

I am part of ICANN, CENTR and region IG activities from the very beginning of 2010. Previous like registry representative, now like member and founder of civil society organization that participate like ALS within EURALO, ICANN fellow and SEEDIG fellow. Because of my regular job, I have limited resources to be regularly more active in some other working groups, and this remote participation enable me to be part of ALAC activities. My experience from my professional career (engineer and manager) helps me also to be more effective in AASC.

I want to say thank You to all, that I have opportunity to continue my work in AASC.

Regards,
Nenad Marinkovic
