

## Open Topics

Look at METRICS available in ICANN. Of the recommended 66 IAG-CCT metrics, 44 are related to Trust issues. But so far ICANN is reporting trust metrics (of which 60% are reported to be important-available). Those 9 metrics are basically Chapter V. Compliance Metrics regarding the Annex 2 of the Final recommendations on metrics from 26 September 2014. At least those reported 9 metrics should be topics related to them.

Can we see less DNS abuse in the new gTLDs? **Drew (lead), Fabro, Calvin**

### What has not yet been reported by ICANN directly

IP claims
Reported data security breaches
Takedowns
Spam in new gTLDs
Fraudulent transactions
Phishing
Botnets and malware
Identity fraud
Complaints to LEAs

## Safeguards & PICs

### Can Safeguards/DNS Abuse

Can safeguards be fully implemented? **Laureen (lead), Carlos, Calvin**

Can safeguards help to prevent DNS abuse? **Drew (lead), Fabro, Calvin**

Can registry operators comply with the safeguards? **Fabro (lead), Carlton, David**

My feeling is that this will be the main group of ideas for our chapter of the report. While some material comes out of the literature research, my feeling is that we will have to face all this issues with the goring compliance CCT reporting output of ICANN itself, in particular the "compliance" chapter
