1. What does "/" mean in Recommendation 2? OR or AND? ("...data fields should be stored and displayed in a way that indicates what language(s)/script(s) have been used by the registered name holder.")

- Option 1: OR
  Language OR script must be identified

- Option 2: AND
  Language AND script must be identified

2. How are scripts to be identified?

- Option 1: Unicode script property (automated detection)
- Option 2: RFC 5646 subtag

3. How are languages to be identified?

- Option 1: RFC 5646 subtag
- Option 2: Language inference left to discretion of transforming party

**T/T Recommendations**

**T/T Validation**

---

**Data Provisioning**

---

**Validation of script tag by inference**

- Option 1: Inferred by registrar or registry
  - Method of inference left to discretion of registrar or registry
  - Method of inference should be subject to additional policy discussion

- Option 2: Provided by registrant

**Minimum version of Unicode should be recommended for script detection**

- Option 1: RFC 5646 shall not be used in generating script tags
  - Use of the private use subtag under "langtag" in RFC 5646 shall be permitted
  - Method of inference should be subject to additional policy discussion

**General private use language tags**

- Method of inference should be subject to additional policy discussion

**T/T Recommendations**

- Use of the private use subtag under "langtag" in RFC 5646 shall be permitted
