TOC

- Korean Internet governance mechanism

- Worst Practice in Korean Internet governance

- 2 Best Practices in Korean Internet governance

Korean Internet governance mechanism

Decision
- Government

Management
- KISA 한국인터넷진흥원 Korea Internet & Security Agency

Consulting
- Internet Address Policy Deliberation Committee (legal, 4 times for 1 year)
- Korea Internet Governance Alliance / Sub-committee on Address resources (voluntary, every month)

What is best practice? Or, worst?

- Decision making process
  : Consensus base (bottom-up) vs. Top-down

- Appointment process of major policy committee
  : Bottom-up vs. Top-down

- How about relationship between government and private sector?

- Support on voluntary private sector activities

Worst Practice in Korean Internet governance

- Enactment on Internet Address Resources Act

- 2002~2004

- Gap between government and private sector

- Final decision ：Top-down style by government,
                    NO consensus base

- Result：voluntary private sector activities become weak

Best Practice in Korean Internet governance (1)

- Practical subcommittee of Internet Address Policy Deliberation Committee (legal organization for policy development)

- 2005~2006

- Complementation of top-down structure

- Participation of voluntary basis

- Limitation : relationship of government

Best Practice in Korean Internet governance (2)

- Development of Domain registration policy
  on new top-level IDN '.한국' (meaning 'Korea')

- 2010

- voluntary working group activities on 1 year
  (Internet Address Policy Forum, casual organization)

- Support of KISA & Government

- Best Practice of Bottom-up process
