

I understand the AASC is to select representatives of ALAC in order to represent At-Large and all the end-users' interest within ICANN. I am now serving my 2nd term as an ALAC member. I fully understand ICANN's mission and its structure, as well as the interests of various parties within this multi-stakeholder organization. Also, throughout my entire career, I have worked to defend consumers' interests as a regulatory policy researcher. Thus, not only I will be able to select the right people for this purpose, but my logical thinking and economic background will help a lot in this process.

Thank you.
