ICANN|56 | POLICY HELSINKI | FORUM 27-30 June 2016

About Ajitora

Ajitora is a Tx2 Ambassador and a PR character of DotAsia (http://www.ajitora.asia). Tx2 is supported by WWF, Global Tiger Forum (GTF), TRAFFIC, etc., and a vision by the 13 tiger range countries (*China, India, Malaysia, Indonesia, Thailand, Cambodia, Vietnam, Nepal, Laos, Bhutan, Bangladesh, Myanmar and Russia*) to #doubletigers in the wild by 2022, the next year of the tiger.

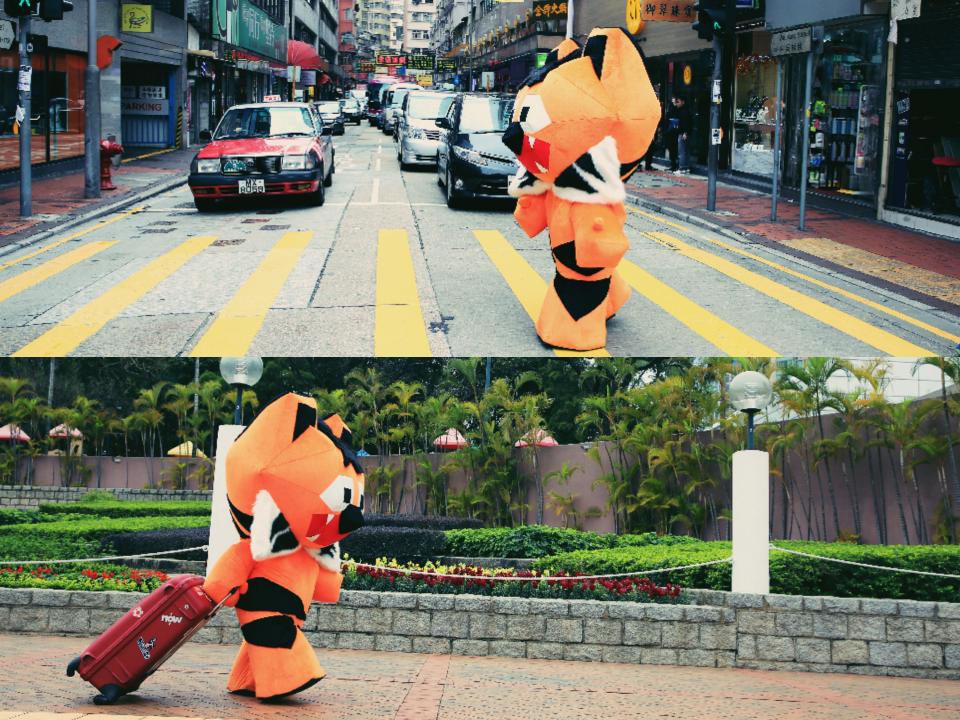

The Internet is the #1 threat to wild

tigers. Proliferation of illegal wildlife trade online coupled with abusive mining of social media data for criminal poaching and deforestation, threaten the survival of tigers and other wildlife. Ajitora is the center point of a multi-dimensional campaign from technology, Internet governance policy, to consumer market engagement.

Tigers are a symbol for Asia. The Ajitora

movement and Tx2 are not only about tigers, but about bringing awareness of how we are all connected for sustainable development and a collaborative Asia. As the Asian Tiger economies roar forward in the Asia Century ahead, our wildlife, technology and policy environments should be Roaring Forward Together!

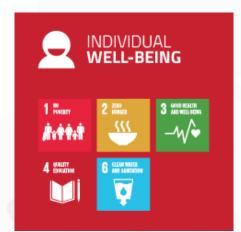

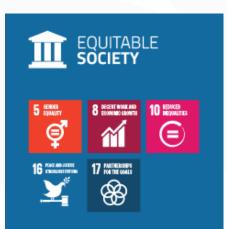

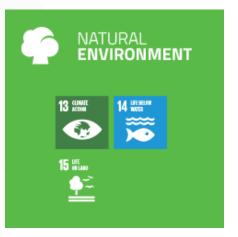

What Does "Universal Acceptance" Mean?

DISPLAY

Software and online services support Universal Acceptance when they offer the capabilities listed above for all domains and email names.

Universal Acceptance (UA) is the state where all valid domain names and email addresses are accepted, validated, stored, processed and displayed correctly and consistently by all Internet-enabled applications, devices and systems. Due to the rapidly changing domain name landscape, many systems do not recognize or appropriately process new domain names, primarily because they may be more than three characters in length or in a non-ASCII format. The same is true for email addresses that incorporate these new extensions.

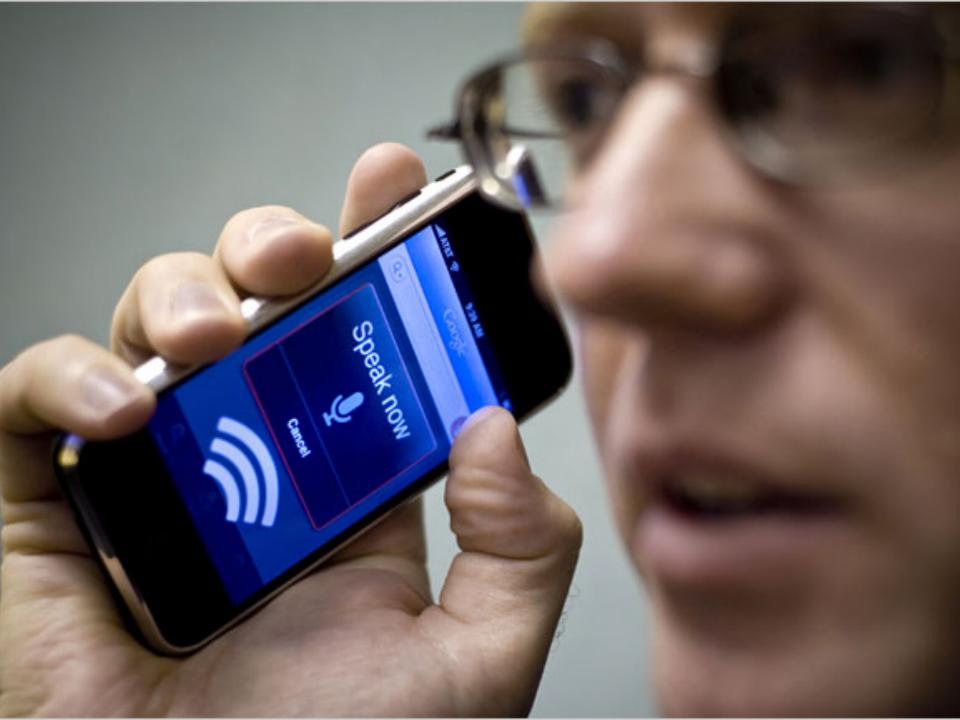

The Universal Acceptance Steering Group (UASG), established by Internet Corporation for Assigned Names and Numbers (ICANN), is a communityled, industry-wide initiative working on creating awareness and identifying and resolving problems associated with the universal acceptance of domain names. The purpose of these efforts is to help ensure a consistent and positive experience for Internet users globally.

For more information on the UASG and recent developments, visit: https://goo.gl/k8Byax.
