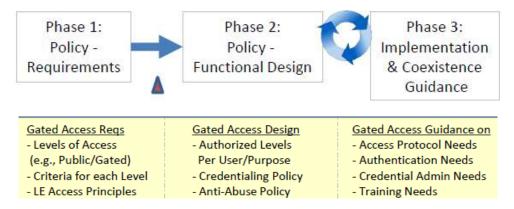

QQ-D#-R#	Possible Requirement – USERS/PURPOSES	Prerequisites/Dependencies	Ph	С	K
	objectives." Therefore, the assessment of necessity and proportionality is always done in relation to	D26-R09], Legitimate			
	a specific measure envisaged by legislation. pg. 54	Objectives			
[UP-D30-R25]	The first concern is that the language used in the draft adequacy decision does not oblige	Depends on Permissible	1	J	0
	organisations to delete data if they are no longer necessary. This is an essential element of EU data	Purpose			
	protection law to ensure that data is kept for no longer than necessary to achieve the purpose for				
	which the data were collected pg.57				
[UP-D59-R01]	According to the GAC, law enforcement should be defined as follows: "Law Enforcement Authority"	None	1	CC	q
	is defined as "law enforcement, consumer protection, quasi-governmental or other similar				
	authorities designated from time to time by the national or territorial government of the jurisdiction				
	in which the privacy or proxy service provider is established or maintains a physical office."				
[UP-D59-R02]	To the extent this definition could be viewed as suggesting that P/P service providers need only	Depends on [UP-D59-R01]	1	CC,	q,
	respond to law enforcement authorities within their own jurisdiction, the PSWG urges the P/P WG			ID	g
	to consider revising this definition. Malicious conduct involving domains often takes place across				
	borders and the definition of law enforcement should recognize the multi-jurisdictional aspects of				
	investigative and enforcement activities in order to promote protecting the public no matter where				
	they are located. If such revisions are made, the Working Group should consider a requirement that				
	a P/P service consult with its local law enforcement authorities in the event it receives a request				
	from a foreign authority (to ensure that the local authorities believe that the request is a proper				
	request from a recognized foreign authority).				
[UP-D59-R03]	There is a need for confidentiality in ongoing LEA investigations.	None	1	CC	q

	(Registries/Registrars). (consider reclassifying this as GA)				

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of **possible** requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Gated Access (GA)

The following **possible** requirements address the charter question on Gated Access (GA): What steps should be taken to control data access for each user/purpose?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any prerequisites or dependencies contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet Phase 1 policy requirements should be considered in Phase 2, while implementation or coexistence guidance for Phase 2 policies should be considered in Phase 3. In addition, an initial attempt has been made to group similar requirements by code (C) and keyword (K), allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[GA-D01-R01]	"gTLD registration data must be collected, validated, and disclosed for permissible purposes only, with	DEPENDENCIES NOT YET	1	Α	а
	some data elements being accessible only to authenticated requestors that are then held accountable for	ADDED TO THIS COLUMN			
	appropriate use." (Permissible Purpose Principle 6 on page 31, relevant to both UP and GA Questions)	EXCEPT WHERE PRS ARE			
		DUPLICATES			
[GA-D01-R02]	"Every Registrant must have the ability to access all public and gated information published in the [gTLD	Similar to [UP-D01-R02]	1	EA	е
	registration directory services] about their domain name, including designated contact data." (Permissible				
	Purpose Principle 7 on page 31, relevant to both UP and GA Questions)				

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[GA-D01-R03]	To maximize Registrant privacy, Registrant-supplied data must be gated by default, except where there is a compelling need for public access that exceeds resulting risk.	Similar to [UP-D01-R04]	1	AB	S
[GA-D01-R04]	Registrants can opt into making any gated Registrant-supplied data public with informed consent. (Data Disclosure Principle 35 on page 45)		1	AB	S
[GA-D01-R05]	* gTLD registration directory services must make data accessible only in conformance with specified Data Access Principles (41-55 on pages 58-61), as follows:	Precedes [GA-D01-R06 to R13]	1	AB	S
[GA-D01-R06]	* A minimum set of data elements, at least in line with the most stringent privacy regime, must be accessible by unauthenticated users.	Supports [GA-D01-R05]	1	EA, AB	d, s
[GA-D01-R07]	* Multiple levels of authenticated data access must be supported, consistent with stated permissible purposes.	Supports [GA-D01-R05]	1	AB	t
[GA-D01-R08]	* gTLD registration directory services user access credentials must be tied to an auditable accreditation process.	Supports [GA-D01-R05]	2	AB	u
[GA-D01-R09]	* Access must be non-discriminatory (i.e., the process must create a level playing field for all requestors, within the same purpose).	Supports [GA-D01-R05]	1	BA	С
[GA-D01-R10]	* The gTLD registration directory service must deter misuse and promote accountability;	Supports [GA-D01-R05]	1	AD	au
[GA-D01-R11]	* All gTLD registration data element access must be based on a stated purpose;	Supports [GA-D01-R05]	1	A, IA	a, d
[GA-D01-R12]	* Access to gated data elements must be limited to authenticated requestors that assert a permissible purpose; and	Supports [GA-D01-R05]	1	AB	u
[GA-D01-R13]	* Requestors must be able to apply for and receive credentials for use in future authenticated data access queries.	Supports [GA-D01-R05]	2	AB	u
[GA-D01-R14]	Some type of accreditation must be applied to requestors of gated access to gTLD registration data:	Precedes [GA-D01-R15 to R17]	1	AB	u
[GA-D01-R15]	* When accredited Requestors query data, their purpose must be stated every time a request is made.	Supports [GA-D01-R14]	2	Α	а
[GA-D01-R16]	* Different [access] terms and conditions may be applied to different purposes.	Supports [GA-D01-R14]	1	IA, J	d, av
[GA-D01-R17]	* If accredited requestors violate terms and conditions, penalties must apply.	Supports [GA-D01-R14]	1	L	٧
[GA-D01-R18]	To raise the standard of gTLD registration data protection, all directory services queries/responses must make use of commonly-available message encryption and authentication measures to protect the confidentiality and integrity of data in transit.		1	G	х
[GA-D01-R19]	To meet the needs of authenticated users with permissible purposes, the gTLD registration directory must provide a Reverse Query service that searches public and gated data elements for a specified value and returns a list of all domain names that reference that value.	Similar to [UP-D07-R01] [DE- D32-R04]	1	ВА	С
[GA-D01-R20]	To meet the needs of authenticated users with permissible purposes, the directory service must provide a WhoWas service that returns historical snapshots of public and gated data elements for specified domain names, limited to the historical data available.		1	BA	С

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[GA-D01-R21]	The gTLD registration directory service must support innovative services that make use of gTLD registration data elements, as follows.	Precedes [GA-D01-R22 to R23]	1	BA	С
[GA-D01-R22]	* Third parties must be able to provide existing and future innovative services – including Reverse Queries and WhoWas – using public data elements and held to terms and conditions of gTLD registration data use.	Supports [GA-D01-R21]	1	ВА	С
[GA-D01-R23]	* In the event that third parties offer innovative services involving gated data elements, those third parties must be accredited and held to terms and conditions of gTLD registration data use.	Supports [GA-D01-R21]	1	BA, AB	c, u
[GA-D01-R24]	All disclosures of gated data elements must occur through defined gTLD registration directory service access methods (including those described above). The entire registration data set for all gTLDs (or the entire Registry data set for a single gTLD) must not be exported in bulk form for uncontrolled access.	Supports [GA-D01-R21]	1	AB	S
[GA-D01-R25]	Disclosures may occur through interactive display and other gTLD registration directory service access methods.	Precedes [GA-D01-R26 to R30]	2	AB	u
[GA-D01-R26]	* To make data easier to find and access in a consistent manner, a central point of access (e.g., web portal) must be offered.	Supports [GA-D01-R25]	2	AB	u
[GA-D01-R27]	* Secure access to public gTLD registration data must be available to all requestors through an unauthenticated query method (at minimum, via secure website).	Supports [GA-D01-R25]	1, 2	AB	t
[GA-D01-R28]	* Secure access to gated gTLD registration data must be supported through secure web and other access methods and formats based on authenticated requestor and purpose.	Supports [GA-D01-R25]	1, 2	AB	u
[GA-D01-R29]	* Requestors must be able to obtain authoritative data from the gTLD registration directory service in real-time when needed.	Supports [GA-D01-R25]	2	AB	u
[GA-D01-R30]	* The gTLD registration directory service must accommodate automation for large-scale lookups for various use cases and permissible purposes.	Supports [GA-D01-R25]	1	CA	i, j
[GA-D01-R31]	To be truly global, the gTLD registration directory service must accommodate the display of registration data in multiple languages, scripts and character sets, including Internationalized domain names (IDNs).	Related to [GA-D42-R03] [DA- D02-R02] [DE-D09-R01] [DE- D02-R01]	1	F	У
[GA-D01-R32]	The gTLD registration directory service should support all future GNSO-defined transliteration policies for gTLDs.		1	F	У
[GA-D01-R33]	The gTLD registration directory service should enable collection and display of registration data elements in local languages.		1	F	У
[GA-D01-R34]	"All access must be purpose-based, returning only data elements permitted for the stated purpose." (bottom of p.62)		1	А	а
[GA-D01-R35]	" for each [gTLD registration directory services] user community identified [under the Charter question on Users/Purposes] desiring access to gated data for permissible purposes, community experts must be consulted to confirm EWG-identified registration data purposes, the data elements that must be accessible for that purpose, and possible User Accreditors." (top of p.63)		1	AB	a, u
[GA-D01-R36]	"Non-accredited, unauthenticated access to non-gated (i.e., public) data must be possible in real-time."		1	AB	t

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[GA-D01-R37]	"Accreditation of [gTLD registration directory service] users for access to [registration data] does not have		1	AB	u
	to happen in real-time for all use cases and/or requesters."				
[GA-D01-R38]	"[gTLD registration directory services] must only apply the minimum accreditation scheme necessary to		2	AB	u
	provide users access to gated data elements for the stated purpose."				
[GA-D01-R39]	"There must be no requirement to pre-approve or provide credentials to every potential user of [gTLD		2	AB	u
	registration directory services.] A request and fulfilment process can be created for each type of				
	accredited user (i.e., [gTLD registration directory services] user community)."				
[GA-D01-R40]	Accreditation for [gTLD registration directory services] users seeking access to data for permissible		3	AB	u
	purposes could be granted in various ways as determined by data access policy. For example, None (i.e.,				
	unauthenticated access to public data only), self-accreditation by the person/entity requesting the data,				
	or accreditation by some trusted third party.				
[GA-D01-R41]	Whenever possible, any third party accreditation process must leverage existing accreditation processes		3	AB	u
	within each user community that needs credentialing.				
[GA-D01-R42]	"Third party accreditation processes must be vetted by an authority responsible for implementing and		3	AB	u
	enforcing [gTLD registration directory services] user accreditation policy (for example, ICANN, a				
	multistakeholder panel) and reviewed on a periodic basis."				
[GA-D01-R43]	"Any organization serving as a [gTLD registration directory service] user accreditor must have a signed		1,	AB	u
	agreement with ICANN and/or the registration directory service provider to offer such accreditation		2		
	processes under agreed-upon guidelines, and establish a framework to allow for due process,				
	accountability, security, fair access, and adherence to applicable law."				
[GA-D01-R44]	Accreditors must take on defined sets of responsibilities, such as establishing criteria for membership,		2	AB	u
	setting credentialing requirements, defining and enforcing terms and conditions of membership,				
	providing functions such as user account creation, credential issuance, suspension and revocation,				
	lifecycle user account management, and associated processes such as dispute handling and ToC				
	enforcement.				
[GA-D01-R45]	Accreditors that wish to participate in handling gTLD registration directory services requests for data on		2	AB	u
	behalf of their members must be able to do so in ways that enable auditing and abuse complaint				
	resolution and hold parties responsible for compliant usage and accountable in the event of abuse.				<u> </u>
[GA-D01-R46]	[gTLD registration directory services] must provide real-time access to credentialed requestors via		2	AB	u
	multiple methods. Access credentials issued during accreditation must be suitable for use with all defined				
	access methods.				<u> </u>
[GA-D01-R47]	"best practices may be defined for credential management; Accreditors must be expected to adhere to		2	AB	u
	best practices."				
[GA-D01-R48]	gTLD registration directory services "must require individual credentials for authenticated access."		1	AB	u
[GA-D01-R49]	"Authenticated access [to gTLD registration data] must not be transitive (i.e., an authenticated user shall		2	AB	u
	not share gated data with others outside of its accreditation)."				

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[GA-D01-R50]	"A process for responsible revelation of gated data to further the original purpose it was requested for must be created and enforced."	Depends on Original Purpose	2	AB	S
[GA-D01-R51]	"An organization seeking access to [gTLD registration] data must be able to apply for user accreditation and have all people using the registration directory service in their organization covered by that one accreditation, [accepting responsibility] for managing accredited access within its own organization."		3	AB	u
[GA-D01-R52]	"Audits and data analytics must be used to identify abuse of the system and access credentials."		2	L	Z
[GA-D01-R53]	"An appeals process must be defined to allow [gTLD registration directory services] users to refute abuse allegations when seeking to reactive/reinstate access credentials."		2	AB	u
[GA-D01-R54]	"Every Registrant must receive a credential to be able to examine their own contact data as stored by the [gTLD registration directory service] in relation to domain names that are registered to them."		1, 2	AB	u, e
[GA-D01-R55]	"A process for adding additional accreditors that either supplement current processes or offer new, innovative ways to provide user accreditation for approved purposes of the [gTLD registration directory service] must be established."		3	AB	u
[GA-D04-R01]	If there is gated access, the [gTLD registration directory service] must feature strong encryption.		1	G	х
[GA-D04-R02]	The [gTLD registration directory service] must not be engineered to contain any back-doors. by introducing a technical input into an encryption product that would enable any party, even authorities, access to data, would also make encrypted data vulnerable to criminals, terrorists and foreign intelligence services, among others. This would have an undesirable consequence for the security of data stored in the [gTLD registration directory service].	Should this be duplicated as [SM-D04-R01]?	1	G	X
[GA-D05-R01]	"The WHOIS protocol has no provisions for strong security. WHOIS lacks mechanisms for access control, integrity, and confidentiality. Accordingly, WHOIS-based services should only be used for information which is non-sensitive and intended to be accessible to everyone." (From Section 5: Security Considerations) This text implies that there should be a requirement to provide services for access control, integrity, and confidentiality. It also suggests that [gTLD registration directory services] should not be used to access sensitive information.	Same as [UP-D05-R01] [PR-D05-R01], Depends on Access PR(s) for Public Access	1, 3	AB	u, l, d
[GA-D08-R01]	Accredited Requestors may pre-identify purposes that will apply to all or some of their queries over a specified time frame.	Variant of [GA-D01-R15]	3	AB	u
[GA-D08-R02]	Other than in exceptional circumstances, accreditation of users for access to [gTLD registration] data should take place in real time.	Variant of [GA-D01-R37]	3	AB	u
[GA-D08-R03]	A process for responsible sharing of gated [gTLD registration] data within an accredited requester organization, with its affiliates, with its clients, or with similar third parties must be created and enforced.	Variant of [GA-D01-R50]	3	AB	u
[GA-D18-R01]	based on the WHOIS Inter-Registrar Transfer Policy, Section I.A.1.1: "The Administrative Contact and the Registered Name Holder, as listed in the Losing Registrar's or applicable Registry's (where available) publicly accessible WHOIS service are the only parties that have the authority to approve or deny a transfer request to the Gaining Registrar. Registrars may use WHOIS data from either the Registrar of Record or the relevant Registry for the purpose of verifying the authenticity of a transfer request; or from		1	IB	k

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	another data source as determined by a consensus policy."				
[GA-D19-R01]	based on the ICANN Governmental Advisory Committee (GAC) proposed principles, gTLD [registration		1	AB	u
	directory] services "should provide () data () in a manner that () facilitates continuous, timely and				
	world-wide access" (para 3.3, sub 2)				
[GA-D26-R01]	According to the <u>Directive (18)</u> , whereas, in order to ensure that individuals are not deprived of the	Same as [CM-D26-R03],	1	EA	m,
	protection to which they are entitled under this Directive, any processing of personal data in the	Depends on Definition of			ab

	by law and intended for consultation by the public or persons having a legitimate interest; whereas in this				
	case such a transfer should not involve the entirety of the data or entire categories of the data contained				
	in the register and, when the register is intended for consultation by persons having a legitimate interest,				
	the transfer should be made only at the request of those persons or if they are to be the recipients;				
[GA-D26-R07]	According to the <u>Directive</u> , where the data have not been obtained from the data subject, Member States shall provide that the controller or his representative must at the time of undertaking the recording of personal data or if a disclosure to a third party is envisaged, no later than the time when the data are first disclosed provide the data subject with at least the following information, except where he already has it: (a) the identity of the controller and of his representative, if any; (b) the purposes of the processing; (c) any further information such as • the categories of data concerned, • the recipients or categories of recipients, • the existence of the right of access to and the right to rectify the data concerning him	Same as [UP-D26-R34], Depends on Permissible Purposes, Permissible Users, Access PR(s), Data Element PR(s), Definition of personal data such as [DE-D26-R09]	1	EA	m
	in so far as such further information is necessary, having regard to the specific circumstances in which the data are processed, to guarantee fair processing in respect of the data subject. [The above requirement] shall not apply where, in particular for processing for statistical purposes or for the purposes of historical or scientific research, the provision of such information proves impossible or would involve a disproportionate effort or if recording or disclosure is expressly laid down by law. In these cases Member States shall provide appropriate safeguards.				
[GA-D28-R01]	The definition of a Data Controller under the EU Privacy Directive requires that the Data Controller ensure that "the privacy rights of individuals supplying their personal data must be respected by anyone collecting and processing that data." [This definition requires that any] gates created [must] ensure that a Registrant in the EU or other data protection country has their data processed through the gates in accordance with their national laws, e.g., EU <u>Data Protection Directive</u> .	Variant of [UP-D28-R02], Depends on Definition of personal data such as [DE-D26-R09], Data Protection Directive	1	A, IA, EA	a, d, m
[GA-D29-R01]	Each <u>data controller</u> must respect the following rules as set out in the <u>Directive</u> : Personal Data must be processed legally and fairly.	Depends on Definition of personal data such as [DE-D26-R09]	1	IA, EA	d, m
[GA-D30-R01]	The requirement for a third country to ensure an adequate level of data protection was further defined by the CJEU in SchremsIt also indicated that the wording 'adequate level of protection' must be understood as "requiring the third country in fact to ensure, by reason of its domestic law or its international commitments, a level of protection of fundamental rights and freedoms that is essentially equivalent to that guaranteed within the European Union by virtue of the Directive read in the light of the Charter" pg.10	Same as [UP-D30-R02] [PR- D30-R05] [CM-D30-R03]	1	A, IA	a, d
[GA-D30-R02]	WP29 stresses that any interference with the fundamental rights to private life and data protection need to be justifiable in a democratic society. The CJEU criticised the fact that the Safe Harbour decision did	Same as [UP-D30-R04] [GA- D30-R03] [DE-D30-R03] [PR-	1	IA	d

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	not contain any finding regarding the existence, in the United States, of rules adopted by the State intended to limit any interference. Nor does it refer to the existence of effective legal protection against	D30-R07] [CX-D30-R02] [SM- D30-R02] [RI-D30-R03]			
	interference of that kind.pg 11				
[GA-D30-R03]	WP29 stresses that any interference with the fundamental rights to private life and data protection need to be justifiable in a democratic society. The CJEU criticised the fact that the Safe Harbour decision did not contain any finding regarding the existence, in the United States, of rules adopted by the State intended to limit any interference. Nor does it refer to the existence of effective legal protection against interference of that kind.pg 11	Same as [UP-D30-R04] [GA- D30-R02] [DE-D30-R03] [PR- D30-R07] [CX-D30-R02] [SM- D30-R02] [RI-D30-R03] — delete duplicate?	1	IA	d
[GA-D30-R04]	In order to evaluate if any interference would be justifiable in a democratic society, the assessment was conducted in light of the European jurisprudence on fundamental rights which sets four essential guarantees for intelligence activities as listed in [UP-D30-R05]	Same as [UP-D30-R05] [PR- D30-R08] [SM-D30-R03]	1	IA	d
[GA-D30-R05]	Privacy Shield documents make use of terminology that is not consistent with the vocabulary generally used in the EU when dealing with data protection. This is not necessarily a problem, as long as it is clear what the corresponding terminology under EU law (and under U.S. law) would be. The WP29 regrets to note however this is not the case, including in the draft adequacy decision. For example, the word 'access' is used in chapter 3 of the draft adequacy decision in a sense that implies the collection of personal data, instead of allowing someone to see data that is already collected. Access by companies to the data and the individuals' right of access are two separate notions that should not be confused. pg. 13	Related to [UP-D26-R10], Depends on Definition of personal data such as [DE-D26-R09]	1	EA, EC	m, ab
[GA-D30-R06]	The Privacy Shield does not provide any legal guarantees where individuals are subject to a decision which produces legal effects concerning or significantly affecting them and which is based solely on automated processing of data intended to evaluate certain personal aspects relating to them, such as their performance at work, creditworthiness, reliability, conduct, etc. The necessity to provide for legal guarantees for automated decisions (producing legal effects or significantly affecting the individual) in order to provide an adequate level of protection has already been underlined by the WP29 in its Working Document 12.pg 18		1	EA, EC	m, ab
[GA-D30-R07]	4.2.1 Access by law enforcement authorities to personal data should be in accordance with the law and based on clear, precise and accessible rules. pg.53	Same as [UP-D30-R21], Similar to [UP-D30-R06], Depends on Definition of personal data such as [DE- D26-R09], Laws and Rules	1	CC	q
[GA-D30-R08]	Since all applicable rules to limit access by law enforcement authorities to data transferred under the Privacy Shield are based on the Constitution, on statutory law and on transparent policies of the Department of Justice, a presumption of accessibility of these rules is taken into account by the WP29. However, the clarity and precision of the rules can only be assessed in each individual type of procedure and request for access. The WP29 therefore regrets to note that, based on the available details in Annex VII to the Privacy Shield and the findings in the draft decision, such an assessment cannot be done at this	Same as [UP-D30-R22], Depends on Constitution, Law, DoJ Policies, Privacy Shield	1, 2	CC	q

	also be related to Privacy)				
[GA-D41-R07]	RFC 7481, Section 3.3, Authorization, specifies that "If such varying degrees of access are supported, an RDAP server MUST provide granular access controls (that is, per registration data object) in order to implement authorization policies." This provides a possible requirement: A registration directory service must provide granular access controls in order to implement authorization policies. (May also be related to Privacy)	Should this be duplicated as [PR-D41-R06]?	2	AB	u
[GA-D41-R08]	RFC 7481, Section 3.5, Data Confidentiality, specifies that "HTTP over TLS MUST be used to protect all client-server exchanges unless operational constraints make it impossible to meet this requirement." This provides a possible requirement: A registration directory service must use HTTP over TLS to protect all client-server exchanges. (May also be related to Privacy)	Should this be duplicated as [PR-D41-R07]?	3	AB	u
[GA-D50-R01]	According to the Singapore GAC Communiqué of February 11, 2015, the ICANN board should amend the current process for requests to release two-letter codes to establish an effective notification mechanism, so that relevant governments can be alerted as requests are initiated. (Page 5)	Relevance to RDS?	j	?	Ş
[GA-D50-R02]	The ICANN board should extend the comment period referred to by [GA-D50-R01] to 60 days.	Relevance to RDS?	?	?	?
[GA-D50-R03]	The changes recommended by [GA-D50-R01] and [GA-D50-R02] should be implemented before proceeding with pending and future requests [to release two-letter codes]; a list of GAC Members who intend to agree to all requests and do not require notification should be published on the GAC website. (Page 6)	Relevance to RDS?	J.		j
[GA-D54-R01]	According to SAC051, the ICANN community should develop a uniform and standard framework for accessing registration data that would provide mechanisms to define and implement a range of credential services.		1	AB	s, t, u
[GA-D54-R02]	The ICANN community should develop a uniform and standard framework for accessing registration data that would provide mechanisms to define and implement a range of access control capabilities.		1	AB	s, t, u
[GA-D61-R01]	According to Carlton Samuels' blog on building a better WHOIS for individual registrants, [there should be] no anonymous public access to gTLD registration data.		1	AB	s, t
[GA-D61-R02]	Access should be "limited to those with a need to know, and requestors who access data will be held accountable for proper use."		1	AB	S
[GA-D61-R03]	[There should be] "Registrants will have more flexibility and control over what data is public."		1	Н	as

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of *possible* requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Data Accuracy (DA)

The following *possible* requirements address the charter question on Data Accuracy (DA): What steps should be taken to improve data accuracy?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any **prerequisites or dependencies** contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet **Phase 1** policy requirements should be considered in **Phase 2**, while implementation or coexistence guidance for Phase 2 policies should be considered in **Phase 3**. In addition, an initial attempt has been made to **group similar requirements by code (C) and keyword (K)**, allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

[DA-D01-R16]	* All contact data elements must be validated at a syntactic level. This represents a base-level of	Supports [DA-D01-R15]	2	DA	af
	validation that must be achievable by any entity in the industry.				<u> </u>
[DA-D01-R17]	* All mandatory contact data elements for a particular purpose must be validated operationally before	Supports [DA-D01-R15]	2	DA	af
•	that contact can be included in domain name registration data for that purpose.				<u> </u>
[DA-D01-R18]	* A Contact Holder must be able to voluntarily seek optional higher levels of validation (e.g., optional	Supports [DA-D01-R15]	2	DA,	af,
	identity validation), bearing associated costs in return for perceived benefits (e.g., greater consumer			F	aj
[confidence in domain names registered to identity-validated entities).				<u> </u>
[DA-D01-R19]	* Given costs involved with optional identity validation, a low-cost mechanism for economically	Supports [DA-D01-R15]	3	DA,	af,
[disadvantaged Contact Holders to receive optional identity validation is desirable.			KA	ag
[DA-D01-R20]	* In order to preserve associations and allow for a correction process, contact data can have a status of	Supports [DA-D01-R15]	2	DA	af
	"inaccurate" and remain in the system.				<u> </u>
[DA-D01-R21]	* Validation Status of contact data must be tracked and published as appropriate [in the registration	Supports [DA-D01-R15]	2	DA	af
fo	directory service], along with the most recent time the validation status was determined.				<u> </u>
[DA-D01-R22]	* Third parties may file inaccuracy reports to challenge the Validation Status of contact data, triggering a	Supports [DA-D01-R15]	2	DA	af
	standard remediation process that may result in the contact being flagged as "inaccurate" and in further				<u> </u>

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	consequences for domain names using that contact data.				
[DA-D01-R23]	* Active domains cannot have a mandatory contact with an "inaccurate" status without some sort of	Supports [DA-D01-R15]	1	DA	af
	remediation.				
[DA-D01-R24]	* A minimum level of cross-field validation must be checked for all contact data elements associated with	Supports [DA-D01-R15]	2	DA	af
	contacts where cross-field validation is applicable (e.g. physical address).				
[DA-D01-R25]	* Revalidation of contact data must be carried out on a regular basis to ensure data is accurate at the	Supports [DA-D01-R15]	1	DA	af
	declared level.				
[DA-D01-R26]	* If a Contact Holder provides optional data elements, those elements must be at least syntactically	Supports [DA-D01-R15]	2	DA	af
	validated. Optional data elements must not be validated beyond syntax unless the Contact requests and				
	presumably pays for any costs associated with such validation.				
[DA-D01-R27]	* The level of validation achieved beyond syntactical validation for data elements that can be	Supports [DA-D01-R15]	2	DA	af
	operationally- or (optionally) identity-validated must be recorded and maintained by the Validator.				
[DA-D01-R28]	* The Validator must determine and publish [in the gTLD registration directory service] the overall	Supports [DA-D01-R15]	2	DB	ae
	validation status achieved by each contact.				
[DA-D01-R29]	* For any data element that has undergone validation, the timestamp of that validation must also be	Supports [DA-D01-R15]	2	DA	af
	recorded and maintained.				
[DA-D01-R30]	[gTLD registration directory services must offer an optional] Unique Contact Data Capability (Section g on		2	DA	f,
	p.78)			ah	
[DA-D01-R31]	"To allow for much greater accuracy across such a diverse space and ease-of-use for such contacts, it is		3	DA	f,
	desirable to provide mechanisms to allow easy use of such contacts by multiple Registrants; for example,				ah
	a web hosting company providing their NOC's unique ID for "technical" and "abuse" contacts for domains				
	controlled by their customers." (bottom of p.69) [Also included as a possible benefits requirement]				
[DA-D01-R32]	" when such an entity needs to update their contact information to reflect a new address/phone		1	DA	f,
	number or a merger/acquisition, it must be easy to update that information in one place and have that				ah
	reflected to all domains associated with that contact data set (as designated by a unique identifier)."				
	(Top of p.70) [Also included as a possible benefits requirement]				
[DA-D02-R01]	"An accuracy policy should define each data element and require that it be examined and indicate for		1	DB	n
	each element a method for determining the level of accuracy of the data."				
[DA-D02-R02]	"Policies with respect to the accuracy of registration data should apply equally to all registration data	Related to [GA-D01-R31 to	1	DB	n
	without regard to whether it is internationalized or ASCII registration data."	R33] [GA-D42-R03] [DE-D09-			
		R01] [DE-D02-R01]			
[DA-D06-R01]	Upon receiving any updates to the data elements listed in [RAA] Subsections 3.3.1.2, 3.3.1.3, and 3.3.1.5		2	F	h
	through 3.3.1.8 from the Registered Name Holder, Registrar shall promptly update its database used to				
	provide the public access described in [RAA] Subsection 3.3.1.				
[DA-D06-R02]	Registrar shall comply with the obligations specified in the [gTLD registration directory service] Accuracy		2	DB	n
	Program Specification. In addition, notwithstanding anything in the Accuracy Program Specification to				

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	the contrary, Registrar shall abide by any Consensus Policy requiring reasonable and commercially				
	practicable (a) verification, at the time of registration, of contact information associated with a				
	Registered Name sponsored by Registrar or (b) periodic re-verification of such information. Registrar				
	shall, upon notification by any person of an inaccuracy in the contact information associated with a				
	Registered Name sponsored by Registrar, take reasonable steps to investigate that claimed inaccuracy. In				
	the event Registrar learns of inaccurate contact information associated with a Registered Name it				
	sponsors, it shall take reasonable steps to correct that inaccuracy.				
[DA-D08-R01]	All mandatory contact data elements for a particular purpose must be validated operationally before the	Variant of [DA-D01-R17]	1,	DA	af
	corresponding registration is activated.		2		
[DA-D09-R01]	The WHOIS RT recommends fulfillment of data accuracy objectives over time. Specifically [as detailed in	Precedes [DA-D09-R02 to	1	DB	n
	[DA-D09-R02 to R04]	R04]			
[DA-D09-R02]	* The [WHOIS RT] notes that the focus of its recommendations is on the desired outcome that ICANN	Supports [DA-D09-R01]	1	DB,	n,
	work to improve the accuracy of [gTLD registration] data. [Data] validation or verification would be one			DA	af
	possible means to achieve this objective, whereas our intention is to allow latitude in how the objective				
	is achieved.				
[DA-D09-R03]	* based on review of a study on data accuracy that ICANN asked the National Opinion Research Council	Supports [DA-D09-R01]	2	DB,	n,
	of the University of Chicago to provide ("NORC WHOIS Data Accuracy Study 2009/10"), the WHOIS RT			DA	af
	recommended that ICANN pursue a "contactability standard" for data accuracy in the WHOIS – enough				
	accurate data elements for the Registrant to be contacted (minimal data elements).				
[DA-D09-R04]	* In Recommendation 6, the WHOIS RT recommended that ICANN should take appropriate measures to	Supports [DA-D09-R01]	2	DB	n
	reduce the number of WHOIS registrations that fall into the accuracy groups Substantial Failure and Full				
	Failure (as defined by the NORC Data Accuracy Study, 2009/10) by 50% within 12 months and by 50%				
	again over the following 12 months. (Refer to the NORC study for definitions of Substantial and Full				
	Failure.)				
[DA-D10-R01]	In SAC058, a report to the ICANN board from the Security and Stability Advisory Committee (SSAC)		1	DB,	n,
	concerning the issue of domain name registration data quality, the SSAC examines the feasibility and			DA	af
	suitability of improving registration data accuracy through validation, offering the following possible Data				
	Accuracy requirements.				
[DA-D10-R02]	[ICANN should] identify [registration data] validation techniques that can be automated and develop		1	DA	af
	policies that incent the development and deployment of those techniques. (Page 4)				
[DA-D10-R03]	To improve registration data accuracy, there needs to be 1) an incentive for the registrant to submit		1	DB	n
	accurate data, or 2) efforts by registry / registrar to follow up and check the accuracy of the submitted				
	data; or 3) both. (Page 5)				
[DA-D10-R04]	[As further detailed below, registration data should undergo] Syntactic Validation: Assess [registration]		2	DA	af
	data with the intent to ensure that they satisfy specified syntactic constraints, conform to specified data				
	standards, and are transformed and formatted properly for their intended use. (Page 7)				

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[DA-D10-R05]	[As further detailed below, registration data should undergo] Operational Validation: Assess that		2	DA	af
	[registration] data correspond to the intended use in their routine functions (e.g. check that an email				
	address or phone number can receive email or phone calls, check that a postal address can receive postal				
	mail, etc.). (Page 8)				
[DA-D10-R06]	[As further detailed below, registration data should undergo] Identity Validation: Assess that		2	DA	af
	[registration] data corresponds to the real world identity of the registrant entity. (Page 8)				
[DA-D10-R07]	[ICANN should] Determine the length of time before the validation of changes to contact information		1	DA	af
	must be repeated. (Page 8-9)				
[DA-D10-R08]	Name validation should be implemented as follows:		2	DA	af
	Syntactic Validation: To achieve effective syntactic validation of a name as one of the contact				
	information elements, the script (or writing system) used for a name element must be known. If it is,				
	confirming that the syntax conforms to the script is possible and can be automated. However, the				
	language of a name cannot be determined precisely as many languages share the same script. (Page 9)				
	Operational Validation: Create exception lists for auditing purposes in order to facilitate the process				
	of operational validation of names because names in the world are diverse and it may not be				
	possible to operationally verify a name automatically. (Page 10)				
	Identity Validation: Require the submission of physical documentation issued by a government				
	authority to verify that registration data contact information corresponds to a real world entity. (Page 10)				
[DA-D10-R09]	Email address validation should be implemented as follows:		2	DA	af
	• Syntactic Validation: Syntax for a valid email address (defined as per RFC 5322) and syntax for a valid				
	internationalized email address (defined as per PRFs 6530-33) should be checked automatically.				
	(Page 10)				
	Operational Validation: Having in mind that an email address is defined as a string composed of a				
	Left Hand Side (LHS) and Right Hand Side (RHS) separated by the at-symbol (@), verify that an email				
	address is operational implementing several checks (e.g. with respect to the RHS check that the				
	domain name exist in the DNS while with respect to the LHS check that the endpoint SMTP accepts				
	an email message for the recipient specified at the LHS). (Page 10)				
	• An effective verification technique of an email address is to attempt to deliver an email message that				
	requires explicit user action. In this technique, an email address should not be considered valid until				
	the user receives and performs some action described in the email, such as clicking on a web link or				
	replying to the message in a specified way. Note that sometimes anti-spam measures could still				
	block these verification emails. (Page 11)				
	Identity Validation: In order to verify that an email address is used exclusively by a particular				
	registrant, contact the registrant using an out-of-band method, i.e., contacting the registrant without				

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	using email (e.g. two possibilities are using the postal information or the telephone information to contact the registrant). (Page 11)				
[DA-D10-R10]	 Telephone number validation should be implemented as follows: Syntactic Validation: Perform automatic checks to determine if a telephone number complies with the E.164 standard (E.164 is an ITU-T recommendation that defines the international public telecommunication numbering plan used in the PSTN and some other data networks). (Page 11) Operational Validation: Verify E.164 formatted PSTN addresses (telephone numbers) by leveraging PSTN databases. (Page 11) Use the Short Message Service (SMS) to verify a phone number (works only for cellular numbers). (Page 12) Identity Validation: In order to verify that a telephone number is used exclusively by a particular registrant, contact the registrant using an out-of-band method, i.e., contacting the registrant without using the telephone number (e.g. two possibilities are using the postal information or the email address to contact the registrant). (Page 12) 		2	DA	af
[DA-D10-R11]	 Postal address validation should be implemented as follows: Syntactic Validation: The EPP standard defines an opaque container and loose constraints that can support internationalized postal addresses. Operational Validation: Verify postal addresses by leveraging postal databases. There are about 200 such databases in the world with about 20 (G20 major economies) being highly accurate. (Page 13) Deliver a postal message to a postal address in order to verify with a high level of certainty that the postal address is valid. (Page 13) Identity Validation: In order to verify that a postal address is used exclusively by a particular registrant, contact the registrant using an out-of-band method, i.e., contacting the registrant without using the postal address (e.g. two possibilities are using the telephone number or the email address to contact the registrant). (Page 13) 		2	DA	af
[DA-D11-R01]	The accuracy of [gTLD registration data] must be assessed by asking the following questions. Answers in the negative indicate inaccurate data. The criteria are based on the obligations contained in the 2009 and 2013 RAA.[as detailed in [DA-D11-R02 to R04]	Precedes [DA-D11-R02 to R04]	3	DB	n
[DA-D11-R02]	* Phase One: Syntax Validation must be performed on gTLD registration data elements that are email addresses, as follows: Does the email address only contain permissible characters? (i.e., as provided for within the RFC 5322) Is there presence of an "@" symbol in the email address? Is there presence of a domain component? Is the domain component in a TLD, which is resolvable on the Internet? (see IANA's Root Zone Database: http://www.iana.org/domains/root/db) Is the domain component syntactically valid? (i.e., the component following the "@" symbol meets requirements) Is there presence of local component? (i.e., the characters preceding the "@" symbol)	Supports [DA-D11-R01]	3	DA	af
[DA-D11-R03]	* Phase One: Syntax Validation must be performed on gTLD registration data elements that are	Supports [DA-D11-R01]	3	DA	af

	authority regarding the question of which record shall be considered accurate and reliable in case of				
	conflicting records (i.e., the authoritative data). (sec. 5.8) [may also relate to Users/Purposes]				
[DA-D15-R01]	ICANN's Uniform Domain Name Dispute Resolution Policy (UDRP) requires registrant information taken	Related to [UP-D01-R12]	1	DB	n
	from [gTLD registration directory services] for the disputed domain name to be accurate to meet UDRP-				
	related Data Element requirements - see [DE-D15-R01] through [DE-D15-R03].				
[DA-D15-R02]	ICANN's UDRP makes Domain Registrant liable to provide complete & accurate statements, including	Related to [UP-D01-R12]	1	DB	n
	contact information, which forms part of Domain WHOIS, by default. Specifically, registrants who apply				
	"to register a domain name, or to maintain or renew a domain name registration, [must] represent and				
	warrant that (a) the statements made in [their] Registration Agreement are complete and accurate."				
	(UDRP policy, Paragraph 20)				
[DA-D16-R01]	*ICANN's Uniform Rapid Suspension (URS) policy requires registrant information taken from [gTLD		1	DB	n
	registration directory services] for the disputed domain name to be accurate for proper completion of				
	the Complaint, for proper service of hard copy Notice, and to meet additional URS-related Data Element				
	requirements - see [DE-D16-R01] through [DE-D16-R09].				
[DA-D18-R01]	based on the WHOIS Inter-Registrar Transfer Policy, Section I.A.3.7: "Upon denying a transfer request for		2	IB	k

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	any of the following reasons, the Registrar of Record must provide the Registered Name Holder and the				
	potential Gaining Registrar with the reason for denial. The Registrar of Record may deny a transfer				
	request only in the following specific instances: Reasonable dispute over the identity of the Registered				
	Name Holder or Administrative Contact. The transfer was requested within 60 days of the creation date				
	as shown in the registry WHOIS record for the domain name."				
[DA-D19-R01]	based on the ICANN Governmental Advisory Committee (GAC) proposed principles, gTLD [registration	Same as [DE-D19-R01]	1	DB	n
	directory] services "should provide sufficient and accurate data about domain name registrations and				
	registrants ()" (para 3.3)				
[DA-D21-R01]	In sum, from the Article 29 WP's comments on ICANN's procedures for handling WHOIS conflicts with		1	DB	n
	privacy law (and related correspondence), we could draw out the following possible requirement: Data				
	should be accurate. Specifically, Article 29 expresses "support for earlier proposals concerning accuracy				
	of the data (which is also one of the principles of the Data Protection Directive) published in WHOIS				
	directories"				
[DA-D22-R01]	In sum, from the Article 29 WP's Opinion 2/2003, we could draw out the following possible requirement:		1	DB	n
	Data should be accurate. Specifically, the WP states "its support for the proposals concerning accuracy of				
	the data (which is also one of the principles of the European Data Protection Directive)"				
[DA-D25-R01]	Council of Europe's Treaty 108 on Data Protections enshrines the individual's right to know that		1	IA	at
	information is stored on him or her and, if necessary, to have it corrected.				
[DA-D26-R01]	According to the <u>Directive (38)</u> , whereas, if the processing of data is to be fair, the data subject must be		1	IA	at
	in a position to learn of the existence of a processing operation and, where data are collected from him,				
	must be given accurate and full information, bearing in mind the circumstances of the collection;				
[DA-D26-R02]	According to the <u>Directive (41)</u> , whereas any person must be able to exercise the right of access to data	Same as [UP-D26-R10] [GA-	1	EA	е
	relating to him which are being processed, in order to verify in particular the accuracy of the data and the	D26-R03]			
	lawfulness of the processing; whereas, for the same reasons, every data subject must also have the right				
	to know the logic involved in the automatic processing of data concerning him, at least in the case of the				
	automated decisions referred to in Article 15 (1); whereas this right must not adversely affect trade				
	secrets or intellectual property and in particular the copyright protecting the software; whereas these				
	considerations must not, however, result in the data subject being refused all information;				
[DA-D30-R01]	The Data Integrity and Purpose Limitation principle (Annex II, II.5) also states: "To the extent necessary	Depends on Definition of	1	DB	n
	for those purposes, an organisation must take reasonable steps to ensure that personal data is reliable	personal data such as [DE-			
	for its intended use, accurate, complete and current". The WP29 notes that this is exactly the same	D26-R09]			
	wording as used in the Safe Harbour arrangement. The WP29 doubts that the wording "to the extent				
	necessary to these purposes" should be included, since the accuracy of the data in its view should not				
	depend on the purpose of the processing. The WP29 would prefer if this connection is not made in the				
	final adequacy decision.pg24				
[DA-D32-R06]	Updated Ownership, Contact and Use Information. At any time there is a change in ownership, the	Should this be duplicated as	1	DB	f,

	domain name owner must submit the following information:	[DE-D32-R05]?			n
	Up-to-date contact and ownership information; and				1
	A description of how the owner is using the domain name, or, if the domain name is not in use, a				1
	statement to that effect. (may also apply to Data Elements charter question)				
[DA-D41-R01]	RFC 7481, Section 3.6, Data Integrity, specifies that "If the policy of the server operator requires message	Should this be duplicated as	3	G	х
	integrity for client-server data exchanges, HTTP over TLS MUST be used to protect those exchanges." This	[PR-D41-R02]			1
	provides a possible requirement: A registration directory service must be able to provide message				1
	integrity for client-server data exchanges using HTTP over TLS. (May also be related to Privacy)				
[DA-D45-R01]	Incentives for registrants to input accurate gTLD registration data must be provided. These may include:	Precedes [DA-D45-R02 to	1	DB	n,
	[as detailed by [DA-D45-R02 to R06]	R06]			S
[DA-D45-R02]	* [Accuracy incentives may include] building a 'gate' between private data and the public. "Make it	Supports [DA-D45-R01],	1	DA,	f,
	harder for criminals to access sensitive data by putting all sensitive data behind a series of 'gates' which	Depends on Definition of		AB	S
	are only accessible to authenticated users with permissible purposes. Registrants [should be] able to	personal data such as [DE-			1
	control their own personal data [and] determine which data they want behind each gate and which data	D26-R09]			1
	can be publicly displayed to anonymous requestors."				
[DA-D45-R03]	* [Accuracy incentives may include] Making contact data updates easier and more automatic. "Updating	Supports [DA-D45-R01]	1	DA,	f,
	contacts [should be] greatly simplified [by] allowing contact holders to easily update their data and such			DB	n
	updates to be automatically applied to every affected domain own by the registrant."				
[DA-D45-R04]	* [Accuracy incentives may include] Mechanisms to detect invalid gTLD registration data must be	Supports [DA-D45-R01]	1	DB	n
	provided. These may include:				
[DA-D45-R05]	* [Accuracy incentives may include] Validators [to] validate the contact data and give an unique contact	Supports [DA-D45-R01]	1	DB	n
	ID to contact data which registries or registrars can use obtain [validated] data. "Validators would				1
	specialize in collecting, validating, and storing contact data (postal address, email address, phone, fax,				1
	SMS numbers, etc.) which shall be made available by the [gTLD registration directory service] only to				1
	authorized requestors."				
[DA-D45-R06]	* [Accuracy incentives may include] Official proof validation [should be] optional to registrants. "The	Supports [DA-D45-R01]	2	DB	n
	EWG did not propose that identity validation be required, or that contacts be forced to show government				1
	IDs or any other proof of identity when creating a contact. In fact, [the EWG's] final report supports use				1
	of contacts created by accredited privacy and proxy services, so that registrants would still have the				1
	option of not entering their own contact data, instead designating a third party willing to serve as a				1
	contact for that domain name."				L
[DA-D49-R01]	According to the Los Angeles GAC Communiqué of October 16, 2014, the ICANN board should provide		2,	BB	ac
	the GAC with a comprehensive scorecard indicating steps and timelines regarding all streams of work		3		İ
	related to the WHOIS accuracy safeguard. (Page 4)				<u> </u>
[DA-D49-R02]	The ICANN board should complete the Pilot study on WHOIS accuracy, including assessment of identity		2,	BB	ac
	validation, and share the findings in a timely manner for review. (Page 4)		3		

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[DA-D49-R03]	The ICANN board should initiate steps toward Phase 3 (identity verification) of WHOIS, including		3	BB,	ac
	undertaking a cost-benefit analysis of implementation options. (Page 4)			KA	,
					ag
[DA-D49-R04]	The ICANN board should commit to defining the process to address and resolve inaccurate WHOIS		3	DB	n
	records and respond to non-compliance reports. (Page 4)				
[DA-D50-R01]	According to the Singapore GAC Communiqué of February 11, 2015, requiring Registries to verify and		1	DB,	n,
	validate the credentials of registrants for domain names in regulated and highly regulated industries			J	0
	should not pose cross-jurisdictional challenges for Registries and Registrars. (Page 4)				
[DA-D50-R02]	The affirmative requirement for verification of credentials at the time of registration goes much further		1	DB	aa
	to meeting the goal of mitigating consumer harm and fraud than an after-the-fact complaint system.				
	(Page 4)				
[DA-D51-R01]	According to the Marrakech GAC Communiqué of March 9, 2016, customer data should be validated in		1	DB	aa
	compliance with the RAA Cross-Validation requirement, pursuant to RAA WHOIS ACCURACY PROGRAM				
	SPECIFICATION, paragraph 1 "Registrar will, with respect to both WHOIS information and the				
	corresponding customer account holder contact information related to such Registered Name" validate				
	the information provided. (Page 10)				
[DA-D52-R01]	In the London GAC Communiqué of June 25, 2014, GAC advises the ICANN board to address 1) the		1	DB,	n,
	process for verification of WHOIS information; 2) the proactive verification of credentials for registrants			DA	af
	of domain names in regulated and highly regulated industries (the relevant Category 1 strings, where				
	Category 1 refers to consumer protection, sensitive strings and regulated markets.); 3) the proactive				
	security checks by registries; 4) the Public Interest Commitments Dispute Resolution Process (PICDRP),				
	which is not defined as to length of procedure or outcome; and 5) discrimination in restricted TLDs.				
[DA-D53-R01]	In the Singapore GAC Communiqué of March 27, 2014, GAC requests clarification from the New gTLD		1	DB,	af,
	Program Committee (NGPC) on a number of implementation issues. These relate to the implications of			DA	n,
	changes in WHOIS verification and checks for the accuracy of WHOIS generally and for law enforcement				q,
	and end users; security checks to detect risks of harm (eg phishing, malware, botnets etc); compliant				aa
	mechanisms; verification and validation of Category 1 (consumer protection, sensitive strings and				
	regulated markets) registrants' credentials and the lack of binding nature of the public interest				
	commitments; operation of the Public Interest Commitment Dispute Resolution Procedure; and Category				
	2 restricted registration policies. (Page 3-4)				
[DA-D53-R02]	Safeguard 1: Should ICANN perform "periodic sampling" of WHOIS data across registries in an effort to		1	DB	n,
	identify potentially inaccurate records? (Page 9)				ad
[DA-D53-R03]	Safeguard 3: Should Registry Operators undertake periodic security checks to analyze whether domains	Relevance to RDS?	?	?	?
	in its gTLD are being used for threats to security, such as pharming, phishing, malware and botnets?				
	(Page 10)				
[DA-D53-R04]	Safeguard 5: What Compliant Mechanisms should be developed to ensure that Registry Operators		2	L	Z

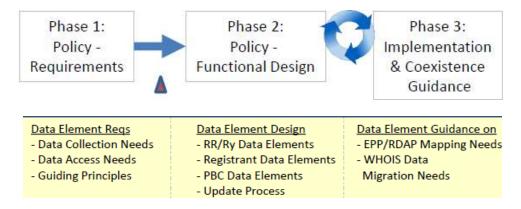

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	provide a means by which complaints can be submitted related to: WHOIS data inaccuracy, trademark or				
	copyright infringement, counterfeiting, fraudulent or deceptive practices, the use of malware, botnets,				
	phishing, piracy, or other unlawful activities. (Page 10)				
[DA-D54-R01]	According to SAC051, the ICANN community should develop a uniform and standard framework for		1	AB,	s,
	accessing registration data that would provide mechanisms to define and implement a range of			DB	t,
	verification methods.				u,
					n
[DA-D57-R01]	According to GAC Comments on "New gTLD Program Safeguards Against DNS Abuse," [there should be]		1	DB	n
	data accuracy specifications, including cross field address validation.				
[DA-D57-R02]	There should be Requirements to measure the effectiveness of data accuracy specifications.		1	DB	n
[DA-D58-R01]	According to the GAC Public Safety Working Group (PSWG) Public Comments to "2013 RAA WHOIS		1	DB	n
	Accuracy Specification Review," the current 2013 RAA WHOIS Specification is serving its intended				
	purpose and its requirements should be maintained.				
[DA-D58-R02]	If there are greater efficiencies or other methods that can be used to reach the goal of accurate WHOIS,		2	DB	n
	the GAC PSWG supports those efforts.				
[DA-D58-R03]	Need verification and validation of relevant registrant / [RDS] data before registration.		1	DB,	aa
				DA	,
					af
[DA-D61-R01]	According to Carlton Samuels' blog on building a better WHOIS for individual registrants, Registrants		1	DA	f
	[should be] responsible for relevant personal/organisation data only and not the contact information of				
	associated organisations such as ISPs, web hosting firms, or registrars. "Registrants and their designated				
	contacts can enter and update their data more easily."				
[DA-D61-R02]	[There should be] increased data accuracy by validating contact upon registration and offering additional		1	DA	af
	identity validation to deter identity fraud by "performing basic validation of contact data[and]				
	optional identity validation."				
[DA-D61-R03]	[There should be] Data minimization in collection and accessibility. "Make public the bare minimum		1	AB	t
	dataset: domain name details, contact IDs for the registrant and designated contacts, and registrant's				
	own e-mail address. by default, all other contact data would be gatedRegistrants and contacts can				
	choose to make more data public but would not be required to do so."				<u> </u>
[DA-D62-R01]	The WG should consider whether a domain registration must require verification that there is a real		1	DA	af
	person behind the domain name registration				
[DA-D62-R02]	For any registered domain, there should be a valid admin and technical contact and this information		2	DA	af
	should be public, with "as of" date (as minimum)				<u> </u>

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of *possible* requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Data Elements (DE)

The following *possible* requirements address the charter question on Data Elements (DE): What data should be collected, stored, and disclosed?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any *prerequisites* or dependencies contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet **Phase 1** policy requirements should be considered in **Phase 2**, while implementation or coexistence guidance for Phase 2 policies should be considered in **Phase 3**. In addition, an initial attempt has been made to *group similar requirements* by code (C) and keyword (K), allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K

	annexes, electronically to the Respondent, it has to employ reasonably available means calculated to	also [DE-D16-R0x], Depends		IC	aq
	achieve actual notice to the Respondent. Achieving actual notice, or employing the following measures to	on standard data elements			
	do so, shall discharge this responsibility: (i) sending [Written Notice] of the complaint to all postal mail	such as those defined by [DE-			
	and facsimile addresses shown in the domain name's registration data in [Registrar's Whois database] for	D06-R08]			
	the registered domain name holder, the technical contact, and the administrative contact and supplied by				
	Registrar to the Provider for the registration's billing contact; and (ii) sending the complaint, including any				
	annexes, in electronic form by email to the [email addresses] for those technical, administrative, and				
	billing contacts;" (Rules for Uniform Domain Name Dispute Resolution Policy, Paragraph 2) UDRP Service				
	Providers therefore require these WHOIS details for service of notice.				
[DE-D15-R03]	According to ICANN's UDRP, in a UDRP Complaint, "the Complainant [needs] to provide the name of the	Related to [UP-D01-R12], See	2	CA,	j,
	Respondent (domain name holder) and all information (including any postal and email addresses and	also [DE-D16-R0x], Depends		IC	aq
	telephone and telefax numbers) known to Complainant regarding how to contact Respondent or any	on standard data elements			
	representative of Respondent and Identify the Registrar with whom the Domain is registered at the time	such as those defined by [DE-			
	of the Complaint." (Rules for Uniform Domain Name Dispute Resolution Policy, Paragraph 3) The	D06-R08]			
	Complainant is required to provide contact information (i.e., Name, Address, Email, Telephone, Telefax				
	and Domain Registrar) as a part of the UDRP Complaint and the most important source to know such				
	information is WHOIS of a Domain Name, as the Respondent (i.e., owner of a disputed domain name)				
[25 246 204]	may be from any part of the world.	2 1 1 1 1 1 1 2 2 2 2 2 2 2 2 2 2 2 2 2			<u> </u>
[DE-D16-R01]	ICANN's URS policy requires registrant information taken from [gTLD registration directory services] for	Related to [UP-D01-R12], See	2	CA,	j,
	the disputed domain name. Specifically, "the contents of Complaint under URS, [should] contain: (i) Name	also [DE-D15-R0x], Depends		IC	aq
	of Registrant (i.e. relevant information available from WHOIS) and WHOIS listed available contact	on standard data elements			
	information for the relevant domain name(s). (URS Procedure Para 1.2.3) and (ii) The specific domain	such as those defined by [DE-			

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	name(s) that are the subject of the Complaint. For each domain name, the Complainant [shall include] a copy of the currently available WHOIS information." (URS Procedure Para 1.2.4)	D06-R08]			
[DE-D16-R02]	ICANN's URS policy paragraph 4 provides for service of Notice by the URS Provider to the Domain Registrant, through email, fax and postal mail obtained from WHOIS. Specifically, "after the Notice of Lock from the Registry Operator, within 24 hours, the URS Provider [shall] notify the Registrant of the Complaint, sending a hard copy of the Notice of Complaint to the addresses listed in the WHOIS contact information." (URS Policy Para 4.2) "The said Notice of Complaint to the Registrant [shall] be sent through email, fax (where available) and postal mail. The Complaint and accompanying exhibits, if any, shall be served electronically." (URS Procedure Para 4.3)	Related to [UP-D01-R12], See also [DE-D15-R0x], Depends on standard data elements such as those defined by [DE- D06-R08]	2	IC	aq
[DE-D16-R03]	According to ICANN's URS policy, when the Domain Registrant does not respond within 14 days period, it is considered as Default and the URS Provider will notify the Registry Operator accordingly. Specifically, "in case of Default, the URS Provider [shall] provide Notice of Default via email to the Complainant and Registrant, and via mail and fax to Registrant. During the Default period, the Registrant will be prohibited from changing content found on the site to argue that it is now a legitimate use and will also be prohibited from changing the WHOIS information." (URS Procedure Para 6.2)	Related to [UP-D01-R12], See also [DE-D15-R0x], Depends on standard data elements such as those defined by [DE- D06-R08]	2	IC	aq
[DE-D16-R04]	According to ICANN's URS policy, "after URS Determination, the Registry Operator shall suspend the domain name The WHOIS for the domain name shall continue to display all of the information of the original Registrant except for the redirection of the name servers. In addition, the Registry Operator [shall cause] the WHOIS to reflect that the domain name will not be able to be transferred, deleted or modified for the life of the registration." (URS Procedure Para 10.2) This restricts Domain Status and [the display of data through gTLD registration directory services] to reflect the above data elements. Data for this purpose could be made available through a gated [gTLD registration directory service] to the Registry Operator.	Related to [UP-D01-R12], See also [DE-D15-R0x], Depends on standard data elements such as those defined by [DE- D06-R08]	2	IC	aq
[DE-D16-R05]	According to ICANN's URS rules, "Mutual Jurisdiction has been defined to mean a court jurisdiction at the location of [either] (a) the principal office of the Registrar or (b) the domain name holder's address as shown for the registration of the domain name in Registrar's WHOIS database at the time the complaint is submitted to the Provider." (URS Rules, Para 1 Definitions) The location of the Domain Holder [obtained from gTLD registration directory services] is required to determine one of the Mutual Jurisdictions.	Related to [UP-D01-R12], See also [DE-D15-R0x], Depends on standard data elements such as those defined by [DE-D06-R08]	1	IC	aq
[DE-D16-R06]	According to ICANN's URS rules, "The Notice of Complaint to be sent to all email, postal mail and facsimile addresses shown in the domain name's registration data in the WHOIS database for the registered domain name holder, the technical contact, and the administrative contact, as well as to any email addresses for the Respondent provided by the Complainant." (URS Rules, Para 2 (i)) Service of notice upon the Domain Holder requires Email, Postal mail and Facsimile Addresses as shown in [gTLD registration directory services] Registrant, Technical and Administrative contacts.	Related to [UP-D01-R12], See also [DE-D15-R0x], Depends on standard data elements such as those defined by [DE- D06-R08]	1	IC	aq
[DE-D16-R07]	According to ICANN's URS rules, "The Complaint, including any annexes [shall] provide the name of the Respondent and all other relevant contact information [from] the WHOIS record as well as all information	Related to [UP-D01-R12], See also [DE-D15-R0x], Depends	1	CA, IC	j, aq

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	known to Complainant regarding URS Rules, Para 3 (b)(iii)." This requires the Complaint to include	on standard data elements			
	registrant information taken from WHOIS for the disputed domain name.	such as those defined by [DE-			
		D06-R08]			
[DE-D16-R08]	According to ICANN's URS rules, "The Notice of Complaint to the Respondent [shall] be transmitted in	Related to [UP-D01-R12], See	1	CA,	j,
	English and shall be translated by the Provider into the predominant language used in the registrant's	also [DE-D15-R0x], Depends		IC	aq
	country or territory, as determined by the country(ies) listed in the WHOIS record when the Complaint is	on standard data elements			
	filed." (URS Rules, Para 4(b)). Service of Notice by the URS Provider to the Domain Registrant therefore	such as those defined by [DE-			
	requires WHOIS to determine the country of the Registrant.	D06-R08]			
[DE-D16-R09]	According to ICANN's URS rules, when the Domain Registrant does not respond within 14 days period, it is	Related to [UP-D01-R12], See	2	IC	aq
	considered as Default under the URS Policy and the URS Provider will notify the Registry Operator	also [DE-D15-R0x], Depends			
	accordingly. Specifically, "In case of Default by Registrant, the Provider shall notify the Registry Operator	on standard data elements			
	that the Registrant is prohibited from changing content found on the site and that the Registrant is	such as those defined by [DE-			
	prohibited from changing the WHOIS information." (URS Rules, Para 12)	D06-R08]

	period of time for [gTLD registration] data retention passed the contract period that is consistent with				
	applicable law.				
[DE-D21-R01]	In sum, from the Article 29 WP's comments on ICANN's procedures for handling WHOIS conflicts with	Depends on Privacy PR(s) on	1	IA,	d,
	privacy law (and related correspondence), we could draw out the following possible requirement: There	Legal Persons, Natural		EC	ab
	should be a differentiation for data collection/use between legal and natural persons when registering	Persons, and on Definition of			

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	domain names. There should be a differentiation for data collection/use between legal and natural persons when registering domain names.	personal data such as [DE- D26-R09]			
[DE-D22-R01]	In sum, from the Article 29 WP's Opinion 2/2003, we could draw out the following possible requirement: Data collected should be relevant (and not excessive) for defined purpose. Specifically, the WP states: " data should be relevant and not excessive for the specific purpose" and " the processing of personal data in reverse directories or multi-criteria searching services without unambiguous and informed consent by the individual is unfair and unlawful."	Depends on Definition of personal data such as [DE-D26-R09]	1	EA	r
[DE-D26-R01]	According to the <u>Directive (12)</u> , whereas the protection principles must apply to all processing of personal data by any person whose activities are governed by Community law; whereas there should be excluded the processing of data carried out by a natural person in the exercise of activities which are exclusively personal or domestic, such as correspondence and the holding of records of addresses;	Same as [PR-D26-R03], Depends on Privacy PR(s) on Natural Persons, Definition of personal data such as [DE- D26-R09]	1	EA, EC, H	m, ab , as
[DE-D26-R02]	According to the Directive (13), whereas the processing of personal data that is necessary to safeguard the economic well-being of the State does not fall within the scope of this Directive where such processing relates to State security matters	Depends on Definition of personal data such as [DE-D26-R09], Definition of State Security matters	1	Н	as
[DE-D26-R03]	According to the <u>Directive (14)</u> , whereas, given the importance of the developments under way, in the framework of the information society, of the techniques used to capture, transmit, manipulate, record, store or communicate sound and image data relating to natural persons, this Directive should be applicable to processing involving such data;	Depends on Privacy PR(s) on Natural Persons, Definition of personal data such as [DE- D26-R09]	1	H, EA	as, m
[DE-D26-R04]	According to the <u>Directive (15)</u> , whereas the processing of such data is covered by this Directive only if it is automated or if the data processed are contained or are intended to be contained in a filing system structured according to specific criteria relating to individuals, so as to permit easy access to the personal data in question;	Depends on Definition of personal data such as [DE-D26-R09]	1	H, EA	as, m
[DE-D26-R05]	According to the <u>Directive (2</u> 8), whereas any processing of personal data must be lawful and fair to the individuals concerned; whereas, in particular, the data must be adequate, relevant and not excessive in relation to the purposes for which they are processed; whereas such purposes must be explicit and legitimate and must be determined at the time of collection of the data; whereas the purposes of processing further to collection shall not be incompatible with the purposes as they were originally specified;	Same as [UP-D26-R04], Depends on Permissible Purposes, Original Purpose, Definition of personal data such as [DE-D26-R09]	1	A, IA	a, d
[DE-D26-R06]	According to the Directive (33), whereas data which are capable by their nature of infringing fundamental freedoms or privacy should not be processed unless the data subject gives his explicit consent; whereas, however, derogations from this prohibition must be explicitly provided for in respect of specific needs, in particular where the processing of these data is carried out for certain health-related purposes by persons subject to a legal obligation of professional secrecy or in the course of legitimate activities by certain associations or foundations the purpose of which is to permit the exercise of fundamental freedoms;	Same as [UP-D26-R08] [PR-D26-R06], Depends on Privacy PR(s) for Consent, Depends on referenced Permissible Purposes	1	IA	d

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[DE-D26-R07]	According to the <u>Directive (47)</u> , whereas where a message containing personal data is transmitted by means of a telecommunications or electronic mail service, the sole purpose of which is the transmission of such messages, the controller in respect of the personal data contained in the message will normally be considered to be the person from whom the message originates, rather than the person offering the transmission services; whereas, nevertheless, those offering such services will normally be considered controllers in respect of the processing of the additional personal data necessary for the operation of the service;	Depends on Definition of personal data such as [DE-D26-R09], Obligations of Data Controllers [DE-D29-R01]	1	EA	m
[DE-D26-R08]	According to the <u>Directive</u> (57), whereas, on the other hand, the transfer of personal data to a third country which does not ensure an adequate level of protection must be prohibited; According to the <u>Directive</u> (58) Whereas provisions should be made for exemptions from this prohibition in certain circumstances where the data subject has given his consent, where the transfer is necessary in relation to a contract or a legal claim, where protection of an important public interest so requires, for example in cases of international transfers of data between tax or customs administrations or between services competent for social security matters, or where the transfer is made from a register established by law and intended for consultation by the public or persons having a legitimate interest; whereas in this case such a transfer should not involve the entirety of the data or entire categories of the data contained in the register and, when the register is intended for consultation by persons having a legitimate interest, the transfer should be made only at the request of those persons or if they are to be the recipients;	Same as [GA-D26-R05 to R06], Depends on Definition of personal data such as [DE- D26-R09], Privacy PR(s) for Consent	1	EA	m
[DE-D26-R09]	As used in the <u>Directive</u> , (a) 'personal data' shall mean any information relating to an identified or identifiable natural person ('data subject'); an identifiable person is one who can be identified, directly or indirectly, in particular by reference to an identification number or to one or more factors specific to his physical, physiological, mental, economic, cultural or social identity;	Supports several other [DE-] PRs that depend on Definition of personal data	1	DA	f
[DE-D26-R10]	According to the <u>Directive</u> , Member States shall prohibit the processing of personal data revealing racial or ethnic origin, political opinions, religious or philosophical beliefs, trade-union membership, and the processing of data concerning health or sex life. [This requirement] shall not apply where:(a) the data subject has given his explicit consent to the processing of those data, except where the laws of the Member State provide that the prohibition referred to [above] may not be lifted by the data subject's giving his consent;	Depends on National Laws, Definition of personal data such as [DE-D26-R09], Privacy PR(s) for Consent	1	EA	m
[DE-D26-R11]	According to the <u>Directive</u> , processing is carried out in the course of its legitimate activities with appropriate guarantees by a foundation, association or any other non-profit-seeking body with a political, philosophical, religious or trade-union aim and on condition that: • the processing relates solely to the members of the body or to persons who have regular contact with it in connection with its purposes and that the data are not disclosed to a third party without the consent of the data subjects; or • the processing relates to data which are manifestly made public by the data subject or is	Depends on Legitimate Activities, Privacy PR(s) for Consent	1	EA	m

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	necessary for the establishment, exercise or defence of legal claims.				
[DE-D26-R12]	According to the <u>Directive</u> Article 10, Member States shall provide that the controller or his representative must provide a data subject from whom data relating to himself are collected with at least	Related to [PR-D31-R05 to R06], Depends on Privacy	1	H, EA,	as, m,
	the following information, except where he already has it:	PR(s) for Collection,		IA,	''',
	(a) the identity of the controller and of his representative, if any;	Permissible Purposes		",	"
	(b) the purposes of the processing for which the data are intended;	. cgeses			
	(c) any further information such as				
	the recipients or categories of recipients,				
	 whether replies to the questions are obligatory or voluntary, 				
	as well as the possible consequences of failure to reply,				
	• the existence of the right of access to and the right to rectify the data concerning him in so far as				
	such further information is necessary, having regard to the specific circumstances in which the				
	data are collected, to guarantee fair processing in respect of the data subject.				
[DE-D29-R01]	Each <u>data controller</u> must respect the following rules as set out in the <u>Directive</u> :	Precedes [DE-D29-R02 to	1	IA	d
[25 222 222]		R04]			<u>.</u>
[DE-D29-R02]	* Personal Data must be processed legally and fairly;	Supports [DE-D29-R01],	1	IA,	d,
[DE D30 D03]	*[Daysons] Date] asset he collected for equivalent and logitimate asset asset and conditions.	Similar to [GA-D29-R01]	1	EA	d,
[DE-D29-R03]	* [Personal Data] must be collected for explicit and legitimate purposes and used accordingly;	Supports [DE-D29-R01], Similar to [UP-D23-R01]	1	IA,	
[DE-D29-R04]	* [Personal Data] must be adequate, relevant and not excessive in relation to the purposes for which it is	Supports [DE-D29-R01],	1	A EA	a r
[DE-D29-R04]	collected and/or further processed.	Similar to [UP-D23-R01]		LA	'
[DE-D30-R01]	The WP29 has already explained the way it applied the core EU data protection principles to transfers of	Same as [UP-D30-R03] [PR-	1	EA	m
[52 530 1101]	personal data to third countries in its Working Document 12 'Transfers of personal data to third countries:	D30-R06] [CM-D30-R04],	_		'''
	Applying Articles 25 and 26 of the EU data protection directive'. The WP29 tried to find the equivalent	Depends on Definition of			
	safeguards which ensure a level of protection equivalent to the principles guaranteed in the Directive,	personal data such as [DE-			
	notably regarding purpose limitation, data quality and proportionality, transparency, security, rights of	D26-R09], EU Data Protection			
	access, rectification and opposition, data retention and restrictions on onward transfers. pg. 11	Directive [D29]			
[DE-D30-R02]	Proportionality: The Privacy Shield (Annex II, II.5.a) states that the information must be limited to what is	Depends on Privacy Shield	1	EA	r
	relevant for the processing. The WP29 would prefer if this wording is amended in the final adequacy				
	decision, since the mere fact that the data shall be relevant to the processing is not sufficient to make the				
	processing proportionate. In order to meet the proportionality principle, the processing should be limited				
	to the data that are necessary for the processing at stake.				
[DE-D30-R03]	WP29 stresses that any interference with the fundamental rights to private life and data protection need	Same as [UP-D30-R04] [GA-	1	IA	d
	to be justifiable in a democratic society. The CJEU criticised the fact that the Safe Harbour decision did not	D30-R02] [GA-D30-R03] [DE-			
	contain any finding regarding the existence, in the United States, of rules adopted by the State intended	D30-R03] [PR-D30-R07] [CX-			
	to limit any interference. Nor does it refer to the existence of effective legal protection against	D30-R02] [SM-D30-R02] [RI-			

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	interference of that kind.pg 11	D30-R03]			
[DE-D30-R04]	Scope of application of the EU data protection framework and, in particular, of the Directive 95/46/EC principles: The WP29 recalls that under the EU data protection legal framework, and in particular under	Same as [UP-D30-R10] [CM- D30-R06] [SM-D30-R04],	1	EC	ab
	the Directive (Article 4(1)), Member States laws apply not only to the processing operations carried out by	Depends on Definition of			
	data controllers established on their territory, but also where data controllers (although not established	personal data such as [DE-			
	in the EU), make use of equipment situated on EU territory, in particular for the collection of personal	D26-R09], EU Directive			
	data. As a consequence, EU Member State law applies to any processing that takes place prior to the	(Article 4(1))			
	transfer to the U.S., either in the context of activities of an organisation established in the EU or through				
	the use of equipment situated in the EU used by an organisation not established in the EU. pg. 12				
[DE-D30-R05]	Privacy Shield documents make use of terminology that is not consistent with the vocabulary generally	Depends on Privacy Shield,	1	AB	u
	used in the EU when dealing with data protection. This is not necessarily a problem, as long as it is clear	National Laws			
	what the corresponding terminology under EU law (and under U.S. law) would be. The WP29 regrets to				
	note however this is not the case, including in the draft adequacy decision. For example, the word 'access'				
	is used in chapter 3 of the draft adequacy decision in a sense that implies the collection of personal data,				
	instead of allowing someone to see data that is already collected. Access by companies to the data and				
	the individuals' right of access are two separate notions that should not be confused. pg. 13				
[DE-D30-R06]	The WP29 would like to recall that any processing (including collection and transfer) of sensitive data	Depends on Privacy Shield	1	EA	m
	subject to EU law has to be made on legitimate grounds according to article 8 of the Directive. The Privacy				
	Shield cannot be interpreted as offering alternative grounds for such processing pg. 14				
[DE-D30-R07]	Important new notions like the right to data portability and additional obligations on data controllers,	What is the possible	n/	EA	m
	including the need to carry out data protection impact assessments and to comply with the principles of	requirement on RDS?	а		
	privacy by design and privacy by default, have not been included in the Privacy Shield. The WP29 would				
	therefore like to suggest that the Privacy Shield, as with any existing adequacy decisions, is reviewed				
	shortly after the GDPR enters into application pg. 15				
[DE-D30-R08]	The individual must receive both confirmation that data are being processed regarding him and	None	1	EA	m
	communication of the data processed. pg15				
[DE-D30-R09]	The Data Retention Limitation principle (Article 6(1)e of the Directive) is a fundamental principle in EU	Same as [UP-D30-R13],	1	IA	d
	data protection law imposing that personal data must only be kept as long as necessary to achieve the	Depends on Permissible			
	purpose for which the data have been collected or for which they are further processed. pg17	Purposes, Definition of			
		personal data such as [DE-			
		D26-R09], Privacy PR(s) for			
(Retention			
[DE-D30-R10]	2.2.9 Publicly available information states: The exception to the right of access in the case of publicly	Related to [UP-D26-R10],	1	IA	at
	available information and public record information (Annex II, III.15.d and e) raises concerns to the extent	Depends on Access PR(s) for			
	that an individual, when exercising his/her right of access, is interested to know whether a particular	Public Access			
	controller processes data about himself/herself, and also to know what data is being processed, in order				L

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	to be able to control the processing of his/her data. The WP29 has repeatedly stated that according to EU law data subjects always have the right to access their data, and, where necessary, to require rectification				
	or erasure of the data if the data have not been processed lawfully or if they are incomplete or				
	inaccurate, regardless of whether or not the personal data have been published. If the individual's				
	request for access is rejected on the grounds that the data were obtained from publicly available sources				
	or public records, the individual would lose the ability to control the accuracy of the data and to control				
	whether the data were lawfully made public in the first place.pg.38				
[DE-D30-R11]	According to the settled case-law of the CJEU, the principle of proportionality requires that the legislative	Same as [UP-D30-R24] [GA-	1,	DA	r
	measures proposing interferences with the rights to private life and to the protection of personal data "be	D30-R09] [PR-D30-R15],	2		
	appropriate for attaining the legitimate objectives pursued by the legislation at issue and do not exceed	Depends on Definition of

	email submissions.				
[DE-D56-R11]	* Registrars should provide complainants with a well-defined, auditable way to track abuse complaints	Supports [DE-D56-R06]	2	DA	ah
	(e.g. a ticketing or similar tracking system).				
[DE-D56-R12]	ICANN should require Registrars to have a Service Level Agreement for their Port 43 servers	Depends on Access PR(s) for		DA	
		Port 43 Access			ah
[DE-D56-R13]	Registrars and all associated third-party beneficiaries to Registrars are required to collect and securely		2	F	aj
	maintain the following data:				
	* Source IP address				
	* HTTP Request Headers: From, Accept, Accept-Encoding, Accept-Language, User-Agent, Referrer,				1
	Authorization, Charge-To , If-Modified-Since				
	* Collect and store the following data from registrants: First Name, Last Name, E-mail Address, Alternate				
	E-mail address, Company Name, Position, Address 1, Address 2, City, Country				
	State, Enter State, Zip, Phone Number, Additional Phone, Fax, Alternative Contact First Name, Alternative				
	Contact Last Name, Alternative Contact E-mail, Alternative Contact Phone				
	* Collect data on all additional add-on services purchased during the registration process.				
	* All financial transactions, including, but not limited to credit card, payment information.				
[DE-D62-R01]	There should be an ability to consult the history of a registration		1	J	0
[DE-D62-R02]	A key issue is translation or transliteration of registration data - including provision of contact data and		1	F	У
	address in local languages				
[DE-D62-R03]	Instead of adding to the list of RDS data elements, we should subtract things in the spirit of minimization -		1	Н	as
	for example, removing the address from RDS to reduce risk to individual registrants such as journalists,				
	bloggers, and many civil society organizations				
[DE-D63-R01]	According to Outreach #2 Responses from the RySG, Location of data storage should be identified and		1	IA,	d,
	published to affected parties (Registries/Registrars). (consider reclassifying this as SM)			D	ax

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of *possible* requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Privacy (PR)

The following *possible* requirements address the charter question on Privacy (PR): What steps are needed to protect data and privacy?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any **prerequisites or dependencies** contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet **Phase 1** policy requirements should be considered in **Phase 2**, while implementation or coexistence guidance for Phase 2 policies should be considered in **Phase 3**. In addition, an initial attempt has been made to **group similar requirements by code (C) and keyword (K)**, allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	К
[PR-D01-R01]	" in some jurisdictions, privacy rights extend to legal persons and to entities with respect to free	Depends on Applicable Laws	1	IA,	d,
	speech and freedom of association." (Next to last paragraph on p.81)			EC	ab
[PR-D01-R02]	As described under Option (2) of the Summary of Data Protection Mechanisms Considered table on p.85	Depends on Standard best	1	IA,	d,
	with further description on p.86, a basic ICANN privacy policy for gTLD registration directory services	Practices		EA	m
	must] be drafted, based on standard best practices for privacy protection, and standard contractual				
	clauses [must] be developed which give effect to this policy throughout the [registration directory				
	services] ecosystem. Standard clauses could be included in all contracts between ICANN and all ecosystem				
	actors engaged in data transfers, ensuring a sufficiently high level of data protection to permit unfettered				
	transfer within this ecosystem.				
[PR-D01-R03]	The gTLD registration directory service must comply with a defined "policy using standard contractual	Depends on Privacy Policy	1	IA,	d,
	clauses that are harmonized with data protection laws to implement the requirements of the policy, and	such as defined in [PR-D01-		EA	m

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	ensure through various audit mechanisms that these privacy protections are enforced through contracts between all ecosystem actors involved in handling personal information." (pp.86-87)	R02]			
[PR-D01-R04]	As described under Options (1) & (2) in the Summary of Data Protection Implementations Considered table on pages 87-88, gTLD registration directory services must protect data elements:	Precedes [PR-D01-R05 to R06], Depends on Data Element PR(s)	1	1	-
[PR-D01-R05]	* Provide for legal compartmentalization by tagging data elements according to the applicable law for the data subject and treating that that data accordingly by applying those law(s) to each specific transfer.	Supports [PR-D01-R04], Depends on Applicable Laws for each Data Element, Privacy PR(s) for Processing/Use	2	EC	ab
[PR-D01-R06]	* Select location(s) for gTLD registration data storage where the applicable national data protection law provides for a high level of protection.	Supports [PR-D01-R04], Related to [DE-D01-R19] [PR- D26-R02] [PR-D01-R06] [PR- D01-R09], Depends on Applicable Laws, System Model PR(s) for Storage	2,	D	ax
[PR-D01-R07]	Mechanisms must be adopted to facilitate routine legally compliant data collection and transfer between actors within the [gTLD registration directory services] ecosystem.	Depends on Privacy PR(s) for Collection such as [PR-D25- R03] and Processing/Use such as [PR-D26-R05]	1	EA	m
[PR-D01-R08]	Standard contract clauses that are harmonized with privacy and data protection laws should be codified in a policy and enforced through contracts between all ecosystem actors involved in handling personal information.	Depends on Standard Contract Clauses such as defined in [PR-D01-R02], Definition of personal data such as [DE-D26-R09], Privacy PR(s) on personal data such as [PR-D01-R12]	2	IA, J	d, ay
[PR-D01-R09]	An information system to apply data protection laws and localization of data storage must be considered as two means of implementing the high level of data protection required. This must be ensured through standard contractual clauses, which flow from a logical privacy policy for the ecosystem.	Depends on Privacy Policy such as [PR-D01-R02] and Storage Policy such as [PR- D01-R06]	2	IA, J	d, ay
[PR-D01-R10]	Summary of Law Enforcement Access Options Considered Option (1) on page 89; "In addition, for option (1), it has to be ensured that the legal framework for national law enforcement in jurisdiction(s) where registration data is stored does not override the framework established for the gTLD registration directory service. The geography of data localisation is therefore critically important."	Related to [DE-D01-R19] [PR-D26-R02] [PR-D01-R06] [PR-D01-R09], Depends on Applicable Laws	1	CC,	q, ax
[PR-D01-R11]	Law Enforcement Access Principle 108: "[gTLD registration data] must [be] stored in jurisdiction(s) where	Variant of [PR-D01-R10]	1	D	a

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	law enforcement is globally trusted, regardless of implementation model." (p.90)				
[PR-D01-R12]	The following overarching legal principles normally found in data protection law must be considered when drafting policies and implementation processes for gTLD registration directory services: See [PR-D01-R13] thru [PR-D01-R20].	Precedes [PR-D01-R13 to R16], Depends on Standard best Practices	1	IA	d
[PR-D01-R13]	* Personal data must be: processed lawfully, fairly and in a transparent manner in relation to the data subject,	Supports [PR-D01-R12], Similar to portions of [UP- D25-R03] [PR-D25-R03]	1	IA, EA	d, m
[PR-D01-R14]	* Personal data must be: collected for specific, explicit and legitimate purposes and not further processed in a way incompatible with those purposes,	Supports [PR-D01-R12], Similar to [UP-D23-R01], Depends on Legitimate Purposes	1	IA, EA	d, m
[PR-D01-R15]	* Personal data must be: adequate, relevant, and limited to the minimum necessary in relation to the purposes for which they are processed	Supports [PR-D01-R12] , Depends on Legitimate Purposes	1	IA, EA	d, r
[PR-D01-R16]	* Personal data must be: accurate and kept up-to-date as required for the specified purposes.	Supports [PR-D01-R12], Depends on Data Accuracy PR(s)	1	IA, DB	d, n
[PR-D01-R17]	Lawful processing, including transfer and disclosure can be – subject to the relevant jurisdiction – based on: consent of the data subject	Related to [PR-D01-R17 to R20], Depends on Relevant Jurisdiction, Privacy PR(s) for Consent	1	IA, EA	d, m, l
[PR-D01-R18]	Lawful processing, including transfer and disclosure can be – subject to the relevant jurisdiction – based on: the necessity for the performance of a contract to which the data subject is party	Related to [PR-D01-R17 to R20], Depends on Relevant Jurisdiction	1	IA, EA, J	d, m, ay
[PR-D01-R19]	Lawful processing, including transfer and disclosure can be – subject to the relevant jurisdiction – based on: the necessity for compliance with a legal obligation to which the controller is subject.	Related to [PR-D01-R17 to R20], Depends on Relevant Jurisdiction, Obligations of Data Controllers [DE-D29-R01]	1	IA, EA, EC	d, m, ab
[PR-D01-R20]	Lawful processing, including transfer and disclosure can be – subject to the relevant jurisdiction – based on: A right of access to information and a right to rectify inaccuracy for the data subject have to be ensured.	Related to [PR-D01-R17 to R20], Depends on Relevant Jurisdiction, Data Accuracy PR(s)	1	IA, EA, EC	d, m, ab
[PR-D01-R21]	In addition to the privacy afforded by compliance with data protection laws, the [gTLD registration directory services] ecosystem must accommodate needs for privacy by including: • An accredited Privacy/Proxy Service for general personal data protection and adherence to local	Depends on policies defined by PPSAI PDP, Related to [PR- D01-R22] [PR-D01-R36]	1	ID	g

	information; and				
	Companies – for upcoming mergers, new product or service names, new movie names, or other				

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	product launches." pp.13-14				
[PR-D12-R01]	The [gTLD registration directory service] should provide additional security measures for data in motion,	Depends on System Model	1	EA	m
	i.e., when data is transferred, downloaded or replicated, especially in large volumes. (sec. 5.5)	PR(s) for Safeguarding Data			
[PR-D13-R01]	The review of ICANN's procedure for handling WHOIS conflicts with privacy law found that requirements	What is the possible	?	?	?
	that remain unchanged from past accreditation agreements were broadly consistent with data privacy	requirement on RDS?			
	and protection expectations and legal requirements in most jurisdictions, and they have underpinned the				
	successful operation of the Internet's shared registration system for at least the past 15 years.				
[PR-D13-R02]	During the negotiation of the 2013 RAA, some registrars expressed concerns that local or national data	Depends on 2013 RAA Data	1	EC	ab
	protection and other privacy laws might make it difficult for them to comply with the new requirements,	Retention Spec and			
	while law enforcement and intellectual property owners advocated for retention of information in the	Applicable Law			
	Data Retention Specification. Accordingly, the 2013 RAA's Data Retention Specification includes a				
	provision concerning waivers to deal with cases where compliance with the data collection and/or				
	retention requirements might be prohibited by applicable law. Indeed, ICANN contracted parties are				
	obligated to abide by any applicable laws.				
[PR-D13-R03]	To initiate the Data Retention Waiver process, registrars must present ICANN with an opinion from a law	Supports [PR-D13-R02],	1,	EC	ab
	firm or a ruling or guidance from a governmental body of competent jurisdiction that states that	Depends on 2013 RAA Data	2		
	collecting or retaining one or more data elements in the manner required by the specification violates	Retention Spec and			
	applicable law. A general assertion that the data collection and Data Retention Specification requirements	Applicable Law			
	are unlawful is not sufficient. Rather, the waiver request must specify the applicable law, the specific				
	allegedly offending data collection and/or retention requirement(s), and the manner in which the				
	collection and/or retention violates the law. This specificity helps ICANN to determine the appropriate				
	limitations on the scope and duration of data collection and retention requirements when granting the				
	waiver. This will also help ICANN balance the interests of the registrar, governments, and the broader				
	Internet community when considering granting such waivers.				
[PR-D13-R04]	The 2013 RAA calls for ICANN and the registrar to discuss data retention waiver requests in good faith in	Depends on 2013 RAA Data	1,	J	0
	an effort to reach a mutually acceptable resolution. The Data Retention Specification contemplates	Retention Spec and	2		
	potential future modifications to the Whois Procedure in section 2: "Until such time as ICANN's Procedure	Applicable Law			
	for Handling Whois Conflicts with Privacy Law is modified to include conflicts relating to the requirements				
	of this Specification and if ICANN agrees with Registrar's determination, ICANN's office of general counsel				
	may temporarily or permanently suspend compliance and enforcement of the affected provisions of the				
	Data Retention Specification and grant the waiver request. Prior to granting any exemption, ICANN will				
	post its determination on its website for a period of thirty (30) calendar days." ICANN contemplates that				
	waivers should be tailored to limit the scope and/or duration of data collection and retention as				
	necessary to comply with local law, but will not completely eliminate all requirements for data collection				
	and retention.				
[PR-D13-R05]	because each country may interpret its data privacy requirements differently, ICANN is working through	Depends on National Laws,	1,	EC	ab

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	each of the submitted requests to change Whois data retention requirements, country-by-country. The complexity and diversity of national privacy laws has resulted in considerable investments of time and resources by ICANN and registrars alike. In countries with data privacy laws applicable to registrars, ICANN has found that restrictions generally permit the retention of registration data, but only for legitimate purposes, and for a period no longer than is necessary for the purposes for which the data were collected or for which they are further processed. What constitutes a legitimate purpose and how long data can be retained are complicated questions, and the answers may vary from one country to the next, even within the EU. All EU member states are subject to the same data privacy directive, but individual member state's legislation implementing the data privacy directive may differ in significant respects.	EU Data Protection Directive [D29]	2		
[PR-D13-R06]	In all, 15 requests to waive the Data Retention Specification in the 2013 RAA have been submitted by registrars, all from within the European Union. The EU's Article 29 Working Party has also written to ICANN to express its concerns about the legality of the requirements of the 2013 RAA within the EU. ICANN has also received correspondence from the European Data Protection Supervisor urging ICANN to waive the retention period under the 2013 RAA Data Retention Specification to all registrars operating in EU member states.	Depends on 2013 RAA Data Retention Requirements	1	EC	ab
[PR-D19-R01]	based on the ICANN Governmental Advisory Committee (GAC) proposed principles, "The GAC recognizes that there are also legitimate concerns about the misuse of WHOIS [registration] data and conflicts with national laws and regulations, in particular applicable privacy and data protection laws" (para 2.2).	Precedes [PR-D19-R02 to R03], Same as [RI-D19-R01]	1	EC, AB	ab , p
[PR-D19-R02]	* "gTLD [registration directory] services must comply with applicable national laws and regulations" (para 3.2)	Supports [PR-D19-R02]	1	EC	ab

		such as [DE-D26-R09]			<u> </u>
[PR-D28-R04]	Data controllers must respect the privacy and data protection rights of those whose personal data is	Same as [UP-D28-R05],	1	DB	m
	entrusted to them. They must:	Depends on Definition of			
	 collect and process personal data only when this is legally permitted; 	personal data such as [DE-			
	 respect certain obligations regarding the processing of personal data; 	D26-R09]			
	 respond to complaints regarding breaches of data protection rules; 				
	collaborate with national data protection supervisory authorities.				
[PR-D30-R01]	The WP29 considers a review must be undertaken shortly after the entry into application of the General	Depends on GDPR, Privacy	1	EC	ab
	Data Protection Regulation, in order to ensure the higher level of data protection offered by the	Shield			
[DD D20 D02]	Regulation is followed in the adequacy decision and its annexes. pg. 3				-
[PR-D30-R02]	The WP29's key objective is to make sure that an essentially equivalent level of protection afforded to	Depends on GDPR, Privacy	1	DB,	m,
[DD D20 D02]	individuals is maintained when personal data is processed. pg. 3	Shield	1	EC	ab
[PR-D30-R03]	Although the WP29 does not expect the Privacy Shield to be a mere and exhaustive copy of the EU legal	Depends on GDPR, Privacy	1	EC	ab

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	framework it considers that it should contain the substance of the fundamental principles and as a result, ensure an 'essentially equivalent' level of protection. pg.3	Shield			
[PR-D30-R04]	because the Privacy Shield will also be used to transfer data outside the US, the WP29 insists that onward transfers from a Privacy Shield entity to third country recipients should provide the same level of protection on all aspects of the Shield (including national security) and should not lead to lower or circumvent EU data protection principles pg. 3	Depends on GDPR, Privacy Shield	1	EC	ab
[PR-D30-R05]	The requirement for a third country to ensure an adequate level of data protection was further defined by the CJEU in SchremsIt also indicated that the wording 'adequate level of protection' must be understood as "requiring the third country in fact to ensure, by reason of its domestic law or its international commitments, a level of protection of fundamental rights and freedoms that is essentially equivalent to that guaranteed within the European Union by virtue of the Directive read in the light of the Charter" pg.10	Same as [UP-D30-R02] [PR- D30-R05] [CM-D30-R03]	1	A, IA	a, d
[PR-D30-R06]	The WP29 has already explained the way it applied the core EU data protection principles to transfers of personal data to third countries in its Working Document 12 'Transfers of personal data to third countries: Applying Articles 25 and 26 of the EU data protection directive'. The WP29 tried to find the equivalent safeguards which ensure a level of protection equivalent to the principles guaranteed in the Directive, notably regarding purpose limitation, data quality and proportionality, transparency, security, rights of access, rectification and opposition, data retention and restrictions on onward transfers. pg. 11	Same as [UP-D30-R03] [DE-D30-R01] [CM-D30-R04], Depends on Definition of personal data such as [DE-D26-R09], EU Data Protection Directive	1	EA	m
[PR-D30-R07]	WP29 stresses that any interference with the fundamental rights to private life and data protection need to be justifiable in a democratic society. The CJEU criticised the fact that the Safe Harbour decision did not contain any finding regarding the existence, in the United States, of rules adopted by the State intended to limit any interference. Nor does it refer to the existence of effective legal protection against interference of that kind.pg 11	Same as [UP-D30-R04] [GA-D30-R02] [GA-D30-R03] [DE-D30-R03] [CX-D30-R02] [SM-D30-R02] [RI-D30-R03]	1	IA	d
[PR-D30-R08]	In order to evaluate if any interference would be justifiable in a democratic society, the assessment was conducted in light of the European jurisprudence on fundamental rights which sets four essential guarantees for intelligence activities as listed in [UP-D30-R05]	Same as [UP-D30-R05] [GA- D30-R04] [SM-D30-R03]	1	IA	d
[PR-D30-R09]	The WP29 would like to recall that any processing (including collection and transfer) of sensitive data subject to EU law has to be made on legitimate grounds according to article 8 of the Directive. The Privacy Shield cannot be interpreted as offering alternative grounds for such processing pg. 14	Depends on Privacy Shield	1	EC	ab
[PR-D30-R10]	Important new notions like the right to data portability and additional obligations on data controllers, including the need to carry out data protection impact assessments and to comply with the principles of privacy by design and privacy by default, have not been included in the Privacy Shield. The WP29 would therefore like to suggest that the Privacy Shield, as with any existing adequacy decisions, is reviewed shortly after the GDPR enters into application. pg. 15	Depends on Privacy Shield	1	EC, EA	ab , m
[PR-D30-R11]	Annex II, I.5. provides, among others, for exemptions from the Principles when data covered by the Privacy Shield is used for reasons of national security, public interest, law enforcement, or following	Same as [UP-D30-R12] [CM- D30-R09]	1	ID	g

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	statute, government regulation or case law which creates conflicting obligations or explicit authorisations. Without full knowledge of U.S. law at both the Federal and at state level, it is difficult for the WP29 to				
	assess the scope of this exemption and to consider whether those limitations are justifiable in a				
	democratic society. It would be essential that the European Commission also includes in its draft				
	adequacy decision an analysis of the level of protection where those exemptions would apply. pg. 17				
[PR-D30-R12]	Moreover, the WP29 emphasises that a general right to object (on compelling grounds relating to the	Same as [UP-D30-R14],	1	EA	m
	data subject's particular situation), being understood as a right to ask to terminate the processing about	Depends on Privacy Shield			
	one's data whenever the individual has compelling legitimate grounds relating to his particular situation,				
	should be offered within the Privacy Shield. The WP29 strongly recommends that the draft adequacy				
	decision makes clear that the right to object should exist at any given moment, and that this objection is				
	not limited to the use of the data for direct marketing. pg. 20				
[PR-D30-R13]	It should be clarified that in any case, the Choice principle cannot be used to circumvent the Purpose	Same as [UP-D30-R15],	1	IA	d
	limitation principle. Choice should be applicable only where the purpose is materially different but still	Depends on Compatible			
	compatible since the processing for incompatible purpose is prohibited (Annex II, II.5.a). It has to be	Purposes, Privacy PR(s) on			
	clarified that the right to opt-out cannot enable the organisation to use data for incompatible purposes.pg	Choice and Limitation of			
	20	Purpose			
[PR-D30-R14]	The WP29 would like to emphasise that aggregated data can still be re-identified and therefore should be	Depends on Definition of	1	С	bb
	regarded as personal data. pg. 36	personal data such as [DE-			
		D26-R09]			
[PR-D30-R15]	According to the settled case-law of the CJEU, the principle of proportionality requires that the legislative	Same as [UP-D30-R24] [GA-	1,	EA	r
	measures proposing interferences with the rights to private life and to the protection of personal data "be	D30-R09] [DE-D30-R11],	2		
	appropriate for attaining the legitimate objectives pursued by the legislation at issue and do not exceed	Depends on Definition of			
	the limits of what is appropriate and necessary in order to achieve those objectives." Therefore, the	personal data such as [DE-

	[Africa Union] Convention, data processing involving national identification number or any other				
	identifier of the same type;				
	Processing of personal data involving biometric data;				
	Processing of personal data of public interest, particularly for historical, statistical or scientific				
	purposes"				
[PR-D31-R07]	Article 13: basic principles governing the processing of personal data, defines:	Supports [PR-D31-R01]	1	EA	m,
	Principle 1: Principle of consent and legitimacy of personal data processing				1
	Principle 2: Principle of lawfulness and fairness of personal data processing				
	Principle 3: Principle of purpose, relevance and storage of processed personal data				
	Principle 4: Principle of accuracy of personal data				
	Principle 5: Principle of transparency of personal data processing				
	Principle 6: Principle of confidentiality and security of personal data processing				
[PR-D31-R08]	Article 14: Specific principles for the processing of sensitive data, states: "State Parties shall undertake to	Supports [PR-D31-R01]	1	EC,	ab
	prohibit any data collection and processing revealing racial, ethnic and regional origin, parental filiation,			EA	,
	political opinions, religious or philosophical beliefs, trade union membership, sex life and genetic				m,
	information or, more generally, data on the state of health of the data subject." However, the				1
	prohibitions set forth in Article 14.1 shall not apply to the following categories where:				
	a) Processing relates to data which are manifestly made public by the data subject;				
	b) The data subject has given his/her written consent, by any means, to the processing and in conformity with extant texts;				
	c) Processing is necessary to protect the vital interests of the data subject or of another person where the data subject is physically or legally incapable of giving his/her consent;				
	d) Processing, particularly of genetic data, is required for the establishment, exercise or defence of legal				
	claims;				
	e) A judicial procedure or criminal investigation has been instituted;				
	f) Processing is necessary in the public interest, especially for historical, statistical or scientific purposes;				
	g) Processing is necessary for the performance of a contract to which the data subject is party or in order				
	to take steps at the request of the data subject prior to entering into a contract;				
	h) Processing is necessary for compliance with a legal or regulatory obligation to which the controller is				
	subject;				
	i) Processing is necessary for the performance of a task carried out in the public interest or in the exercise				
	of official authority or assigned by a public authority vested in the controller or in a third party to whom data are disclosed;				
	j) Processing is carried out in the course of the legitimate activities of a foundation, association or any				
	other non-profit making body with a political, philosophical, religious, cooperative or trade union aim, and				

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	on condition that the processing relates solely to the members of the body or to persons who have regular contact with it in connection with its purposes and that the data are not disclosed to a third party without the consent of the data subjects.				
[PR-D31-R09]	Article 14: Specific principles for the processing of sensitive data, states: "Personal data processing for journalistic purposes or for the purpose of research or artistic or literary expression shall be acceptable where the processing is solely for literary and artistic expression or for professional exercise of journalistic or research activity, in accordance with the code of conduct of these professions."	Supports [PR-D31-R01]	1	CA	j
[PR-D31-R10]	Article 14: Specific principles for the processing of sensitive data, states: "The provisions of this [Africa Union] Convention shall not preclude the application of national legislations with regard to the print media or the audio-visual sector, as well as the provisions of the criminal code which provide for the conditions for exercise of the right of reply, and which prevent, limit, compensate for and, where necessary, repress breaches of privacy and damage to personal reputation."	Supports [PR-D31-R01]	1	EC, EA	ab , m
[PR-D31-R11]	Article 14: Specific principles for the processing of sensitive data, states: "A person shall not be subject to a decision which produces legal effects concerning him/her or significantly affects him/her to a substantial degree, and which is based solely on automated processing of data intended to evaluate certain personal aspects relating to him/her."	Supports [PR-D31-R01]	1	IA, EC, EA	d, ab , m
[PR-D31-R12]	Article 14: Specific principles for the processing of sensitive data, states: "a) The data controller shall not transfer personal data to a non-Member State of the African Union unless such a State ensures an adequate level of protection of the privacy, freedoms and fundamental rights of persons whose data are being or are likely to be processed.b) The previous prohibition is not applicable where, before any personal data is transferred to the third country, the data controller shall request authorization for such transfer from the national protection authority."	Supports [PR-D31-R01]	1	EC, EA	ab , m
[PR-D31-R13]	 Article 34: Settlement of Disputes, states: "Any dispute arising from this [Africa Union] Convention shall be settled amicably through direct negotiations between the State Parties concerned. Where the dispute cannot be resolved through direct negotiation, the State Parties shall endeavour to resolve the dispute through other peaceful means, including good offices, mediation and conciliation, or any other peaceful means agreed upon by the State Parties. In this regard, the State Parties shall be encouraged to make use of the procedures and mechanisms for resolution of disputes established within the framework of the [Africa] Union." 	Supports [PR-D31-R01]	1	EC	ab
[PR-D35-R01]	The Constitution of the State of California (USA): Article 1, Section 1, states that "All people are by nature free and independent and have inalienable rights. Among these are enjoying and defending life and liberty, acquiring, possessing, and protecting property, and pursuing and obtaining safety, happiness, and privacy."	Depends on Applicable Laws	1	EC	ab
[PR-D36-R01]	The Massachusetts Right of Privacy, Section 1b, states that, "A person shall have a right against unreasonable, substantial or serious interference with his privacy. The superior court shall have	Depends on Applicable Laws	1	EC	ab

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	jurisdiction in equity to enforce such right and in connection therewith to award damages."				
[PR-D37-R01]	The U.S. Supreme Court Case – McIntyre v. Ohio Elections Commission, states that, "An author's decision	Depends on Applicable Laws	1	EC	ab
	to remain anonymous, like other decisions concerning omissions or additions to the content of a				
	publication, is an aspect of the freedom of speech protected by the [U.S. Constitution] First Amendment."				
[PR-D37-R02]	The U.S. Supreme Court Case – McIntyre v. Ohio Elections Commission, states that, "The freedom to	Depends on Applicable Laws	1	EC	ab
	publish anonymously extends beyond the literary realm. In Talley, the Court held that the [U.S.				
	Constitution] First Amendment protects the distribution of unsigned handbills urging readers to boycott				
	certain Los Angeles merchants who were allegedly engaging in discriminatory employment practices. 362				
	<u>U.S. 60</u> ."				
[PR-D37-R03]	The U.S. Supreme Court Case – McIntyre v. Ohio Elections Commission, states that, "Despite readers'	Depends on Applicable Laws	1	EC	ab
	curiosity and the public's interest in identifying the creator of a work of art, an author generally is free to				
	decide whether or not to disclose her true identity. The decision in favor of anonymity may be motivated				
	by fear of economic or official retaliation, by concern about social ostracism, or merely by a desire to				
	preserve as much of one's privacy as possible. Whatever the motivation may be, at least in the field of				
	literary endeavor, the interest in having anonymous works enter the marketplace of ideas unquestionably				
	outweighs any public interest in requiring disclosure as a condition of entry."				
[PR-D38-R01]	The following sections of the Ghana Protection Act could possibly confer requirements on a gTLD	Precedes [PR-D38-R01 to	1	EC	ab
	directory service.	R06], Depends on Applicable			
		Laws			<u> </u>
[PR-D38-R02]	Section 17, Privacy of the individual, states: "A person who processes data shall take into account the	Supports [PR-D38-R01]	1	EC,	ab
	privacy of the individual by applying the following principles: (a) accountability, (b) lawfulness of			EA,	,
	processing, (c) specification of purpose, (d) compatibility of further processing with purpose of collection,			Н	m,
	(e) quality of information, (f) openness, (g) data security safeguards, and (h) data subject participation."				ba
					,
[PR-D38-R03]	Section 19 further elaborates these principles by providing for:	Supports [PR-D38-R01]	1	EC,	as ab
[111 230 1103]	a) minimality,	Supports [Fix 256 No.1]	_	J, EA	40
	b) Consent, justification and objection,			0, 2, .	o,
	c) how personal data may be collected (directly except where it is in public record, there is consent,				m
	no prejudice is likely to be suffered, for purposes of crime prevention, enforcement of the law,				
	conduct of judicial proceedings, protection of national security or protection of a third party's				
	interests), compliance would prejudice a lawful purpose or compliance is not reasonably				
	practicable				
	d) Collection of data for specific purpose				
	e) Data subject to be made aware of purpose of collection				
	f) Retention of records where the guidelines are that:				

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	 (i) the retention of the record is required or authorised by law, (ii) the retention of the record is reasonably necessary for a lawful purpose related to a function or activity, (iii) retention of the record is required by virtue of a contract between the parties to the contract, or (iv) the data subject consents to the retention of the record. g) Further processing to be compatible with purpose of collection h) Quality of information 				
[PR-D38-R04]	 Registration of data controller is necessary and section 27 states that A data controller who intends to process personal data shall register with the Commission. A data controller who intends to collect personal data shall ensure that the data subject is aware of: a) the nature of the data being collected; b) the name and address of the person responsible for the collection; c) the purpose for which the data is required for collection; d) whether or not the supply of the data by the data subject is discretionary or mandatory; e) the consequences of failure to provide the data; f) the authorised requirement for the collection of the information or the requirement by law for its collection; g) the recipients of the data; h) the nature or category of the data; and i) the existence of the right of access to and the right to request rectification of the data collected before the collection. 	Supports [PR-D38-R01]	1	EA	m
[PR-D38-R05]	Other Ghana Protection Act possible requirements for a data processor are there must be security of the data (Section 28) and that data must be processed by an authorised person (section 29). Data subjects have a right to access the data and the law specifies how the data controller is to provide the access. Specifically, the data controller must notify the data subject that their (personal) data is being sought.	Supports [PR-D38-R01]	1	EA	m
[PR-D38-R06]	The Ghana Protection Act also specifies how the right of access to personal data may be exercised in section 35.	Supports [PR-D38-R01]	1	EA	е
[PR-D39-R01]	The following sections of South Africa's Protection of Personal Information Act could possibly confer requirements on a gTLD directory service.	Precedes [PR-D39-R02 to R08], Depends on Applicable Laws	1	-	-
[PR-D39-R02]	Section 4, Lawful processing of personal information, states: "The conditions for the lawful processing of personal information by or for a responsible party are the following: accountability, processing limitation (including minimality), purpose specification (including limitations on retention), further processing limitation, information quality, openness, security safeguards and data subject participation."	Supports [PR-D39-R01]	1	EA	m

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	require the verification and validation of credentials of registrants for the highly regulated Category 1 new gTLDs should be reconsidered. (Page 5)	Determination			
[PR-D49-R02]	The [2013 RAA] requirement to consult with relevant authorities in case of doubt about the authenticity of [Registrant] credentials should be reconsidered. (Page 5)	Depends on 2013 RAA	2	DB, J	n, o
[PR-D49-R03]	The [2013 RAA] requirement to conduct periodic post-registration checks to ensure that Registrants continue to possess valid credentials should be reconsidered. (Page 5)	Depends on 2013 RAA	2	DB, J	n, o
[PR-D49-R04]	The [2013 RAA] PIC Specification requirement for Category 2 new gTLDs to include a non-discriminatory requirement to provide registrants an avenue to seek redress for discriminatory policies should be amended. (Page 5)	Relevance to RDS?	??	??	??
[PR-D49-R05]	The GAC reaffirms its advice from the Toronto, beijing, Durban, buenos Aires, Singapore and London Communiqués regarding protection of IGO names and acronyms at the top and second levels, as implementation of such protection is in the public interest given that IGOs, as created by governments under international law, are objectively different right holders. (Page 6)	Relevance to RDS?	??	??	??
[PR-D49-R06]	Concerning preventative protection at the second level, notice of a match to an IGO name or acronym to prospective registrants, as well as to the concerned IGO, should apply in perpetuity for the concerned name and acronym in two languages, and at no cost to IGOs. (Page 6)	Relevance to RDS?	<u>}</u> ?	??	??
[PR-D49-R07]	Concerning curative protection at the second level, and noting the ongoing GNSO PDP on access to curative Rights Protection Mechanisms, any such mechanism should be at no or nominal cost to IGOs. (Page 6)	Relevance to RDS?	??	??	??
[PR-D51-R01]	In the Marrakech GAC Communiqué of March 9, 2016, the PSWG recommends against permitting websites actively engaged in commercial transactions – meaning the collection of money for a good or service – to hide their identities using Privacy/Proxy (P/P) Services. This includes domains used for websites that directly collect payment data, as well as for sites that promote a transaction but directly link to other sites that execute the transaction. The public is entitled to know the true identity of those with whom they are doing business. (Page 9)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22]	1	H, BB	as, ac
[PR-D51-R02]	P/P services should only be permitted for those domains that are not actively conducting business transactions Any person or entity that engages in commercial transactions invites the public to trust them with their funds and sensitive financial account information. Hence, any privacy interest should be balanced with the public's right to know the true identity of those with whom they are doing business. (Page 9)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22]	1	H, BB	as, ac
[PR-D51-R03]	Domain name registration involving P/P service providers should be clearly labelled as such in the WHOIS. (Page 10)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22]	1	Н	as
[PR-D51-R04]	P/P services should continue to be required to publish their relevant terms of service and to abide by those published terms (as currently provided in the Interim Specification to the 2013 RAA). (Page 10)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22], 2013 RAA	2	H, J	as, av

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
[PR-D51-R05]	ICANN should ensure transparency by publishing and maintaining a publicly accessible list of all accredited P/P service providers, with all appropriate contact information. Registrars should provide a web link to P/P services run by them or their Affiliates, and P/P service providers should declare their Affiliation with a registrar (if any) as a requirement of the accreditation program. (Page 9)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22]	2	H, AA	as, ad
[PR-D51-R06]	A "designated" rather than a "dedicated" point of contact will be sufficient for abuse reporting purposes and a designated point of contact should be "capable and authorized" to investigate and handle abuse reports, consistent with RAA Section 3.18. (Page 10)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22], Depends on 2013 RAA	1	AA, DA	ad , f
[PR-D51-R07]	P/P services should be treated equally for the purpose of accreditation process. (Page 10)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22]	1	H, DB	as, ae
[PR-D51-R08]	Malicious conduct involving domains often takes place across borders. [Therefore] the definition of law enforcement should recognize the multi-jurisdictional aspects of investigative and enforcement activities in order to promote protecting the public no matter where they are located. (Page 10)		1	CC	q
[PR-D51-R09]	The PSWG urges P/P Working Group to require P/P Service Providers to keep [Law Enforcement Agency and Consumer Protection Agency] (LEA) requests confidential as required and/or permitted by local laws. (Page 11)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22]	1	EC	ab
[PR-D51-R10]	If a P/P provider were to provide notice of a LEA investigative request to the target of the request, remedies for such disclosure by the P/P provider would be determined by the respective national, state, provincial, or other governing laws. (Page 11)	Related to Privacy PR(s) for P/P Providers such as [PR-D01-R22]	1	EC	ab
[PR-D52-R01]	In the London GAC Communiqué of June 25, 2014, GAC reiterates its advice that new gTLD registry operators should be made aware of the importance of protecting children and their rights consistent with the UN Convention on the Rights of the Child.	Depends on UN Convention	1	IA	d
[PR-D55-R01]	ICANN, in its monopoly administration of a public resource, has a responsibility to set standards on an ethical basis and based on sound best practice.		1	IA	d
[PR-D55-R02]	A privacy policy must be developed to govern the RDS. This must be inclusive of the collection instrument, as set out in the 2013 RAA, and the escrow requirements. The privacy policy must be accompanied by meaningful enforcement mechanisms.		1	IA	d
[PR-D55-R03]	The legal contact information of individuals and of organisations who wish to protect their private data must be gated. (Duplicate this as [GA-D55-R01])		2	IA, AB	d, s
[PR-D55-R04]	Consent needs to be meaningful, specific, explicit, and for legitimate purposes. A blanket consent which would see an actor voluntarily surrender any privacy protections which they are entitled to under local laws would not meet this requirement.	Depends on Permissible Purposes, Applicable Laws	1	IA, EA	d, I
[PR-D59-R01]	According to the GAC, Commercial registrants should receive less privacy protection than non-commercial registrants		1	ID, BB	g, ac

	information when presented with evidence of actionable harm, as required by the current				
	Registrar Accreditation Agreement. [Note: See the WHOIS Privacy/Proxy Relay/Reveal Survey				
	that was undertaken in response to this recommendation.]				

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of *possible* requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

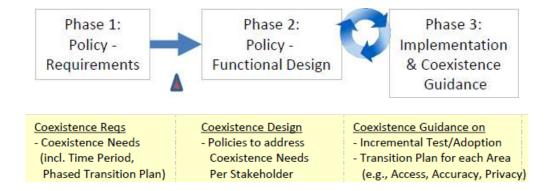

[THE FOLLOWING SECTIONS HAVE NOT YET BEEN COMPLETED. IT IS EXPECTED THAT THE WG WILL FOCUS INITIALLY ON POSSIBLE REQUIREMENTS TO ADDRESS FUNDAMENTAL QUESTIONS. HOWEVER, CROSS-CUTTING QUESTIONS HAVE ALSO BEEN INCLUDED BELOW AS PLACE-HOLDERS TO BE EXPANDED LATER AND TO ALLOW FOR POSSIBLE REQUIREMENTS TO BE MOVED OR ADDED.]

Coexistence (CX)

The following possible requirements address the charter question on Coexistence (CX):

What steps should be taken to enable next-generation RDS coexistence with & replacement of the legacy WHOIS system?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any **prerequisites or dependencies** contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet **Phase 1** policy requirements should be considered in **Phase 2**, while implementation or coexistence guidance for Phase 2 policies should be considered in **Phase 3**. In addition, an initial attempt has been made to **group similar requirements by code (C) and keyword (K)**, allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	PRS IN THIS SECTION NOT YET TRIAGED – TO BE DONE AFTER FUNDAMENTAL QUESTIONS	Depends on			

- [CX-D01-R##] Draw from EWG Section 5a, Alignment with 2013 RAA and New Data Elements, and Annex F, System Models Ease of Transition. [TO DO COPY/PASTE possible requirements HERE]
- [CX-D09-R01] The WHOIS RT recommends ongoing development of [gTLD registration directory services] policy within ICANN's existing machinery, and the impact of other policy development on [registration directory services].
- [CX-D12-R01] Adoption of a new [gTLD registration directory service] should take into account impacts (e.g., on cost of data access and parsing) on existing providers of applications and services related to registration data. (Sec. 5.10)
- [CX-D25-R01] Council of Europe's Treaty 108 on Data Protections imposes some restrictions on transborder flows of personal data to States where legal regulation does not provide equivalent protection. These legal restrictions may impact [this PDP] if large amounts of data from the [existing gTLD registration directory service known as] WHOIS are "repurposed" by a next-generation gTLD registration directory service or moved from registries and registrars to new database(s). See also [SM-D25-R01].
- [CX-D26-R01] According to the <u>Directive (5)</u>, whereas the economic and social integration resulting from the establishment and functioning of the internal market within the meaning of Article 7a of the Treaty will necessarily lead to a substantial increase in cross-border flows of personal data between all those involved in a private or public capacity in economic and social activity in the Member States; whereas the exchange of personal data between undertakings in different Member States is set to increase; whereas the national authorities in the various Member States are being called upon by virtue of Community law to collaborate and exchange personal data so as to be able to perform their duties or carry out tasks on behalf of an authority in another Member State within the context of the area without internal frontiers as constituted by the internal market;
- [CX-D26-R02] According to the <u>Directive (45)</u>, whereas, in cases where data might lawfully be processed on grounds of public interest, official authority or the legitimate interests of a natural or legal person, any data subject should nevertheless be entitled, on legitimate and compelling grounds relating to his particular situation, to object to the processing of any data relating to himself; whereas Member States may nevertheless lay down national provisions to the contrary; Same as [CM-D26-R06]
- [CX-D30-R01] because the Privacy Shield will also be used to transfer data outside the US, the WP29 insists that onward transfers from a Privacy Shield entity to third country recipients should provide the same level of protection on all aspects of the Shield (including national security) and should not lead to lower or circumvent EU data protection principles pg3
- [CX-D30-R02] WP29 stresses that any interference with the fundamental rights to private life and data protection need to be justifiable in a democratic society. The CJEU criticised the fact that the Safe Harbour decision did not contain any finding regarding the existence, in the United States, of rules adopted by the State intended to limit any interference. Nor does it refer to the existence of effective legal protection against interference of that kind.pg 11; Same as [UP-D30-R04] [GA-D30-R03] [DE-D30-R03] [PR-D30-R07] [SM-D30-R03] [RI-D30-R03]

[CX-D30-R03] Privacy Shield documents make use of terminology that is not consistent with the vocabulary generally used in the EU when dealing with data protection. This is not necessarily a problem, as long as it is clear what the corresponding terminology under EU law (and under U.S. law) would be. The WP29 regrets to note however this is not the case, including in the draft adequacy decision. For example, the word 'access' is used in chapter 3 of the draft adequacy decision in a sense that implies the collection of personal data, instead of allowing someone to see data that is already collected. Access by companies to the data and the individuals' right of access are two separate notions that should not be confused. pg. 13

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of **possible** requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Compliance (CM)

The following **possible** requirements address the charter question on Compliance (CM): What steps are needed to enforce these policies?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	PRS IN THIS SECTION NOT YET TRIAGED – TO BE DONE AFTER FUNDAMENTAL QUESTIONS	Depends on			

- [CM-D01-R##] Draw from Contractual Relationship Principles 109-113 on page 91
 - [TO DO COPY/PASTE EWG Principles 109-113 HERE]
- [CM-D01-R##] Draw from Accountability & Audit Principles 114-133 on pages 91-94. See also summary of types of accountability and audit requirements in Table 6 on page 95.
 - [TO DO COPY/PASTE EWG Principles 114-133 HERE]
- [CM-D02-R01] "Develop clear targets for compliance with respect to registration data accuracy; performance provisions such as SLA must be considered as part of the compliance function....
- [CM-D02-R02] "ICANN should take appropriate measures to reduce the number of WHOIS registrations that fall into the accuracy groups Substantial Failure and Full Failure"
- [CM-D02-R03] "ICANN should ensure that there is a clear, unambiguous and enforceable chain of contractual agreements with registries, registrars, and registrants to require the provision and maintenance of accurate WHOIS data. As part of these agreements, ICANN should ensure that clear, enforceable and graduated sanctions apply to registries, registrars and registrants that do not comply with its WHOIS policies. These sanctions should include de-registration and/or deaccreditation as appropriate in cases of serious or serial non-compliance."
- [CM-D06-R01] Registrar shall abide by any Consensus Policy that requires registrars to cooperatively implement a distributed capability that provides query-based [gTLD registration directory service] search functionality across all registrars. If the [gTLD registration directory service] implemented by registrars does not in a reasonable time provide reasonably robust, reliable, and convenient access to accurate and up-to-date data, the Registrar shall abide by any Consensus Policy requiring Registrar, if reasonably determined by ICANN to be necessary (considering such possibilities as remedial action by specific registrars), to supply data from Registrar's database to facilitate the development of a centralized [gTLD registration] database for the purpose of providing comprehensive Registrar [gTLD registration directory service] search capability.
- [CM-D09-R01] In Recommendations 7 and 9, the WHOIS RT recommends that:
 - [CM-D09-R02] ICANN shall produce and publish an accuracy report focused on measured reduction in gTLD registration data that fall into the accuracy groups Substantial Failure and Full Failure, on an annual basis.
 - [CM-D09-R03] ICANN should develop metrics to track the impact of the annual WHOIS Data Reminder policy notices to registrants, or alternatively, an effective policy that achieves the objective of improving data quality in a measurable way.
- [CM-D09-R04] In Recommendation 12, the WHOIS RT urged ICANN to focus its measurements and compliance work on those data elements that allow a Registrant to be "contactable," (minimal data elements), rather than requiring that all WHOIS data be accurate. Specifically, the WHOIS RT stated "ICANN shall produce and publish an accuracy report focused on measured reduction in WHOIS registrations that fall into the accuracy groups Substantial Failure and Full Failure, on an annual basis."

- [CM-D18-R01] based on the WHOIS Inter-Registrar Transfer Policy, Section I.A.2.2.1: "Transmission of a "transfer" command constitutes a representation on the part of the Gaining Registrar that the requisite authorization has been obtained from the Transfer Contact listed in the authoritative WHOIS database."
- [CM-D18-R02] based on the WHOIS Inter-Registrar Transfer Policy, Section I.A.4.4: "If either a Registrar of Record or a Gaining Registrar does not believe that a transfer request was handled in accordance with the provisions of this policy, then the Registrar may initiate a dispute resolution procedure as set forth in Section C."
- [CM-D23-R01] "User control User control is only possible when the purpose of data processing is sufficiently clear and predictable. If data subjects fully understand the purposes of the processing, they can exercise their rights in the most effective way. For instance, they can object to the processing or request the correction or deletion of their data. (See also [UP-D23-R13])
 - [CM-D23-R02] "This does not mean that the presented purpose should always be trusted as the actual and effective one, as there may be a discrepancy between what is claimed and what is pursued in practice by the data controller. Ultimately, compliance with other data protection requirements, such as the necessity and relevance of data, will always need to be measured against the actual purpose." (p.14)
- [CM-D26-R01] According to the <u>Directive (3)</u>, whereas the establishment and functioning of an internal market in which, in accordance with Article 7a of the Treaty, the free movement of goods, persons, services and capital is ensured require not only that personal data should be able to flow freely from one Member State to another, but also that the fundamental rights of individuals should be safeguarded;
- [CM-D26-R02] According to the <u>Directive (8)</u>, whereas, in order to remove the obstacles to flows of personal data, the level of protection of the rights and freedoms of individuals with regard to the processing of such data must be equivalent in all Member States; whereas this objective is vital to the internal market but cannot be achieved by the Member States alone, especially in view of the scale of the divergences which currently exist between the relevant laws in the Member States and the need to coordinate the laws of the Member States so as to ensure that the cross-border flow of personal data is regulated in a consistent manner that is in keeping with the objective of the internal market as provided for in Article 7a of the Treaty; whereas Community action to approximate those laws is therefore needed;
- [CM-D26-R03] According to the <u>Directive (18)</u>, whereas, in order to ensure that individuals are not deprived of the protection to which they are entitled under this Directive, any processing of personal data in the Community must be carried out in accordance with the law of one of the Member States; whereas, in this connection, processing carried out under the responsibility of a controller who is established in a Member State should be governed by the law of that State; Same as [GA-D26-R01]
- [CM-D26-R04] According to the <u>Directive (19)</u>, whereas establishment on the territory of a Member State implies the effective and real exercise of activity through stable arrangements; whereas the legal form of such an establishment, whether simply branch or a subsidiary with a legal personality, is not the determining factor in this respect; whereas, when a single controller is established on the territory of several Member States, particularly by means of subsidiaries, he must ensure, in order to avoid any circumvention of national rules, that each of the establishments fulfils the obligations imposed by the national law applicable to its activities

- [CM-D26-R05] According to the <u>Directive (20)</u>, whereas the fact that the processing of data is carried out by a person established in a third country must not stand in the way of the protection of individuals provided for in this Directive; whereas in these cases, the processing should be governed by the law of the Member State in which the means used are located, and there should be guarantees to ensure that the rights and obligations provided for in this Directive are respected in practice; Same as [UP-D26-R02]
- [CM-D26-R06] According to the <u>Directive (45)</u>, whereas, in cases where data might lawfully be processed on grounds of public interest, official authority or the legitimate interests of a natural or legal person, any data subject should nevertheless be entitled, on legitimate and compelling grounds relating to his particular situation, to object to the processing of any data relating to himself; whereas Member States may nevertheless lay down national provisions to the contrary; Same as [CX-D26-R02]
- [CM-D26-R07] According to the <u>Directive (46)</u>, whereas the protection of the rights and freedoms of data subjects with regard to the processing of personal data requires that appropriate technical and organizational measures be taken, both at the time of the design of the processing system and at the time of the processing itself, particularly in order to maintain security and thereby to prevent any unauthorized processing; whereas it is incumbent on the Member States to ensure that controllers comply with these measures; whereas these measures must ensure an appropriate level of security, taking into account the state of the art and the costs of their implementation in relation to the risks inherent in the processing and the nature of the data to be protected; Same as [SM-D26-R05] [CS-D26-R01]
- [CM-D26-R08] According to the <u>Directive (53)</u>, whereas, however, certain processing operation are likely to pose specific risks to the rights and freedoms of data subjects by virtue of their nature, their scope or their purposes, such as that of excluding individuals from a right, benefit or a contract, or by virtue of the specific use of new technologies; whereas it is for Member States, if they so wish, to specify such risks in their legislation; Same as [CS-D26-R02]
- [CM-D26-R09] According to the <u>Directive (54)</u>, whereas with regard to all the processing undertaken in society, the amount posing such specific risks should be very limited; whereas Member States must provide that the supervisory authority, or the data protection official in cooperation with the authority, check such processing prior to it being carried out; Same as [CS-D26-R03]
- [CM-D26-R10] According to the <u>Directive (62)</u>, whereas the establishment in Member States of supervisory authorities, exercising their functions with complete independence, is an essential component of the protection of individuals with regard to the processing of personal data;
- [CM-D26-R10] According to the <u>Directive Article 4</u>, whereas Each Member State shall apply the national provisions it adopts pursuant to this Directive to the processing of personal data where: the processing is carried out in the context of the activities of an establishment of the controller on the territory of the Member State; when the same controller is established on the territory of several Member States, he must take the necessary measures to ensure that each of these establishments complies with the obligations laid down by the national law applicable;
- [CM-D26-R11] According to the <u>Directive Article 18</u>, Obligation to notify the supervisory authority, Member States shall provide that the controller or his representative, if any, must notify the supervisory authority referred to in Article 28 before carrying out any wholly or partly automatic processing operation or set of such operations intended to serve a single purpose or several related purposes.

- [CM-D30-R01] The WP29 considers a review must be undertaken shortly after the entry into application of the General Data Protection Regulation, in order to ensure the higher level of data protection offered by the Regulation is followed in the adequacy decision and its annexes. pg. 3
- [CM-D30-R02] because the Privacy Shield will also be used to transfer data outside the US, the WP29 insists that onward transfers from a Privacy Shield entity to third country recipients should provide the same level of protection on all aspects of the Shield (including national security) and should not lead to lower or circumvent EU data protection principles. pg. 3
- [CM-D30-R03] The requirement for a third country to ensure an adequate level of data protection was further defined by the CJEU in Schrems...It also indicated that the wording 'adequate level of protection' must be understood as "requiring the third country in fact to ensure, by reason of its domestic law or its international commitments, a level of protection of fundamental rights and freedoms that is essentially equivalent to that guaranteed within the European Union by virtue of the Directive read in the light of the Charter" pg.10; Same as [UP-D30-R02] [GA-D30-R01] [PR-D30-R05]
- [CM-D30-R04] The WP29 has already explained the way it applied the core EU data protection principles to transfers of personal data to third countries in its Working Document 12 'Transfers of personal data to third countries: Applying Articles 25 and 26 of the EU data protection directive'. The WP29 tried to find the equivalent safeguards which ensure a level of protection equivalent to the principles guaranteed in the Directive, notably regarding purpose limitation, data quality and proportionality, transparency, security, rights of access, rectification and opposition, data retention and restrictions on onward transfers. pg. 11 Same as [UP-D30-R03] [DE-D30-R01] [PR-D30-R06]
- [CM-D30-R05] Given the amount of data transfers that take place between the EU and the U.S. on a daily basis, which the WP29 recognises is a vital part of the economy on both sides of the Atlantic, legal clarity is needed sooner rather than later. pg. 12
- [CM-D30-R06] Scope of application of the EU data protection framework and, in particular, of the Directive 95/46/EC principles: The WP29 recalls that under the EU data protection legal framework, and in particular under the Directive (Article 4(1)), Member States laws apply not only to the processing operations carried out by data controllers established on their territory, but also where data controllers (although not established in the EU), make use of equipment situated on EU territory, in particular for the collection of personal data. As a consequence, EU Member State law applies to any processing that takes place prior to the transfer to the U.S., either in the context of activities of an organisation established in the EU or through the use of equipment situated in the EU used by an organisation not established in the EU. pg. 12; Same as [UP-D30-R10] [DE-D30-R04] [SM-D30-R04]
- [CM-D30-R07] Privacy Shield documents make use of terminology that is not consistent with the vocabulary generally used in the EU when dealing with data protection. This is not necessarily a problem, as long as it is clear what the corresponding terminology under EU law (and under U.S. law) would be. The WP29 regrets to note however this is not the case, including in the draft adequacy decision. For example, the word 'access' is used in chapter 3 of the draft adequacy decision in a sense that implies the collection of personal data, instead of allowing someone to see data that is already collected. Access by companies to the data and the individuals' right of access are two separate notions that should not be confused. pg. 13
- [CM-D30-R08] The WP29 would like to recall that any processing (including collection and transfer) of sensitive data subject to EU law has to be made on legitimate grounds according to article 8 of the Directive. The Privacy Shield cannot be interpreted as offering alternative grounds for such processing pg. 14

- [CM-D30-R09] Annex II, I.5. provides, among others, for exemptions from the Principles when data covered by the Privacy Shield is used for reasons of national security12, public interest, law enforcement, or following statute, government regulation or case law which creates conflicting obligations or explicit authorisations. Without full knowledge of U.S. law at both the Federal and at state level, it is difficult for the WP29 to assess the scope of this exemption and to consider whether those limitations are justifiable in a democratic society. It would be essential that the European Commission also includes in its draft adequacy decision an analysis of the level of protection where those exemptions would apply. pg. 17 Same as [UP-D30-R12] [PR-D30-R11]
- [CM-D30-R10] In any case of an onward transfer to a third country, every Privacy Shield organisation should be obliged to assess the mandatory requirements of the third country's national legislation applicable to the data importer prior to the transfer. If a risk of substantial adverse effect on the guarantees, obligations and level of protection provided by the Privacy Shield is identified, the U.S. Privacy Shield organisation acting as a Processor (Agent) shall promptly notify the EU data controller before carrying out any onward transfer. In these cases the data exporter is entitled to suspend the transfer of data and/or terminate the contract. Where there is such a risk of substantial adverse effect, a Shield organisation acting as a controller should not be allowed to onward transfer the data, as this would compromise its duty to provide the same level of protection as under the Principles in case of onward transfers (see Annex II, II.3.a).pg. 21
- [CM-D30-R11] A violation of the Privacy Shield principles might go unnoticed for a long period of time and might only be detected after serious harm has been caused to the data subject's fundamental rights, possibly beyond repair. Hence, this approach might contravene the European precautionary principle. pg. 30
- [CM-D32-R01] The specifications below are recommended requirements for registries. These requirements include independently-reviewed Management Policies, Procedures, and Personnel:
 - [CM-D32-R02] Alternate (i.e., non-litigation) dispute resolution providing a timely and inexpensive forum for trademark-related complaints. (These procedures should be consistent with applicable national laws and compatible with any available judicial or administrative remedies.)
 - [CM-D32-R03] A plan to ensure that the registry's obligations to its customers will be fulfilled in the event that the registry goes out of business. This plan must indicate how the registry would ensure that domain name holders will continue to have use of their domain name and that operation of the Internet will not be adversely affected.
 - [CM-D32-R04] Procedures for assuring and maintaining the expertise and experience of technical staff.
 - [CM-D32-R05] Commonly-accepted procedures for information systems security to prevent malicious hackers and others from disrupting operations of the registry. (may also apply to Privacy charter question)
- [CM-D32-R06] The specifications below are recommended requirements for registrars. These requirements include Management Policies, Procedures, and Personnel:
 - [CM-D32-R07] A plan to ensure that the registrar's obligations to its customers and to the registries will be fulfilled in the event that the registrar goes out of business. This plan must indicate how the registrar would ensure that domain name holders will continue to have use of their domain name and that operation of the Internet will not be adversely affected.

[CM-D32-R08] Commonly-accepted procedures for information systems security to prevent malicious hackers and others from disrupting operations. (may also apply to Privacy charter question)

- [CM-D32-R09] Alternative Dispute Resolution of Domain Name Conflicts. There must be a readily available and convenient dispute resolution process that requires no involvement by registrars. Registries/Registrars will abide by the decisions resulting from an agreed upon dispute resolution process or by the decision of a court of competent jurisdiction. If an objection to registration is raised within 30 days after registration of the domain name, a brief period of suspension during the pendency of the dispute will be provided by the registries.
- [CM-D40-R01] RFC 7480, HTTP Usage in the Registration Data Access Protocol (RDAP), Section 4.3, specifies that RDAP "servers must ignore unknown query parameters. Use of unknown query parameters for cache busting is described in Appendix b." This might apply to a registration directory service that implements RDAP.
- [CM-D57-R01] According to GAC Comments on "New gTLD Program Safeguards Against DNS Abuse," [there should be] responsible oversight of domain operators and resellers / data processors/controllers through stringent vetting procedures.
- [CM-D57-R02] There should be transparency around domain delegation through [Thick WHOIS] across the top-level domain space.
- [CM-D57-R03] There should be open and comprehensive compliance processes, including vetting of registry/registrar/data processors and comprehensive audits of such entities.
- [CM-D57-R04] There should be proper handling of abuse complaints.

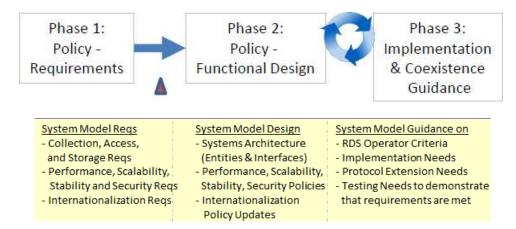

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of *possible* requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

System Model (SM)

The following *possible* requirements address the charter question on System Model (SM):

What system requirements must be satisfied by any next-generation RDS implementation?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any prerequisites or dependencies contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet Phase 1 policy requirements should be considered in Phase 2, while implementation or coexistence guidance for Phase 2 policies should be considered in Phase 3. In addition, an initial attempt has been made to group similar requirements by code (C) and keyword (K), allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	К
	PRs IN THIS SECTION NOT YET TRIAGED – TO BE DONE AFTER FUNDAMENTAL QUESTIONS	Depends on			

[SM-D01-R01] The gTLD registration directory service "must be designed with extensibility in mind" (p.27)

[SM-D01-R02] gTLD registration directory service must "log all access to gTLD registration data, including unauthenticated access to public data elements, and access restrictions to deter bulk harvesting." (p.40)

[SM-D01-R03] gTLD registration directory service must "audit both public and gated data access to minimize abuse and impose penalties and other remedies for inappropriate use." (p.40)

[SM-D01-R04] Draw from Model Design Principles 157, 159 & 160 on page 109
[TO DO – COPY/PASTE EWG Principles 157, 159 & 160 HERE]

- [SM-D01-R07]— Draw from Data Storage, Escrow & Logging Principles 161-174 on pages 115-116
 [TO DO COPY/PASTE EWG Principles 161-174 HERE]
- [SM-D01-R21] Draw from Protocol Extensions &/or Additions on page 157
 [TO DO TURN THIS INPUT INTO A POSSIBLE REQUIREMENT]
- [SM-D05-R01] "The WHOIS protocol has not been internationalised. The WHOIS protocol has no mechanism for indicating the character set in use. Originally, the predominant text encoding in use was US-ASCII. In practice, some WHOIS servers, particularly those outside the USA, might be using some other character set either for requests, replies, or both. This inability to predict or express text encoding has adversely impacted the interoperability (and, therefore, usefulness) of the WHOIS protocol." (From Section 4: Internationalisation) This text implies that there is a [gTLD registration directory service] requirement for internationalization support. Related to [GA-D01-R31 to R33] [GA-D42-R03] [DE-D09-R01] [DE-D09-R01]
- [SM-D07-R01] From Specification 6, Section 1: "Standards Compliance: For DNS, EPP, DNSSEC, IDN, IPv6." May also apply to other charter questions (data elements, compliance, standardization?)
- [SM-D07-R02] From Specification 10, Section 4.1: RDDS availability. Refers to the ability of all the RDDS services for the TLD, to respond to queries from an Internet user with appropriate data from the relevant Registry System. If 51% or more of the RDDS testing probes see any of the RDDS services as unavailable during a given time, the RDDS will be considered unavailable. (Note: Possible requirements taken from Section 4 many also belong under Compliance?)
- [SM-D07-R03] From Specification 10, Section 4.2: WHOIS [or replacement] Query RTT. Refers to the RTT of the sequence of packets from the start of the TCP connection to its end, including the reception of the WHOIS response. If the RTT is 5-times or more the corresponding SLR, the RTT will be considered undefined.
- [SM-D07-R04] From Specification 10, Section 4.3: Web-based-WHOIS [or replacement] query RTT. Refers to the RTT of the sequence of packets from the start of the TCP connection to its end, including the reception of the HTTP response for only one HTTP request. If Registry Operator implements a multiple-step process to get to the information, only the last step shall be measured. If the RTT is 5-times or more the corresponding SLR, the RTT will be considered undefined.
- [SM-D07-R05] From Specification 10, Section 4.4: RDDS query RTT. Refers to the collective of "WHOIS [or replacement] query RTT" and "Web-based- WHOIS [or replacement] query RTT".
- [SM-D07-R06] From Specification 10, Section 4.5: RDDS update time. Refers to the time measured from the reception of an EPP confirmation to a transform command on a domain name, host or contact, up until the servers of the RDDS services reflect the changes made.
- [SM-D07-R07] From Specification 10, Section 4.6: RDDS test. Means one query sent to a particular "IP address" of one of the servers of one of the RDDS services. Queries shall be about existing objects in the Registry System and the responses must contain the corresponding information otherwise the query will be considered unanswered. Queries with an RTT 5 times higher than the corresponding SLR will be considered as unanswered. The possible results to an RDDS test are: a number in milliseconds corresponding to the RTT or undefined/unanswered.

- [SM-D07-R08] From Specification 10, Section 4.7: Measuring RDDS parameters. Every 5 minutes, RDDS probes will select one IP address from all the public-DNS registered "IP addresses" of the servers for each RDDS service of the TLD being monitored and make an "RDDS test" to each one. If an "RDDS test" result is undefined/unanswered, the corresponding RDDS service will be considered as unavailable from that probe until it is time to make a new test.
- [SM-D07-R09] From Specification 10, Section 4.8: Collating the results from RDDS probes. The minimum number of active testing probes to consider a measurement valid is 10 at any given measurement period, otherwise the measurements will be discarded and will be considered inconclusive; during this situation no fault will be flagged against the SLRs.
- [SM-D07-R10] From Specification 10, Section 4.9: Placement of RDDS probes. Probes for measuring RDDS parameters shall be placed inside the networks with the most users across the different geographic regions; care shall be taken not to deploy probes behind high propagation-delay links, such as satellite links."
- [SM-D12-R01] Information associated with the domain name, and information associated with the domain name registrant, must both be accessible at the registry level. (Rec. #1)
- [SM-D12-R02] The [gTLD registration directory service] should provide multiple fallback locations where data is stored, such that, in case of a failure, there are at least two geographically dispersed sources of data that are available for recovery. (sec. 5.3, 5.11)
- [SM-D12-R03] Under the [gTLD registration directory service], all information associated with the domain name as well as the registrant must be accessible via both the registrar and registry services. (sec. 5.4)
- [SM-D12-R04] The [gTLD registration directory service] should create a competitive level playing field among entities holding data, s and avoid making diversity in [gTLD registration directory service] data models a matter of competitive advantage. (sec. 5.9)
- [SM-D13-R01] based on the review of ICANN's procedure for handling WHOIS conflicts with privacy law, the following System Modeling requirements from past accreditation agreements are unchanged: Registrars must notify registrants of: 4) How to access and rectify any data.
- [SM-D25-R01] Council of Europe's Treaty 108 on Data Protections imposes some restrictions on transborder flows of personal data to States where legal regulation does not provide equivalent protection. These legal restrictions may impact [this PDP] if large amounts of data from the [existing gTLD registration directory service known as] WHOIS are "repurposed" by a next-generation gTLD registration directory service or moved from registries and registrars to new database(s). See also [CX-D25-R01].
- [SM-D26-R01] According to the <u>Directive (3)</u>, whereas the establishment and functioning of an internal market in which, in accordance with Article 7a of the Treaty, the free movement of goods, persons, services and capital is ensured require not only that personal data should be able to flow freely from one Member State to another, but also that the fundamental rights of individuals should be safeguarded;
- [SM-D26-R02] According to the <u>Directive (8)</u>, whereas, in order to remove the obstacles to flows of personal data, the level of protection of the rights and freedoms of individuals with regard to the processing of such data must be equivalent in all Member States; whereas this objective is vital to the internal market but cannot

be achieved by the Member States alone, especially in view of the scale of the divergences which currently exist between the relevant laws in the Member States and the need to coordinate the laws of the Member States so as to ensure that the cross-border flow of personal data is regulated in a consistent manner that is in keeping with the objective of the internal market as provided for in Article 7a of the Treaty; whereas Community action to approximate those laws is therefore needed;

- [SM-D26-R03] According to the <u>Directive (27)</u>, whereas the protection of individuals must apply as much to automatic processing of data as to manual processing; whereas the scope of this protection must not in effect depend on the techniques used, otherwise this would create a serious risk of circumvention;
- [SM-D26-R04] According to the <u>Directive (39)</u>, whereas certain processing operations involve data which the controller has not collected directly from the data subject; whereas, furthermore, data can be legitimately disclosed to a third party, even if the disclosure was not anticipated at the time the data were collected from the data subject; whereas, in all these cases, the data subject should be informed when the data are recorded or at the latest when the data are first disclosed to a third party; Same as [UP-D26-R09] [GA -D26-R02] [PR -D26-R07]
- [SM-D26-R05] According to the <u>Directive (46)</u>, whereas the protection of the rights and freedoms of data subjects with regard to the processing of personal data requires that appropriate technical and organizational measures be taken, both at the time of the design of the processing system and at the time of the processing itself, particularly in order to maintain security and thereby to prevent any unauthorized processing; whereas it is incumbent on the Member States to ensure that controllers comply with these measures; whereas these measures must ensure an appropriate level of security, taking into account the state of the art and the costs of their implementation in relation to the risks inherent in the processing and the nature of the data to be protected; Same as [CM-D26-R07] [CS-D26-R01]
- [SM-D26-R06] According to the <u>Directive (55)</u>, whereas, if the controller fails to respect the rights of data subjects, national legislation must provide for a judicial remedy; whereas any damage which a person may suffer as a result of unlawful processing must be compensated for by the controller, who may be exempted from liability if he proves that he is not responsible for the damage, in particular in cases where he establishes fault on the part of the data subject or in case of force majeure; whereas sanctions must be imposed on any person, whether governed by private of public law, who fails to comply with the national measures taken under this Directive;
- [SM-D26-R07] As used in the <u>Directive</u>, (c) 'personal data filing system' ('filing system') means any structured set of personal data which are accessible according to specific criteria, whether centralized, decentralized or dispersed on a functional or geographical basis;
- [SM-D26-R08] According to the <u>Directive Article 17</u>, Security of processing, Member States shall provide that the controller must implement appropriate technical and organizational measures to protect personal data against accidental or unlawful destruction or accidental loss, alteration, unauthorized disclosure or access, in particular where the processing involves the transmission of data over a network, and against all other unlawful forms of processing. Having regard to the state of the art and the cost of their implementation, such measures shall ensure a level of security appropriate to the risks represented by the processing and the nature of the data to be protected.
- [SM-D26-R09] According to the <u>Directive Article 17</u>, Security of processing, Member States shall provide that the controller must, where processing is carried out on his behalf, choose a processor providing sufficient guarantees in respect of the technical security measures and organizational measures governing the processing to be carried out, and must ensure compliance with those measures.

[SM-D28-R01] [Any system model adopted for gTLD registration directory services] would be required to ensure that ICANN, Registries and Registrars:

- "collect and process personal data only when this is legally permitted;
- respect certain obligations regarding the processing of personal data;
- respond to complaints regarding breaches of data protection rules;
- collaborate with national data protection supervisory authorities.
 See also [UP-D28-R05]

[SM-D29-R01] Each data controller must respect the following rules as set out in the <u>Directive</u>: (same as [DE-D29-R01])

[SM-D29-R02] Personal Data must be processed legally and fairly;

[SM-D29-R03] It must be collected for explicit and legitimate purposes and used accordingly;

[SM-D29-R04] It must be adequate, relevant and not excessive in relation to the purposes for which it is collected and/or further processed;

[SM-D29-R05] It must be accurate, and updated where necessary;

[SM-D29-R06] Data controllers must ensure that data subjects can rectify, remove or block incorrect data about themselves;

[SM-D29-R07] Data that identifies individuals (personal data) must not be kept any longer than strictly necessary;

[SM-D29-R08] Data controllers must protect personal data against accidental or unlawful destruction, loss, alteration and disclosure, particularly when processing involves data transmission over networks. They shall implement the appropriate security measures;

[SM-D29-R09] These protection measures must ensure a level of protection appropriate to the data.

[SM-D29-R10] Responsibilities towards data subjects. If a data subject is of the view that his/her data has been compromised, he/she can send a complaint to the data controller.

[SM-D29-R11] If the data controller's handling of a complaint is not satisfactory, the data subject can file a complaint to the <u>national supervisory data protection</u> authority.

[SM-D29-R12] In principle, all data controllers must notify their supervisory authorities when they process personal data.

[SM-D30-R01] The WP29 recalls its long-standing position that massive and indiscriminate surveillance of individuals can never be considered as proportionate and strictly necessary in a democratic society, as is required under the protection offered by the applicable fundamental rights. Additionally, comprehensive oversight of all surveillance programmes is crucial.pg 4 [UP-D30-R01] [RI-D30-R02]

- [SM-D30-R02] WP29 stresses that any interference with the fundamental rights to private life and data protection need to be justifiable in a democratic society. The CJEU criticised the fact that the Safe Harbour decision did not contain any finding regarding the existence, in the United States, of rules adopted by the State intended to limit any interference. Nor does it refer to the existence of effective legal protection against interference of that kind.pg 11; Same as [UP-D30-R04] [GA-D30-R03] [DE-D30-R03] [PR-D30-R07] [CX-D30-R03] [RI-D30-R03]
- [SM-D30-R03] In order to evaluate if any interference would be justifiable in a democratic society, the assessment was conducted in light of the European jurisprudence on fundamental rights which sets four essential guarantees for intelligence activities as listed in [UP-D30-R05]. Same as Same as [UP-D30-R05] [GA-D30-R04], [PR-D30-R08]
- [SM-D30-R04] Scope of application of the EU data protection framework and, in particular, of the Directive 95/46/EC principles: The WP29 recalls that under the EU data protection legal framework, and in particular under the Directive (Article 4(1)), Member States laws apply not only to the processing operations carried out by data controllers established on their territory, but also where data controllers (although not established in the EU), make use of equipment situated on EU territory, in particular for the collection of personal data. As a consequence, EU Member State law applies to any processing that takes place prior to the transfer to the U.S., either in the context of activities of an organisation established in the EU or through the use of equipment situated in the EU used by an organisation not established in the EU. pg. 12; Same as [UP-D30-R10] [DE-D30-R04] [CM-D30-R06]
- [SM-D30-R05] Privacy Shield documents make use of terminology that is not consistent with the vocabulary generally used in the EU when dealing with data protection. This is not necessarily a problem, as long as it is clear what the corresponding terminology under EU law (and under U.S. law) would be. The WP29 regrets to note however this is not the case, including in the draft adequacy decision. For example, the word 'access' is used in chapter 3 of the draft adequacy decision in a sense that implies the collection of personal data, instead of allowing someone to see data that is already collected. Access by companies to the data and the individuals' right of access are two separate notions that should not be confused. pg. 13
- [SM-D30-R06] 4.2.4 Effective remedies need to be available to the individual. As mentioned before, "The protection under the Fourth Amendment does not extend to non-U.S. persons that are not resident in the United States" This means that a non-U.S. person would not be able to challenge warrants or subpoenas in Court invoking the Fourth Amendment. The draft adequacy decision specifies that non-U.S. persons benefit indirectly through the protection afforded to the U.S. companies holding the personal data and who are the recipients of law enforcement requests. The WP29 however notes that, even if this protection were effective, it does not mean that effective remedies are available to individuals, since the subject of the right to an effective remedy in this scenario seems to be the company receiving the request of access, and not the individual whose data is at issue. pg. 55
- [SM-D32-R01] The specifications below are recommended requirements for registries. These requirements include an independently-tested, functioning Database and Communications System that:
 - [SM-D32-R02] Is both robust (24 hours per day, 365 days per year) and scalable (i.e., capable of handling high volumes of entries and inquiries)
 - [SM-D32-R03] Has multiple high-throughput (i.e., at least T1) connections to the Internet via at least two separate Internet Service Providers.
 - [SM-D32-R04] Includes a daily data backup and archiving system.

[SM-D32-R05] Incorporates a record management system that maintains copies of all transactions, correspondence, and communications with registrars for at least the length of a registration contract.

[SM-D32-R06] Features a searchable, on-line database meeting the requirements of [NTIA Green Paper] Appendix 2.

[SM-D32-R07] [Provides for] an adequate number (perhaps two or three) of globally-positioned zone-file servers connected to the Internet for each TLD.

[SM-D32-R08] The specifications below are recommended requirements for registrars. These requirements include a functioning Database and Communications System that supports:

[SM-D32-R09] Robust and scalable operations capable of handling moderate volumes

[SM-D32-R10] Multiple connections to the Internet via at least two Internet Service Providers

[SM-D32-R11] A daily data backup and archival system

[SM-D32-R12] A record management system that maintains copies of all transactions, correspondence, and communications with all registries for at least the length of a registration contract.

[SM-D32-R13] The specifications below are recommended requirements for registries. These requirements include an independently-inspected Physical Sites that feature:

[SM-D32-R14] A backup power system including a multi-day power source.

[SM-D32-R15] A high level of security due to twenty-four-hour guards and appropriate physical safeguards against intruders. (may also apply to Privacy)

[SM-D32-R16] A remotely-located, fully redundant and staffed twin facility with "hot switchover" capability in the event of a main facility failure caused by either a natural disaster (e.g., earthquake or tornado) or an accidental (fire, burst pipe) or deliberate (arson, bomb) man-made event. (This might be provided at, or jointly supported with, another registry, which would encourage compatibility of hardware and commonality of interfaces.)

[SM-D32-R17] The specifications below are recommended requirements for registrars. These requirements include an independently-inspected Physical Sites that feature:

[SM-D32-R18] A backup power system.

[SM-D32-R19] A high level of security due to twenty-four-hour guards and appropriate physical safeguards against intruders. (may also apply to Privacy charter question)

[SM-D32-R20] Remotely-stored backup files to permit recreation of customer records.

- [SM-D33-R01] The NTIA's White and Green Papers set out four principles to guide the evolution of the domain name system: stability, competition, private bottom-up coordination, and representation. These principles presumably also apply to the design of any gTLD registration directory service.
- [SM-D42-R04] RFC 7482, Section 3, Path Segment Specification, specifies "The base URLs used to construct RDAP queries are maintained in an IANA registry described in [RFC7484]." This provides a *possible* requirement: A registration directory service must be able to form queries using provider-specific information maintained in an IANA registry.
- [SM-D42-R05] RFC 7482, Section 3.1.6, Help Path Segment Specification, specifies "The help path segment can be used to request helpful information (command syntax, terms of service, privacy policy, rate-limiting policy, supported authentication methods, supported extensions, technical support contact, etc.) from an RDAP server." This provides a *possible* requirement: A registration directory service must provide an online help facility that describes how to use the service.
- [SM-D42-R06] RFC 7482, Section 3.2, Search Path Segment Specification, specifies "The resource type path segments for search are..." This provides a *possible* requirement: A registration directory service must provide a search facility for domain names, name servers, and entities in addition to a basic lookup facility.
- [SM-D42-R07] RFC 7482, Section 5, Extensibility, specifies "This document describes path segment specifications for a limited number of objects commonly registered in both RIRs and DNRs. It does not attempt to describe path segments for all of the objects registered in all registries." This provides a *possible* requirement: It must be possible to add new features to a registration directory service.
- [SM-D42-R08] RFC 7482, Section 6, Internationalization Considerations, specifies "There is value in supporting the ability to submit either a U-label (Unicode form of an IDN label) or an A-label (US-ASCII form of an IDN label) as a query argument to an RDAP service." This provides a *possible* requirement:
 - A registration directory service must support queries using both the A-label and U-label forms of an Internationalized Domain Name (IDN) label; and
 - A registration directory service must be able to return domain name and name server variants in response to IDN queries.
- [SM-D46-R01] A synchronized gTLD registration directory services system model is recommended by EWG to provide a single point of uniformly-controlled and logged access to domain or contact/registrant data from registries, registrars and validators.
- [SM-D46-R02] A synchronized gTLD registration directory services system model should receive registration data via EPP from a thick registry or validator in real time.
- [SM-D46-R03] A synchronized gTLD registration directory services system model does NOT require a centralized database containing all gTLD registration data. It may be deployed diverse data centers for robustness and high performance.
- [SM-D46-R04] Compared to a federated gTLD registration directory services system model, a synchronized model is recommended to provide "one stop shopping" which is uniform and reduces confusion for users

- [SM-D46-R05] Compared to a federated gTLD registration directory services system model, a synchronized model is recommended to reduce costs especially for Reverse Queries or WhoWas data.
- [SM-D46-R06] Compared to a federated gTLD registration directory services system model, a synchronized model provides no greater security risk of attack, abuse or exposure of sensitive data. "The argument that the [registration directory service] would create a giant database of extremely sensitive data that would be heavily attacked simply doesn't hold much water when examined with these real-world, risk-based factors in mind."
- [SM-D54-R01] According to SAC051, the ICANN community should evaluate and adopt a replacement domain name registration data access protocol that supports the query and display of internationalized registration data.
- [SM-D60-R01] According to Scott Hollenbeck's blog on RDS protocol requirements, the protocol should provide Standardized command structures
- [SM-D60-R02] The RDS protocol should provide Standardized output and error structures
- [SM-D60-R03] The RDS protocol should provide Support for internationalization and localization
- [SM-D60-R04] The RDS protocol should provide Support for user identification, authentication, and access control
- [SM-D60-R05] The RDS protocol should [require that] Registrars and Registries must implement RDAP
- [SM-D61-R01] According to Carlton Samuels' blog on building a better WHOIS for individual registrants, [there should be] a single RDS interface, not outsourced to registries, registrars, resellers or third-party systems. "Registrants will have one place to access their data to see what RDS users can learn about them"
- [SM-D62-R01] There should be uniform presentation of data across all registrars or registries
- [SM-D62-R02] Regarding new plan for transatlantic data protection (i.e., Privacy Shield) to replace the annulled Safe Harbor mechanism WG should recognize this work is going on and keep track of its progress as it is applied to possible requirements for data protection
- [SM-D62-R03] In existing WHOIS there wasn't a clear interface to access registration data it is a requirement to have a clear interface that makes access easier (i.e., restful API)
- [SM-D62-R04] There should be a fast real-time way to see whether a domain name has been registered through a proxy service provider or has privacy protection. This could ease up concerns about domains having information omitted
- [SM-D63-R01] According to Outreach #2 Responses from the RySG, Procedures must be implemented to prevent leaks of RDS data.
- [SM-D63-R02] Procedures must be established to investigate potential breaches of security in RDS data storage system.

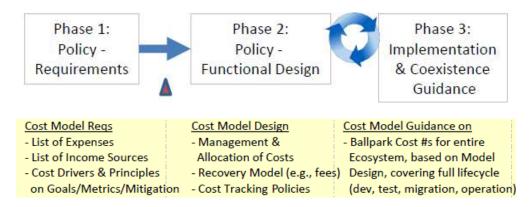

[SM-D63-R03] Centralized/decentralized design should be published ahead of the implementation

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of **possible** requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Cost (CS)

The following **possible** requirements address the charter question on Cost (CS): What costs will be incurred & how must they be covered?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any **prerequisites or dependencies** contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet **Phase 1** policy requirements should be considered in **Phase 2**, while implementation or coexistence guidance for Phase 2 policies should be considered in **Phase 3** In addition, an initial attempt has been made to **group similar requirements by code (C) and keyword (K)**, allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	PRS IN THIS SECTION NOT YET TRIAGED – TO BE DONE AFTER FUNDAMENTAL QUESTIONS	Depends on			

- [CS-D01-R##] Draw from Cost Principles 175-180 on page 117 [TO DO – COPY/PASTE EWG Principles 175-180 HERE]
- [CS-D10-R01] The actual cost of validation is dependent on many factors that need to be considered at the same time. Some of these factors are the cost of developing and deploying automation where applicable, the cost of a single validation, the cost of repeating the validation, and the cost of maintaining the information and infrastructure necessary to support the process of validation. (Page 9)
- [CS-D10-R02] Verifying whether or not an E.164 conformant phone number can be called requires attempting to connect to it using either the PSTN or the Signaling System No. 7 (SS7) network. both methods may incur charges. (Page 12)
- [CS-D10-R03] When a cellular number is verified with the use of the Short Message Service (SMS), having a registrant call from a particular number may pose problems for those that use corporate direct inward dialing (DID) lines where outbound calls are automatically mapped to the main corporate number, frequently without the knowledge of the person making the call. both may incur charges for either the sender or receiver or both. (Page 12)
- [CS-D10-R04] Within the G20 major economies, about eight have highly accurate address information. While the information is available it is expensive and each country has a different procedure for normalizing an address, which must be done before it can be checked against a postal address database. (Page 13)
- [CS-D10-R05] There is a large upfront cost in the beginning as nothing is validated. As registrants are validated the number of unverified registrants drops significantly, and thus costs for subsequent years might be more directly related to the validity periods, i.e., the frequency at which data must be revalidated. (Page 14)
- [CS-D10-R06] There are economies of scale for validation: costs of per contact data element validation drops as more contacts are validated. (Page 14)
- [CS-D10-R07] In EPP registries, registrars are free to create and manage multiple contact objects that refer to the same individual. Thus, the cost of validating the contact data associated with a domain name may be the cost of validating each contact object. However, from an operational cost and registrant experience perspective, validation of a registrant associated with multiple domains might not require each domain's contact data elements to be re-validated if the registrant's contact data elements are the same for each domain name. (Page 14)
- [CS-D12-R01] Design of the [gTLD registration directory service] should take into account the costs incurred by registrars, registries and data consumers. (sec. 5.6)
- [CS-D26-R01] According to the <u>Directive (46)</u>, whereas the protection of the rights and freedoms of data subjects with regard to the processing of personal data requires that appropriate technical and organizational measures be taken, both at the time of the design of the processing system and at the time of the processing itself, particularly in order to maintain security and thereby to prevent any unauthorized processing; whereas it is incumbent on the Member States to ensure that controllers comply with these measures; whereas these measures must ensure an appropriate level of security, taking into account the state of the art and the costs of their implementation in relation to the risks inherent in the processing and the nature of the data to be protected; Same as [CM-D26-R07] [SM-D26-R05]

- [CS-D26-R02] According to the <u>Directive (53)</u>, whereas, however, certain processing operation are likely to pose specific risks to the rights and freedoms of data subjects by virtue of their nature, their scope or their purposes, such as that of excluding individuals from a right, benefit or a contract, or by virtue of the specific use of new technologies; whereas it is for Member States, if they so wish, to specify such risks in their legislation; Same as [CM-D26-R08]
- [CS-D26-R03] According to the <u>Directive (54)</u>, whereas with regard to all the processing undertaken in society, the amount posing such specific risks should be very limited; whereas Member States must provide that the supervisory authority, or the data protection official in cooperation with the authority, check such processing prior to it being carried out; Same as [CM-D26-R09]
- [CS-D26-R04] According to the <u>Directive (56)</u>, whereas cross-border flows of personal data are necessary to the expansion of international trade; whereas the protection of individuals guaranteed in the Community by this Directive does not stand in the way of transfers of personal data to third countries which ensure an adequate level of protection; whereas the adequacy of the level of protection afforded by a third country must be assessed in the light of all the circumstances surrounding the transfer operation or set of transfer operations; Same as [GA-D26-R04] [UP-D26-R13]
- [CS-D26-R05] According to the <u>Directive (64)</u>, whereas the authorities in the different Member States will need to assist one another in performing their duties so as to ensure that the rules of protection are properly respected throughout the European Union;
- [CS-D30-R01] Given the amount of data transfers that take place between the EU and the U.S. on a daily basis, which the WP29 recognises is a vital part of the economy on both sides of the Atlantic, legal clarity is needed sooner rather than later. pg. 12
- [CS-D34-R01] [gTLD registration directory services policies must consider this question:] What are the costs to Registrars, Registrars, Registrants and ICANN, of creating a centralized system?
- [CS-D34-R02] [gTLD registration directory services policies must consider this question:] What are the costs to Registrars, Registrars, Registrants and ICANN, of creating gated access to a centralized (or more centralized) system that may provide access to law enforcement or lawyers who are acting beyond or outside their jurisdiction in seeking the information or the person, company or organization for whom that domain name registration data is posted?
- [CS-D34-R03] [gTLD registration directory services policies must consider this question:] What are the costs to Registrars, Registrars, Registrants and ICANN, of creating gated access to a centralized or more centralized system that may provide access to law enforcement who is specifically seeking to investigate or enforce criminal laws regarding conduct online that is not illegal in the country of the Registrar or the Registrant?

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of **possible** requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Benefits (BE)

The following *possible* requirements address the charter question on benefits (BE):

What benefits will be achieved & how will they be measured?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any **prerequisites or dependencies** contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet **Phase 1** policy requirements should be considered in **Phase 2**, while implementation or coexistence guidance for Phase 2 policies should be considered in **Phase 3**. In addition, an initial attempt has been made to **group similar requirements by code (C) and keyword (K)**, allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	PRS IN THIS SECTION NOT YET TRIAGED – TO BE DONE AFTER FUNDAMENTAL QUESTIONS	Depends on			

[BE-D01-R01] The gTLD registration directory service must provide these benefits:

[INSERT EWG Key benefits listed in Section d on pages 67-68]

[BE-D01-R02] ". . the provision of purpose-based contacts by Registrants must lead to significant improvements in reachability of appropriate contacts for various purposes and creates an incentive for Registrants to provide accurate information for those roles.

[BE-D01-R03] Gated access to more sensitive data elements must reduce Registrant incentive to supply inaccurate data and increase Registrant accountability for data accuracy." (bottom of p.68)

[BE-D01-R04] "Pre-validation of Registrant or other contact information [must result in measurable benefits, including]:

[BE-D01-R05] Increase accuracy of contact information by utilizing pre-validation to check data prior to use for a new domain name and to promote consistent data across all registrations (reduces error and fraud);

[BE-D01-R06] Avoid the need to validate Registrant or other designated contact data each time a Registrant registers a new domain name by performing validation once and then reusing that block of contact data for several domain registrations (simplifies the process and reduces work requirements); and

[BE-D01-R07] Avoid delay in the processing of a domain registration, since validation has to take place at the time of registration." (Section a on p.69)

[BE-D01-R08] "To allow for much greater accuracy across such a diverse space and ease-of-use for such contacts, mechanisms [must be provided] to allow easy use of such contacts by multiple Registrants; for example, a web hosting company providing their NOC's unique ID for "technical" and "abuse" contacts for domains controlled by their customers." (bottom of p.69)

[Also included as a requirement for DA Question]

[BE-D01-R09] ". . when an entity needs to update their contact information to reflect a new address/phone number or a merger/acquisition, it must be easy to update that information in one place and have that reflected to all domains associated with that contact data set" (Top of p.70) [Also included as a requirement for DA Question]

[BE-D01-R10] The gTLD registration directory service must provide these benefits:

[TO DO: INSERT EWG Summary of Data Quality Key benefits from Section h on pp. 79-80]

[BE-D01-R11] The gTLD registration directory service must provide these benefits:

[TO DO: INSERT EWG Advantages from all of page 108]

[BE-D01-R12] The gTLD registration directory service must provide benefits compared to Current Whois under the 2013 RAA, including... [TO DO: INSERT EWG Section b, pp.118-119]

[BE-D10-R01] From a technical perspective, certain verification measures can be taken to reduce unintentional errors by registrants; for example, a formal data structure and strong typing of data (e.g., this field must be Arabic numbers only, this field must be alphabetical characters only) can reduce certain typographical errors. Enforcing mandatory submission of data for key data fields may reduce cases where users omit information. (Page 14)

- [BE-D10-R02] The use of automated techniques may necessitate an initial investment but the long-term improvement in the quality and accuracy of registration data will be substantial. (Page 15)
- [BE-D19-R01] based on the ICANN Governmental Advisory Committee (GAC) proposed principles, "gTLD [registration directory] services should provide (...) data (...) in a manner that supports the stability, reliability, security, and global interoperability of the Internet, from both a technical and public trust perspective (...)" (para 3.3),
- [BE-D23-R01] When we share personal data with others, we usually have an expectation about the purposes for which the data will be used. There is a value in honouring these expectations and preserving trust and legal certainty, which is why purpose limitation is such an important safeguard, a cornerstone of data protection. Indeed, the principle of purpose limitation inhibits 'mission creep', which could otherwise give rise to the usage of the available personal data beyond the purposes for which they were initially collected. Same as [UP-D23-R02]
- [BE-D23-R02] [The following potential benefit must be assessed:] "Article 8 of the European Convention on Human Rights focuses on the protection of private life, and requires justification for any interference with privacy. This approach is based on a general prohibition of interference with the right of privacy and allows exceptions only under strictly defined conditions. In cases where there is 'interference with privacy' a legal basis is required, as well as the specification of a legitimate purpose as a precondition to assess the necessity of the interference." p. 7.
- [BE-D26-R01] According to the <u>Directive</u>, whereas data-processing systems are designed to serve man; whereas they must, whatever the nationality or residence of natural persons, respect their fundamental rights and freedoms, notably the right to privacy, and contribute to economic and social progress, trade expansion and the well-being of individuals; p.2 Same as [UP-D26-R01] [PR-D26-R01].
- [BE-D29-R01] "The EU Data Protection <u>Directive</u> requires data controllers to observe a number of principles when they process personal data. These principles not only protect the rights of those about whom the data is collected ("data subjects") but also reflect good business practices that contribute to reliable and efficient data processing."
- [BE-D30-R01] Given the amount of data transfers that take place between the EU and the U.S. on a daily basis, which the WP29 recognises is a vital part of the economy on both sides of the Atlantic, legal clarity is needed sooner rather than later. pg. 12
- [BE-D37-R01] If [gTLD registration directory services policies] include provisions that [provide registration data to] those seeking to access [gTLD domain name registrant's] names and/or physical locations for the purpose of harming the speaker of unpopular or minority ideas (be they individual or organizational) (see U.S. Supreme Court Case McIntyre v. Ohio Elections Commission cited in [PR-D37-R03]), [any such policies must assess] the risk to Registrant stakeholders. (See also [RI-D37-R01])

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of *possible* requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Risks (RI)

The following **possible** requirements address the charter question on Risks (RI):

What risks do stakeholders face & how will they be reconciled?

The process framework for this question (below) can be applied to categorize *possible requirements* into three phases:

In the grid below, we identify the *possible requirement* for WG deliberation, any **prerequisites or dependencies** contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet **Phase 1** policy requirements should be considered in **Phase 2**, while implementation or coexistence guidance for Phase 2 policies should be considered in **Phase 3**. In addition, an initial attempt has been made to **group similar requirements by code (C) and keyword (K)**, allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	К
	PRs IN THIS SECTION NOT YET TRIAGED – TO BE DONE AFTER FUNDAMENTAL QUESTIONS	Depends on			
					1
					l

[RI-D01-R01] "A widely scoped risk/impact analysis [must be done] to confirm that these principle-based [data element] classifications do in fact result in appropriate collection and disclosure of data for defined purposes." (p.56 & in Section c on pp.119-120)

[RI-D01-R02] [TO DO – ADD FURTHER REQUIREMENTS FROM EWG Risk Analysis Section?]

- [RI-D02-R01] "The ICANN board should ensure that a formal security risk assessment of the registration data policy be conducted as an input into the Policy Development Process. A separate security risk assessment should also be conducted regarding the implementation of the policy."
- [RI-D10-R01] Registration data often contain "stale" contact information and that this problem can cause difficulties when registrants seek to renew a domain name or modify DNS information. Stale information may prevent registrars from notifying a registrant that a domain registration is about to expire or that changes, possibly unauthorized, have been made to his domain registration. Failure to update information may result in domain hijacking or a dispute over the "ownership" of a domain. (Page 6)
- [RI-D10-R02] Since current access to registration data is public and anonymous, some individuals and businesses submit incorrect information because they do not wish their contact information to be collected and used by miscreants as targets for spam and other attacks. (Page 6)
- [RI-D10-R03] Some people intentionally submit false information because they do not wish to disclose personal contact information that can be accessed publicly and anonymously. (Page 6)
- [RI-D10-R04] Miscreants intentionally provide false information to obfuscate identification by law enforcement or parties that investigate malicious use of domains. (Page 7)
- [RI-D10-R05] Current registration requirements take a minimalist approach to validation. Unless credit verification measures are stringently applied for all levels of payment, little or no additional proof of identity and verification of contact information is required when a user registers a domain name. (Page 8)
- [RI-D10-R06] Users may mistype when registering domain names. The current validation processes can overlook errors. (Page 8)
- [RI-D10-R07] Users may not understand the consequences of the registration data accuracy program and annual obligation to maintain accurate and complete registration data. They also may refuse to take time to check that their contact information is current, or reject the notion that they will forfeit a domain registration simply because some registration data are inaccurate. (Page 8)
- [RI-D10-R08] If an email address is verified requiring explicit user action upon receiving a verification email (such as clicking on a web link or replying to the message in a specific way), the timing of the verification email message will need to be carefully considered as to how it affects the overall registration process. Sending the verification email as an integral part of the registration process would alter the business process and may affect registration costs. Sending the verification email after registration would risk being ignored by the registrant or could introduce an attack vector. A miscreant, knowing that these verification emails will be sent, could initiate various types of man-in-the-middle attacks. Past security research has shown that such spear-phishing attacks are highly effective. (Page 11)
- [RI-D10-R09] Existence of a postal address in a database does not guarantee that the physical address exists (e.g. apartment numbers in the United State Postal Service address database are indicated as a range. As a result, an address may validate as accurate and complete when in fact it is undeliverable). (Page 13)

- [RI-D19-R01] based on the ICANN Governmental Advisory Committee (GAC) proposed principles, "The GAC recognizes that there are also legitimate concerns about the misuse of WHOIS [registration] data and conflicts with national laws and regulations, in particular applicable privacy and data protection laws" (para 2.2) (see [PR-D19-R01] and [PR-D19-R02])
- [RI-D23-R01] [The following potential risk must be assessed:] "Processing of personal data in a way incompatible with the purposes specified at collection is against the law and therefore prohibited. The data controller cannot legitimise incompatible processing by simply relying on a new legal ground in Article 7. The purpose limitation principle can only be restricted subject to the conditions set forth in Article 13 of the [European Data Protection] Directive."
- [RI-D25-R01] Given the Council of Europe's Treaty 108 on Data Protections, Articles 5 and 6 (cited in [PR-D25-R03] and [PR-D25-R04]), a question that must be asked is: What Risks will Registrars, Registries and ICANN face if they are (a) collecting data, (b) processing data, and (c) shipping to other countries data that is not in compliance with Treaty 108?
- [RI-D26-R01] According to the <u>Directive (9)</u>, whereas, given the equivalent protection resulting from the approximation of national laws, the Member States will no longer be able to inhibit the free movement between them of personal data on grounds relating to protection of the rights and freedoms of individuals, and in particular the right to privacy; whereas Member States will be left a margin for manoeuvre, which may, in the context of implementation of the Directive, also be exercised by the business and social partners; whereas Member States will therefore be able to specify in their national law the general conditions governing the lawfulness of data processing; whereas in doing so the Member States shall strive to improve the protection currently provided by their legislation; whereas, within the limits of this margin for manoeuvre and in accordance with Community law, disparities could arise in the implementation of the Directive, and this could have an effect on the movement of data within a Member State as well as within the Community;
- [RI-D30-R01] because the Privacy Shield will also be used to transfer data outside the US, the WP29 insists that onward transfers from a Privacy Shield entity to third country recipients should provide the same level of protection on all aspects of the Shield (including national security) and should not lead to lower or circumvent EU data protection principles pg 3
- [RI-D30-R02] The WP29 recalls its long-standing position that massive and indiscriminate surveillance of individuals can never be considered as proportionate and strictly necessary in a democratic society, as is required under the protection offered by the applicable fundamental rights. Additionally, comprehensive oversight of all surveillance programmes is crucial.pg 4; Same as [UP-D30-R01] [SM-D30-R01]
- [RI-D30-R03] WP29 stresses that any interference with the fundamental rights to private life and data protection need to be justifiable in a democratic society. The CJEU criticised the fact that the Safe Harbour decision did not contain any finding regarding the existence, in the United States, of rules adopted by the State intended to limit any interference. Nor does it refer to the existence of effective legal protection against interference of that kind.pg 11; Same as [UP-D30-R04] [GA-D30-R03] [DE-D30-R03] [PR-D30-R07] [CX-D30-R02] [SM-D30-R02]
- [RI-D30-R04] Privacy Shield documents make use of terminology that is not consistent with the vocabulary generally used in the EU when dealing with data protection. This is not necessarily a problem, as long as it is clear what the corresponding terminology under EU law (and under U.S. law) would be. The WP29 regrets to note however this is not the case, including in the draft adequacy decision. For example, the word 'access' is used in chapter 3 of the draft adequacy

- decision in a sense that implies the collection of personal data, instead of allowing someone to see data that is already collected. Access by companies to the data and the individuals' right of access are two separate notions that should not be confused. pg 13
- [RI-D30-R05] A violation of the Privacy Shield principles might go unnoticed for a long period of time and might only be detected after serious harm has been caused to the data subject's fundamental rights, possibly beyond repair. Hence, this approach might contravene the European precautionary principle. pg. 30
- [RI-D34-R01] [gTLD registration directory services policies must assess] the risks to ICANN, Registrars and Registries of creating gated access to a centralized (or more centralized) system of hundreds of millions of gTLD registrations if the data is accessed illegally or accessed legally and then misused? To what extent might fundamental data protection and privacy rights be deemed violated by national laws, treaties, constitutions or other legal provisions, and who would be accountable?
- [RI-D35-R01] The Constitution of the State of California (USA)'s Right to Privacy states that "In contrast to the right to privacy recognized in the U.S. Constitution which requires state action, the right to privacy under California law is generally understood to encompass actions by private individuals and entities which violate a privacy right." [citing Dorsey & Whitney LLP, A primer on California privacy law] If [gTLD registration directory services policies] include provisions that violate the privacy rights of California's citizens, [any such policies must assess] the risk to Registrars, Registries and ICANN.
- [RI-D36-R01] If [gTLD registration directory services policies] include provisions that violate the privacy rights of Massachusetts's citizens (see Massachusetts Right of Privacy cited in [PR-D36-R01]), [any such policies must assess] the risk to Registrars, Registries and ICANN.
- [RI-D37-R01] If [gTLD registration directory services policies] include provisions that [provide registration data to] those seeking to access [gTLD domain name registrant's] names and/or physical locations for the purpose of harming the speaker of unpopular or minority ideas (be they individual or organizational) (see U.S. Supreme Court Case McIntyre v. Ohio Elections Commission cited in [PR-D37-R03]), [any such policies must assess] the risk to Registrant stakeholders.
- [RI-D53-R01] In the Singapore GAC Communiqué of March 27, 2014, GAC reiterates its advice that allowing singular and plural versions of the same strings could lead to consumer harm. Permitting this practice risks confusing internet users and could making users more vulnerable to deceptive practices that exploit this confusion. (Page 5)

See Additional Key Inputs for this charter question (<u>hyperlinked on this Wiki page</u>) which may be consulted as a potential source of **possible** requirements. The PDP WG may also identify additional sources by themselves or through community outreach.

Other Questions (OQ)

The following *possible* requirements would apply to a totally new next-generation registration directory service or a modification of the existing WHOIS system, but may not belong under any of the 11 charter questions. During deliberation, the WG may determine these *possible* requirements are in fact already covered under other questions, or the WG may decide that questions(s) should be added to the charter to fill gaps.

In the grid below, we identify the *possible requirement* for WG deliberation, any prerequisites or dependencies contained in that *possible requirement*, and whether the *possible requirement* therefore falls into Phase 1, 2, or 3. Policies designed to meet Phase 1 policy requirements should be considered in Phase 2, while implementation or coexistence guidance for Phase 2 policies should be considered in Phase 3. In addition, an initial attempt has been made to group similar requirements by code (C) and keyword (K), allowing the table to be easily re-sorted or filtered – see Annex B for definitions.

QQ-D#-R#	Possible Requirement	Prerequisites/Dependencies	Ph	С	K
	PRS IN THIS SECTION NOT YET TRIAGED – TO BE DONE AFTER FUNDAMENTAL QUESTIONS	Depends on			

[OQ-D01-R01] "Provides appropriate access to accurate, reliable, and uniform registration data" (p.7)

[OQ-D01-R02] gTLD registration directory services must provide for "accountability for all parties involved in the disclosure and use of gTLD domain name registration data." (p.10). [This can be done by:]

[OQ-D01-R03] "Logging all access to gTLD registration data, including unauthenticated access to public data elements, to enable detection and mitigation of abuses; =

[OQ-D01-R04] "Gating access to more sensitive data elements that would only be available to requestors who applied for and were accredited to receive gTLD registration data access, at the level appropriate for each user and stated purpose; and

[OQ-D01-R05] "Auditing both public and gated data access to minimize abuse and impose penalties and other remedies for inappropriate use, in accordance with terms and conditions explicitly agreed upon by each requestor."

- [OQ-D01-R06] A "centralized interface must enable appropriate requestors to access registration information across all gTLDs, including unauthenticated public data access and authenticated gated data access." (p.14)
- [OQ-D04-R01] The [gTLD registration directory service] must foster cyberpeace. Cyberspace will be destroyed by cyberwar and cyber surveillance if privacy is not respected online. Cyberspace will not be a peaceful sphere if the [gTLD registration directory service] enables, in any form, threats posed by terrorists, the activities of some States, organised crime, and/or corporations acting illegitimately.
- [OQ-D17-R01] based on the WHOIS Expired Domain Deletion Policy, Section 3.7.5.2, which states: "Where Registrar chooses, under extenuating circumstances, to renew a domain name without the explicit consent of the registrant, the registrar must maintain a record of the extenuating circumstances associated with

renewing that specific domain name for inspection by ICANN consistent with clauses 3.4.2 and 3.4.3 of this registrar accreditation agreement, " the following additional *possible* requirement is suggested:

- [OQ-D17-R02] The Registrar must get consent from the domain owner to renew the domain. In case the registrar chooses to renew the domain without consent of the domain owner then the domain owner may not be held liable for the costs unless there is a mutual agreement between the Domain owner and the Registrant on specific terms. (Despite the fact that the registrant has reason for extenuating circumstances.)
- [OQ-D17-R03] The WHOIS Expired Domain Deletion Policy, Sections 3.7.5.4 through 3.7.5.6, require the Registrar to provide notice to each new registrant describing the details of their deletion and auto-renewal policy, to operate a website for domain name registration or renewal clearly displaying the details of the Registrar's deletion and auto-renewal policies, and to state, both at the time of registration and in a clear place on its website, any fee charged for the recovery of a domain name during the Redemption Grace Period. based on these sections, the following additional *possible* requirement is suggested:
 - [OQ-D17-R04] Domain owners (including those who would like to have temporal domains) should be granted an option to alert the Registrar of intentions not to renew a domain so as to let it expire and be left in the loop.
- [OQ-D17-R05] The WHOIS Expired Domain Deletion Policy, Sections 3.7.5.7, requires that "In the event that a domain which is the subject of a UDRP dispute is deleted or expires during the course of the dispute, the complainant in the UDRP dispute will have the option to renew or restore the name under the same commercial terms as the registrant. If the complainant renews or restores the name, the name will be placed in Registrar HOLD and Registrar LOCK status, the WHOIS contact information for the registrant will be removed, and the WHOIS entry will indicate that the name is subject to dispute. If the complaint is terminated, or the UDRP dispute finds against the complainant, the name will be deleted within 45 days. The registrant retains the right under the existing redemption grace period provisions to recover the name at any time during the Redemption Grace Period, and retains the right to renew the name before it is deleted." based on this section, the following additional *possible* requirement is suggested:
 - [OQ-D17-R06] WHOIS content [associated with] a domain which has been considered Expired or Deleted (after the agreed expiry time even after the grace period) should be hidden by the registrar to protect the identity of former owners who do not need to associate with a domain that has expired or deleted. This should be done with consent of the Domain owner.
- [OQ-D24-R01] based on the Article 29 WP's Opinion 06/2014 on the notion of legitimate interests of the data controller under Article 7 of Directive 95/46/EC, the following possible requirements apply to Data Controllers.
- [OQ-D24-R02] Article 7 [of Directive 95/46/EC] requires that personal data shall only be processed if at least one of six legal grounds listed in that Article apply. In particular, personal data shall only be processed (a) based on the data subject's unambiguous consent; or if briefly put processing is necessary for:
 - (b) Performance of a contract with the data subject;
 - (c) Compliance with a legal obligation imposed on the controller;
 - (d) Protection of the vital interests of the data subject;
 - (e) Performance of a task carried out in the public interest; or

- (f) Legitimate interests pursued by the controller, subject to an additional balancing test against the data subject's rights and interests.
- [OQ-D24-R03] The Work Programme itself clearly stated two objectives: 'ensuring the correct implementation of the current legal framework' and also 'preparing for the future'.
- [OQ-D24-R04] Article 8 of the European Convention on Human Rights, adopted in 1950, incorporates the right to privacy i.e. respect for everyone's private and family life, home and correspondence. It prohibits any interference with the right to privacy except if 'in accordance with the law' and 'necessary in a democratic society' in order to satisfy certain types of specifically listed, compelling public interests.
- [OQ-D24-R05] Article 8 of the European Convention on Human Rights focuses on the protection of private life, and requires justification for any interference with privacy. This approach is based on a general prohibition of interference with the right of privacy and allows exceptions only under strictly defined conditions. In cases where there is 'interference with privacy' a legal basis is required, as well as the specification of a legitimate purpose as a precondition to assess the necessity of the interference.
- [OQ-D24-R06] The Charter [of?] enshrines the protection of personal data as a fundamental right under Article 8 of the European Convention on Human Rights, which is distinct from the respect for private and family life under Article 7 7 [of Directive 95/46/EC]. Article 8 of the European Convention on Human Rights lays down the requirement for a legitimate basis for the processing. In particular, it provides that personal data must be processed 'on the basis of the consent of the person concerned or some other legitimate basis laid down by law'. These provisions reinforce both the importance of the principle of lawfulness and the need for an adequate legal basis for the processing of personal data.
- [OQ-D24-R07] This Section III [of Opinion 4/2014] provides a brief overview of each of the legal grounds in Article 7(a) through (e) [of Directive 95/46/EC], before the Opinion focuses, in Section III, on Article 7(f) [of Directive 95/46/EC]. This analysis will also highlight some of the most common interfaces between these legal grounds, for instance involving 'contract', 'legal obligation' and 'legitimate interest', depending upon the particular context and the facts of the case.
- [OQ-D24-R08] It has an important role, but this does not exclude the possibility, depending on the context, that other legal grounds may be more appropriate either from the controller's or from the data subject's perspective. If it is correctly used, consent is a tool giving the data subject control over the processing of his data. If incorrectly used, the data subject's control becomes illusory and consent constitutes an inappropriate basis for processing.
- [OQ-D24-R09] "Clarification should aim at emphasizing that unambiguous consent requires the use of mechanisms that leave no doubt of the data subject's intention to consent. At the same time it should be made clear that the use of default options which the data subject is required to modify in order to reject the processing (consent based on silence) does not in itself constitute unambiguous consent. This is especially true in the on-line environment." It also required data controllers to put in place mechanisms to demonstrate consent (within a general accountability obligation) and requested the legislator to add an explicit requirement regarding the quality and accessibility of the information forming the basis for consent.
- [OQ-D24-R10] There is a clear connection here between the assessment of necessity and compliance with the purpose limitation principle. It is important to determine the exact *rationale* of the contract, i.e. its substance and fundamental objective, as it is against this that it will be tested whether the data processing is necessary for its performance. In some borderline situations it may be arguable, or may require more specific fact-finding to determine whether processing is necessary for the performance of the contract.

- [OQ-D24-R11] Fraud prevention which may include, among others, monitoring and profiling customers is another typical area, which is likely to be considered as going beyond what is necessary for the performance of a contract. Such processing could then still be legitimate under another ground of Article 7 [of Directive 95/46/EC], for instance, consent where appropriate, a legal obligation or the legitimate interest of the controller (Article 7(a), (c) or (f)). In the latter case, the processing should be subject to additional safeguards and measures to adequately protect the interests or rights and freedoms of data subjects. Article 7(b) only applies to what is necessary for the *performance* of a contract. It does not apply to all further actions triggered by non-compliance or to all other incidents in the execution of a contract. As long as processing covers the normal execution of a contract, it could fall within Article 7(b).
- [OQ-D24-R12] Article 7(d) [of Directive 95/46/EC] provides for a legal ground in situations where 'processing is necessary in order to protect the vital interests of the data subject'. This wording is different to the language used in Article 8(2)(c) [of the European Convention on Human Rights] which is more specific and refers to situations where 'processing is necessary to protect the vital interests of the data subject or of another person where the data subject is physically or legally incapable of giving his consent'.
- [OQ-D24-R13] Recital 27 of this Regulation 45/2001 provides that 'processing of personal data for the performance of tasks carried out *in the public interest* by the Community institutions and bodies includes the processing of personal data necessary for the management and functioning of those institutions and bodies.' This provision thus allows data processing on a broadly interpreted 'public task' ground in a large variety of cases, which could have otherwise been covered by a provision similar to Article 7(f) [of Directive 95/46/EC]. This includes:
 - [OQ-D24-R14] Assessing which legal ground may potentially apply under Article 7(a)-(f). Data processing can be implemented only if one or more of the six grounds (a) through (f) of Article 7 [of Directive 95/46/EC] applies (different grounds can be relied on at different stages of the same processing activity).
 - [OQ-D24-R15] Qualifying an interest as 'legitimate' or 'illegitimate' To be considered as legitimate, an interest must cumulatively fulfil the following conditions:
 - be lawful (i.e. in accordance with EU and national law);
 - be sufficiently clearly articulated to allow the balancing test to be carried out against the interests and fundamental rights of the data subject (i.e. sufficiently concrete);
 - represent a real and present interest (i.e. not be speculative).
 - [OQ-D24-R16] Determining whether the processing is necessary to achieve the interest pursued To meet this requirement, consider whether there are other less invasive means to reach the identified purpose of the processing and serve the legitimate interest of the data controller.
 - [OQ-D24-R17] Establishing a provisional balance by assessing whether the data controller's interest is overridden by the fundamental rights or interests of the data subjects -
 - Consider the nature of the interests of the controller (fundamental right, other type of interest, public interest);
 - Evaluate the possible prejudice suffered by the controller, by third parties or the broader community if the data processing does not take place;
 - Take into account the nature of the data (sensitive in a strict or broader sense?);

- Consider the status of the data subject (minor, employee, etc.) and of the controller (e.g. whether a business organisation is in a dominant market position);
- Take into account the way data are processed (large scale, data mining, profiling, disclosure to a large number of people or publication);
- Identify the fundamental rights and/or interests of the data subject that could be impacted;
- Consider data subjects' reasonable expectations;
- Evaluate impacts on the data subject and compare with the benefit expected from the processing by the data controller.

[OQ-D24-R18] Establishing a final balance by taking into account additional safeguards Identify and implement appropriate additional safeguards resulting from the duty of care and diligence such as:

- data minimisation (e.g. strict limitations on the collection of data, or immediate deletion of data after use)
- technical and organisational measures to ensure that the data cannot be used to take decisions or other actions with respect to individuals ('functional separation')
- wide use of anonymisation techniques, aggregation of data, privacy-enhancing technologies, privacy by design, privacy and data protection impact assessments;
- increased transparency, general and unconditional right to object (opt-out), data portability & related measures to empower data subjects.

[OQ-D24-R19] Demonstrat[ing] compliance and ensur[ing] transparency [by] draw[ing] a blueprint of steps 1 to 5 to justify the processing before its launch -

- Inform data subjects of the reasons for believing the balance tips in the controller's favour.
- Keep documentation available to data protection authorities.

[OQ-D24-R20] What if the data subject exercises his/her right to object?

- Where only a qualified right to opt-out is available as a safeguard (this is explicitly required under Article 14(a) [of Directive 95/46/EC] as a minimum safeguard):- in case the data subject objects to the processing, it should be ensured that an appropriate and user-friendly mechanism is in place to reassess the balance as for the individual concerned and stop processing his/her data if the re-assessment shows that his/her interests prevail.
- Where an unconditional right to opt-out is provided as an additional safeguard (either because this is explicitly required under Article 14(b) [of Directive 95/46/EC] or because this is otherwise deemed a necessary or helpful additional safeguard):- in case the data subject objects to the processing, it should be ensured that this choice is respected, without the need to take any further step or assessment.

[OQ-D25-R01] How can policy requirements for [gTLD registration directory services] be created to be in compliance with the detailed requirements of the Council of Europe's Treaty 108 on Data Protections – and particularly its Articles 1, 5, 6, 12 and 14. [Note: Refer to [FQ-D25] for a list of possible requirements which cite those Articles and their legal requirements.]

[OQ-D28-R01] Is ICANN a Data Controller under the rules of the Data Protection Directive and other materials before this Working Group? "Data controllers determine 'the purposes and the means of the processing of personal data'. This applies to both public and private sectors." If so, what are ICANN's requirements

- regarding a [gTLD registration] directory in which data is collected, processed and shared according to its contracts and agreements? Variant of [PR-D28-R03] [UP-D28-R04]
- [OQ-D28-R02] How can this PDP WG help ICANN review the key question of whether it is a Data Controller under EU and other Data Protection Laws and if so, how its obligations, responsibilities and liabilities are part of a [gTLD registration] directory and obligations it may impose on Registries and Registrars via contract and agreement?
- [OQ-D54-R01] According to SAC051, the ICANN community should adopt standardized terminology to disambiguate WHOIS-related discussion. WHOIS should only be used to reference the protocol defined in RFC 3912. SSAC proposes: (1) domain name registration data the data provided by registrants when registering a domain name, (2) domain name registration data access protocol the components of a standard communications exchange that specify access to registration data (e.g., WHOIS, RDAP), (3) domain name registration data directory service the service offered by domain name registries and registrars to implement the access protocol and to provide access to registration data.
- [OQ-D62-R01] Having fewer requirements might be helpful. One way to do that is to not include possible requirements where there may be a better alternative to achieve the result in a better way.

Foundational Questions (FQ)

This section contains *possible* answers provided by key inputs to the charter's foundational questions:

- Is a new policy framework and next-generation RDS needed to address these requirements?
- If no, does the current WHOIS policy framework sufficiently address these requirements?
- If not, what revisions are recommended to the current WHOIS policy framework to do so?
- [FQ-D01] Abandon today's Whois model: "The EWG unanimously recommends abandoning today's WHOIS model of giving every user the same entirely anonymous public access to (often inaccurate) gTLD registration data." (p.5)
- [FQ-D25] ICANN's [gTLD registration directory service] policy [must] be shaped to be in compliance with the detailed requirements of the Council of Europe's Treaty 108 on Data Protections and particularly its Articles 1, 5, 6, 12 and 14, and their specific requirements. [Note: Requirements given by Articles 1, 5, and 6 can be found in [UP-D25-R02] [UP/PR-D25-R03] [PR-D25-R04]. Article 12 states provisions that "shall apply to the transfer across national borders, by whatever medium, of personal data undergoing automatic processing or collected with a view to their being automatically processed." Article 14, Assistance to data subjects resident abroad, states that "Each Party shall assist any person resident abroad to exercise the rights conferred by its domestic law giving effect to the principles set out in Article 8 of this convention." (This requirement may belong in "Other Questions" see also [OQ-D25-R01])

Additional Key Input Documents (hyperlinked) to be inserted here as requirements are added.

Document titles and hyperlinks will be copied from (or as necessary, added to) these WG Wiki pages:

Key Input Documents and Questions posed by the Charter.

Assignments still underway as of 11 September include:

- Final Report from the Working Group on Internationalized Registration Data (2015)
- Final Report from the Expert Working Group on Internationalized Registration Data (2015)
- GNSO PDP on Translation/Transliteration of Contact Information and Final Report (2015)
- GNSO PDP on Privacy & Proxy Services Accreditation Issues (PPSAI), Final Report, and GNSO Council Recommendations to board (2015)
- Final Regulation (EU) 2016/679 of the European Parliament and of the Council (27 April 2016)
- IWG Common Position on Privacy and Data Protection aspects of the Registration of Domain Names on the Internet (Crete, 4./5.05.2000)
- Privacy Considerations for Internet Protocols (RFC 6973) (2013)

Annex B. Group and Coding Definitions

Coding (C) Column – Hierarchical codes that can be FILTERED to select subsets of possible requirements.

The table below provides a proposed coding of possible requirements to organize them into hierarchical groups to aid in deliberation.

The PDP WG may refine or add to the initial coding values below to examine new subsets.

	Code (C) Name	Code (C) Definition
Α	Goals of System	PRs describing goals of RDS
AA	Transparency	PRs relating to transparency
AB	Differentiated (Gated) Access	PRs relating to differentiated or tiered access
		(see the "Gated Access" Charter Question)
AC	Authoritative Data	PRs relating to the goal of ensuring the reliability of the data, or the holdings most likely to be authoritative
AD	Accountability	PRs relating to the goal of accountability of the management of RDS
В	Functions	PRs relating to a broad range of functions of the RDS, or activities that are envisaged as taking place with the data
ВА	Search & Query	PRs relating to the function of searching and querying in the RDS
ВВ	Certification & Authorization	PRs relating to certification functions with the RDS ecosystem, including potential end users and contracted
		parties
ВС	Compliance	PRs relating to compliance with contractual or policy requirements
		(see "Compliance" Charter Question)
С	Potential Use of Data	PRs relating to the broad spectrum of potential use of the registration data
		(see "Purpose" Charter Question)
CA	Research	PRs related to research, including market research, legal research, consumer protection, academic, etc.
СВ	Surveillance	PRs related to the broad use of RDS for surveillance purposes, including surveillance for compliance, for
		spotting cyber abuse, IP and trademark trends, etc.
CC	Investigation	PRs related to investigation, including LE, IP rights holders & agents, & cyber-security
D	Data Elements	PRs related to the data elements themselves
		(see "Data Elements" Charter Question)
DA	Contactability	PRs related to the characteristic of contactability, across a range of data elements
DB	Accuracy	PRs related to the characteristic of accuracy in data
		(see "Data Accuracy" Charter Question)
E	Legal Requirements	PRs related to legal requirements, in the broad sense, referring to statutes and treaties but not contracts

	Code (C) Name	Code (C) Definition
EA	Privacy & DP Law	PRs related to privacy and data protection law, including relevant aspects of human rights law and other
		sectoral statutes (eg. telecom law)
		(see "Privacy" Charter Question)
EB	IP Law	PRs related to IP and trademark law
EC	Jurisdiction Issues	PRs related to jurisdictional issues, cross border enforcement of law, etc.
ED	Free Expression	PRs related to the right of free expression, whether established in sectoral statutes or charters of rights.
F	Technical Requirements	PRs related to the technical requirements of the system and its various components
		(see "System Model" Charter Question)
G	Security Requirements	PRs related to security requirements, including technical and organizational security issues.
Н	Confidentiality Requirements	PRs related to the duty of confidentiality and related issues, other than as required by data protection law (eg.
		could include policy and best practice)
1	ICANN Policies	PRs that relate to existing or desired ICANN policy writ large
IA	Policy Issues	PRs that relate to specific policy issues
IB	Registrar Transfer	PRs that relate to registrar transfer issues
IC	RPM	PRs that relate to rights protection measures specified by ICANN
ID	Privacy/Proxy	PRs that relate to the Privacy/Proxy services policy and associated issues
J	Contractual Issues	PRs that relate to contractual requirements and issues
K	Implementation Issues	PRs that relate to implementation issues associated with the RDS
		(see "Phase 3" for each Charter Question)
KA	Cost	PRs that relate to cost issues associated with the implementation of new or existing RDS policy
		(includes policy set through RAA) (see "Cost" Charter Question)
L	Abuse & Mitigations	PRs related to abuse issues and the mitigations deemed necessary
М	Risk	PRs related to a broad set of risks associated with the RDS, including anticipated change in policy
		(see "Risk" Charter Question)
MA	Registrants' Risk	PRs related to the risks of registrants
MB	Trademark & IP Owners' Risk	PRs related to the risks of trademark and IP owners
MC	Contracted Parties Risk	PRs related to the risks of contracted parties
MD	Governments Risk	PRs related to the risks of governments, notably LEAs

Keyword (K) Column – Tags or keywords that can be FILTERED to group similar possible requirements into subsets.

The table below describes how proposed keywords were applied to group related possible requirements. Note that each possible requirement may be mapped to more than one keyword, and letters were assigned sequentially to keywords during mapping – for example, "aa" is not a subgroup of "a" - it is just the next letter assigned after "z." The PDP WG may refine or add to the initial keyword values below to examine new subsets.

	Keyword (K) Name	Keyword (K) Definition
а	Purpose	Any PR that describes a purpose for data in the RDS or why defining purpose is important
b	Contact Data for Technical Resolution	Any PR that describes how registration data is used for resolving a technical issue
С	Registration Data Query, Search and Disclosure	Any PR that describes searching for registration data
d	Policy Needs	Any PR that describes a possible registration data or directory policy (existing or future)
е	Identifying own Data & Access	Any PR that describes the need for registrants to review registrant's own information
f	Contact Data for other than Technical Resolution	Any PR that describes using contact information for reasons other than listed in B.
g	Proxy	Any PR that describes a need for or use of privacy proxy services or processes
h	Extensibility	Any PR that describes a need for RDS policies and implementation to be extensible
i	Research (other than for legal investigation)	Any PR that describes research of registration data for purposes other than legal
		investigations.
j	Legal Investigation	Any PR that describes research of registration data for legal investigations.
k	Registrar Transfer Policy	Any PR that describes policies for the inter-registrar transfer of registration data.
1	Consent	Any PR that describes to a need for a data subject's consent
m	Controller/Processor/Processing or	Any PR that describes the obligations of a data controller or obligations of a data processor
	Transfer of Data	
n	Accuracy of Data	Any PR that describes the need for accurate registration data, validation policies or accuracy
		incentives
0	Retention of Data	Any PR that describes registration data retention needs or policies
р	Use of data for Surveillance	Any PR that includes the word "surveillance." (This WP 29 PR could be grouped with
		proportionality but I created this group due to the sensitivity of surveillance)
q	Law Enforcement Investigation	Any PR that contains the words "law enforcement authority" or "law enforcement access."
r	Proportionality of Use of Data	Any PR that refers to the word "Proportionality" or "proportional"
S	Gated Data Access	Any PR describes a need for controlled or restricted access to registration data.
t	Public Data Access	Any PR that describes a need for public (unrestricted) access to registration data.
u	Access Policies,	Any PR that describes policies that control registration data access and/or authentication for
	including Authenticated Access	that access. (in reviewing anything that was mapped to U should be mapped to D)
V	Abuse	Any PR that contains the word "Abuse"

	Keyword (K) Name	Keyword (K) Definition
Χ	Encryption	Any PR that describes the need for registration data encryption or confidentiality
У	Internationalization	Any PR that describes the need for internationalization of the registration data (e.g.,
		translation, transliteration)
Z	Audit or Logging	Any PR that describes the need for auditing or logging of registration data collection, access,
		update, and use.
aa	Validation of Contact Data	Any PR that describes a need or policy for validating contact data
ab		Any PR that describes any law or jurisdictional issue that may pertain to registration data or
au	Applicable Law	directory services.
ac	Certification Authority	Any PR that describes a need for entities, including CA's, to validate registrant contact data
	(or any third party that has duty to validate)	to provide an ancillary service that depends on trustworthy identities?
ad	Transparency	Any PR that describes a need for domain name registration transparency
ae	Validators	Any PR that describes a need for or obligations of a registration data validator
af	Contact Validation & Agreement	Any PR that describes how contact data is or may be validated and the associated contractual
		issues.
ag	Cost	Any PR that references the word "cost."
ah	Unique Contact Data	Any PR that describes a need for unique contact data or associated policies.
ai	Synchronized	Any PR that describes a need for registration data synchronization
aj	Authoritative Data	Any PR that describes a policy or need for a definition of authoritative registration data
ak	Stability Data Elements	Any PR that describes a policy pertaining to stability or consistency in registration data
		access?
al	Display	Any PR that describes how registration data is displayed to users
am	Format	Any PR that describes a standard format for data elements
an	Account information that is	Any PR that describes data in a domain name registrant's account that is not (today)
	not RDS Data Elements	considered gTLD WHOIS registration data
ao	Registrar Data Elements	Any PR that describes the need or policy for data elements that are supplied by a registrar
ар	Nameserver Data Elements	Any PR that describes the need or policy for Nameserver data elements
aq	RPM	Any PR that describes the need or policy for Domain Name System Rights protection
		Mechanisms (RPM) as it relates to registration data
ar	Registrar Access	Any PR that describes the need or policy for registrar access to specific data elements.
as	Privacy/Control of Data	Any PR that describes the need or policy for registrant privacy and control of their own registration data.

	Keyword (K) Name	Keyword (K) Definition
at	Notice to Data Owner	Any PR that describes a need or policy for registrants to be notified of activity related to
		registration data.
au	Accountability for Use of Data	Any PR that describes a need or policy for some entity to be "accountable."
av	Terms & Conditions	Any PR that describes a need or policy for terms and conditions to be associated with
		registration data collection, maintenance, or access.
ax	Geographical Location of Data	Any PR that describes a need for RDS policy that takes the geographical location of data
		storage or data subject into consideration.
ay	Contract	Any PR that describes an existing or possible requirement imposed by a contract, including
		registrar agreements, registry agreements, and other contracts associated with registration
		data.
az	Responsibility of Domain Name Registrant	Any PR that describes responsibilities of domain name registrants.
ba	Right to Privacy	Any PR that refers to the registrant's "right of privacy."
bb	Aggregated Data	Applied to a PR taken from a WP29 document regarding use of aggregated data. Could be
		combined with another group but called out to ensure this somewhat unique PR would not
		be overlooked.
