

Michelle DeSmyter:Dear All, Welcome to the New gTLD Subsequent Procedures Working Group, Thursday, 08 September 2016 at 3:00 UTC

Michelle DeSmyter:Wiki Member page:

<https://community.icann.org/x/Ogp1Aw>

Michelle DeSmyter:Agenda page:

<https://community.icann.org/x/ohWsAw>

Kavouss Arasteh:Hi every body

Jeff Neuman:hello Kavouss. Thanks for being on so early in your day

Kavouss Arasteh:PLS KINDLY ADVISE TO DIAL ME UP

Kavouss Arasteh:Hello jeff

Kavouss Arasteh:Pls advise for dial up

Michelle DeSmyter:Hi there Kavouss - the operator should be dialing you in the next minute or so

Jeff Neuman:Can we put a link up to the cc1 document on the right side of the screen

Emily Barabas:Yes, one moment.

Emily Barabas:we will also bring it up the AC room.

Jeff Neuman:2 minute warning :)

Cheryl Langdon-Orr (CLO):Jeff I am still waiting for my dial out so only in the AC Room ATM but I will be audio enabled at some stage I assume ;-)

Philip Corwin:Greetings colleagues

Kavouss Arasteh:Dear Chair

Cheryl Langdon-Orr (CLO):Hi Philip

Kavouss Arasteh:pls put the document disussing on the screen

Philip Corwin:Hello Cheryl. Hope all is smashing ;-)

Jeff Neuman:All - Just waitng for operator to start the recording :)

Kavouss Arasteh:It is a very inconvenient widdow

Cheryl Langdon-Orr (CLO):All just fine here in AU thanks Phil

Philip Corwin:There's no way I can read anything in that window...larger font please

Kavouss Arasteh:can you make tjhe doc. more bigger

Avri Doria:you shaould have also received the PDF in the email on the list.

Steve Chan:It's also available as a link on the right-hand side:

<https://community.icann.org/pages/viewpage.action?pageId=59645660&preview=/59645660/61611352/CC1%20Review%20Tool%20SubPro%20PDP%20WG%2029%20August%202016.pdf>

Emily Barabas:Everyone should be able to zoom on this document using the plus and minus signs at the bottom of window

Emily Barabas:And scroll up and down, left and right as needed

Kavouss Arasteh:TOO FAST SPEAKING

Sara Bockey:Sorry Kavouss! I was trying to speak slowly. I'll do better next time.

Michael Flemming:I need to call in

Alan Greenberg:That link seems to open with the wiki viewer. One that goes directly to the PDF is <https://community.icann.org/download/attachments/59645660/CC1%20Review%20Tool%20SubPro%20PDP%20WG%2029%20August%202016.pdf?version=1&modificationDate=1473257877000&api=v2>

Emily Barabas:Thanks Alan, I will correct in the agenda, as well

Michael Flemming:Hi Julie, its two "m"s in the last name, thanks

Michael Flemming:For the sake of the Notes

Michael Flemming:I am called in

Kavouss Arasteh:Why the provided document is so much congested in font

Julie Hedlund:@Micheal -- Got it!

Julie Hedlund:Sorry Michael!

Cheryl Langdon-Orr (CLO):It is of course an *excellent* time slot for Asia Pac

Cheryl Langdon-Orr (CLO):we normally get to attend ICANN Calls between 0100 and 0500 local times

Justine Chew:This time slot is under exceptional circumstances, no?

Justine Chew:Yes, CLO, this is an EXCELLENT time slot for Asia Pac. :-)

Cheryl Langdon-Orr (CLO):we can of course find other times suitable for APAC and less painful for other Rwgions *but* I do need to note APAC usually gets to have the 'bad end of the stick

Cheryl Langdon-Orr (CLO):bad end of the stick it should read

Kavouss Arasteh:you are very very kind and your actions are highly appreciated

Kiran Malancharuvil:Taking a middle of the night call every once in a while is a necessary evil with ICANN.

Tom Dale (ACIG GAC Secretariat):@CLO There is an Australian expression "Rough end of the pineapple"

Kavouss Arasteh:Pls kindly do not chategorize European attendees UNFLEXIBLE

Michael Flemming:I did not use such words, but thank you.

Emily Barabas:The original versions of all comments are available on the wiki:

<https://community.icann.org/pages/viewpage.action?pageId=59645660>

Donna Austin, Neustar:Of course this only becomes more difficult in a few weeks time with daylight saving changes.

Jian Zhang_KNET:@Emily the two 800 tele numbers do NOT work

Jeff Neuman:Thanks for the reminder Donna :)

Jian Zhang_KNET:only the 400 numbers work... I mean China numbers

Kavouss Arasteh:Let us review the matter to make it more convenient ,if possible

Kavouss Arasteh:Be positive

Emily Barabas:We will work on making the document more readable for those who would like to print

Kurt Pritz:@ Tom Dale: which end is the rough end? they both seem unpleasant

Tom Dale (ACIG GAC Secretariat):@kurt Pritz, I just report the idiom, I cannot speak from experience.

Emily Barabas:Jian -- were you able to dial in or are you still having trouble?

Jeff Neuman>Welcome Back Steve!

Emily Barabas>Welcome back Steve!

Emily Barabas:We missed you!

Donna Austin, Neustar>Welcome back Steve

Steve Chan:THANK YOU EMILY AND JULIE!!

Jeff Neuman:+1 Avri - Emily and Julie did great to help us over the weeks

Julie Hedlund:@Avri -- Special thanks to Emily!

Cheryl Langdon-Orr (CLO):Well said Avri ++++

Sara Bockey:Yes, thank you Emily and Julie! Welcome back Steve

Kavouss Arasteh:Avri,

Kavouss Arasteh:Pls advise whether the doc, you are referring is on the screen

Steve Chan:@Kavouss, yes, we are on line 1c.R1

Kavouss Arasteh:is that O.R1?

Steve Chan:1c, top of page 3

Emily Barabas:For those who prefer to view this document in excel, it is now on the wiki here:
<https://community.icann.org/pages/viewpage.action?pageId=59645660>

Donna Austin, Neustar:I think the GAC has made some suggestions, we could potentially build on that.

Julie Hedlund:@Avri -- Tom Dale has his hand up

Tom Dale (ACIG GAC Secretariat):Diversity is also an issue for CCWG-ACC WS2

Donna Austin, Neustar:I think the IPC comments were addressing consumer trust

Jeff Neuman:Diversity in registrants is but one form of diversity. But diversity in usage by consumers is another.

Michael Flemming:Dotbrand even in itself is not just a one way usage, the use of the TLD itself has a very diverse ecosystem.

Paul McGrady:Diversity needs to be defined in a way that includes new uses other than just more sales of second levels.

Jeff Neuman:@Paul - Agree. Emily, can we reflect that in the notes

Michael Flemming:+1

Emily Barabas:Yes, we will make sure it is captured

Julie Hedlund:@Jeff: I am taking the notes and will include it.

Greg Shatan:I support Paul's comment.

Paul McGrady:+1 Kristina.

Kavouss Arasteh:It would good if we have a non exhaustive list of diversity

Kristina Rosette (Amazon Registry):+1 to Avri (streamlining application process could increase diversity)

Cheryl Langdon-Orr (CLO):Indeed Jian

Jeff Neuman:Good point Jian....

Michael Flemming:Should we look at diversity from a Community standpoint, as well?

Kristina Rosette (Amazon Registry):Definitely, Jian. Lottery (priority number) preference to IDN applications demonstrated that, I think.

Jeff Neuman:I think we should collectively offer a definition of diversity in the full group and then farm out certain portions that relate to the Work Tracks

Kavouss Arasteh:Did you decide to have list of diversity so far discussed

Michael Flemming:Agreed, diversity will extend across all of the individual Work Tracks.

Jeff Neuman:@Kavouss - I believe that we should offer our own list of diversity factors (and should make that an action item)

Jian Zhang_KNET:@Jeff agree!

Cheryl Langdon-Orr (CLO):Yup

Jeff Neuman:Kavouss said it better than I did :)

Donna Austin, Neustar:I think I'd just say that I think it largely supports what Kavouss said.

Jeff Neuman:I agree that the comments that were submitted were pretty clear.

Greg Shatan:you read it well, Avri.

Paul McGrady:Well writtem + late at night for many = a quiet crowd.

Michael Flemming:Yes

Jeff Neuman:yes

Donna Austin, Neustar:Kavouss asks a good question. 1229 registry agreements have been executed to date.

Kavouss Arasteh:wE BADLY HERAING YOU AS THERE IS A SUBSTANTIAL LEVEL OF hum

Julie Hedlund:@Kavouss: Staff are trying to capture the summary in the chat.

Kavouss Arasteh:Thank for clarication Grec and Jeff

Paul McGrady:@Donna, perhaps but contracts aren't the same thing as use. Perhaps .brands would be further along if we didn't have to spend months and months just getting recognized as distinct category via Spec. 13.

Donna Austin, Neustar:@Paul, agreed but it is one measure of where we are in the process.

Michael Flemming:So we have to highly consider "benefits" in the relative aspect of how categorized TLDs use them. Looking at the application process and where we are at in that to start measuring benefit cannot be done equally across the spectrum.

Paul McGrady:@Jeff, how about concrete issues such as if we end up with the scale of applications some have mentioned (10,000?), which will create new pressures on Staff.

Kristina Rosette (Amazon Registry):Not to put words in the IPC's mouth, but were they referring to reasonably foreseeable?

Jeff Neuman:@kristina - Probably....but just trying to make sure

Kristina Rosette (Amazon Registry):Would be helpful to get that clarification. Paul? Greg?

Greg Shatan:We should also identify corner cases that weren't anticipated but did occur.

Jeff Neuman:We should highlight all cases we did not anticipate that actually happened...agree

Paul McGrady:e.g. "Surprise! No closed generics after all."

Jeff Neuman:Paul - IMO that was reasonably foreseeable :)

Paul McGrady:surprise

Paul McGrady:Exactly.

Jeff Neuman:But spending 1.5 years debating what we would do if someone applied for .murder, .terrorism or .nazi was a little overkill :)

Kavouss Arasteh:if the session is continued , I am disconnected

Kristina Rosette (Amazon Registry):I have a vague recollection of the Fast Track ccTLD IDN process not being so fast. Am I remembering correctly?

Jeff Neuman:Pun definitely NOT intended

Greg Shatan:Oy.

Paul McGrady:It wasn't foreseeable that ICANN would do a 180 on it, but all of the chaos caused by gaps/late opportunities to adjust the Guidebook after application window closed should have been foreseeable and locked down before publication. Let's not make the same mistake.

Jian Zhang_KNET:The fast track ccTLD IDN was supposed to move faster...

Donna Austin, Neustar:@Kristina, the non-policy process was fast, but perhaps the take-up was not so fast.

Kristina Rosette (Amazon Registry):Apologies if I've missed it,

but will we circle back once we get ALAC and NCSG input?

Jian Zhang_KNET:That's a lesson we should learn

Emily Barabas:Monday 19 September 19 at 15:00 UTC

Avri Doria:we will circle back in any case and will fold in any new comments at that time. at least that is the way i see it.

Kristina Rosette (Amazon Registry):Thanks, Avri.

Sara Bockey:Thank you all!

Cheryl Langdon-Orr (CLO):Good Call thanks everyone Talk again soon (probabkly in a WT session ... Bye for now then...

Paul McGrady:Thanks Avri Great call!

Tom Dale (ACIG GAC Secretariat):Thanks.

Michael Flemming:thx

Greg Shatan:tx & bye!
