Michelle DeSmyter:Dear All, Welcome to the Rights Protection Mechanisms (RPMs) TMCH Sub Team Meeting.

Michelle DeSmyter:Agenda: https://community.icann.org/x/IRqsAw

Kathy:Hi All

Michelle DeSmyter:Hello Kathy, welcome!

Kathy:Hi Mcihelle, Happy Friday!

David Tait:We'll give it one more minute before we start

Michelle DeSmyter:You as well! :)

Kurt Pritz:I am in the car using my hot spot connections, which might somewhat .... spotty

Jeff Neuman:Hello all.....I am on Adobe, but only for about 15 minutes...then just on phone

Kurt Pritz:I think there is little or no data that can be collected on nquestion umber 1 - as you point out

Edward Morris:Thanks Susan.

Michelle DeSmyter:Welcome Vaibhav!

Kurt Pritz:On question2: I think you identified the correct three "sub-questions" but the sub-questions aren't really asking for data

Vaibhav Aggarwal:He Michelle

Kristine Dorrain - Amazon Registry:Hi everyone. I have been on the call for a few minutes, but now made it successfully online.

Vaibhav Aggarwal:Sorry I have been trying to get in the room and I am not able to as Adobe is extreamly not working

Vaibhav Aggarwal::-(

Vaibhav Aggarwal:I am here now

Vaibhav Aggarwal:also Dailed in

Michelle DeSmyter:glad to have you both on - let me know if either of you run into any issues and I can certainly try to help

Kristine Dorrain - Amazon Registry:Point of action: Under Data Gathering, add "Analysis Group report"

Kurt Pritz:FOr example: with regard to claims, the specific data we might request is the abandoonment rate in claim vs abandonment after the claims period is over

David Tait:Yes the document is unsynched

Vaibhav Aggarwal::-)

Vaibhav Aggarwal:Thanks

David Tait:Yes we can hear you

Kristine Dorrain - Amazon Registry:To Kurt's point, I received this anecdote from a Registry: it is IDN domainмы.москва (xn--l1a4a.xn--80adxhks)was obtained by a person with interest in selling brick and mortar kind of goods (drills, concrete e.t.c.)when the word "мы" is translated from Russian to English as "we".Currently the website tends to be "social network" and in reality it just pumps some news in order to look valid.P.s: the gaining party neither known with any kind of product nor invented anything beyond using TMCH to obtain good generic word :)

Jeff Neuman:I am dropping of of Adobe, but still on the call.

Kurt Pritz:On 7: How many marks were rejected? What is a breakdown of the reasons?

Vaibhav Aggarwal:@Kurt Break up could be Region wise

Kurt Pritz:As an aside: It is telling that we, as "experts" cannot always understand the meaning of the charter question. An issue with many ICANN-related documents.

Vaibhav Aggarwal:Its important as that is often bound by treaties of Validity

Vaibhav Aggarwal:so the Importance of TMCH as a Service

Vaibhav Aggarwal:is regional too in nature

Kurt Pritz:I agree with Vaibhav that, when framing questions, we should always consider whether we ask for data by region or some other demographic

Vaibhav Aggarwal::-)

Vaibhav Aggarwal:+1 Kathy

Kathy:Tx Kristine

Kathy:Great, so good time to move to finalizing the questions we have??

susan payne:ok

Edward Morris:Makes sense to me.

Kristine Dorrain - Amazon Registry:Yes, I think that's good.

David Tait:Just to note Susan has her hand up

Vaibhav Aggarwal:@Michelle Please give the Document the rights to change View etc

Vaibhav Aggarwal:its too small

David Tait:thanks!

Kurt Pritz:The sunrise data by TLD is confidential - so many registries are likely to say no.

susan payne:thanks!

Kurt Pritz:The TMCH might be able to give us masked sunrise data.

Michelle DeSmyter:Welcome Khouloud!

Vaibhav Aggarwal:I guess we just want the numbers

khouloud Dawahi:thanks Michelle , i have just received the reminder for the call , sorry im late

Philip Corwin:I believe that Bret was referring to their registrar function. That said, it's still useful info. And Kathy is right that other registries recruit major registrants, even if the acual registration is facilitated by a third party.

Kristine Dorrain - Amazon Registry:If we have to ask a question like this, I support Jeff's rephrasing. An opinion question is not to give us useful data.

Kathy:I think I am OK with Jeff's rephraising,b ut what I would recommendi, David, is that we strik

Kathy:oops that was my old typing...

Vaibhav Aggarwal:Thanks Guys

Vaibhav Aggarwal:Excellent

David Tait:Thanks!

Kathy:Have a good weekend!

khouloud Dawahi:thanks

Vaibhav Aggarwal::-)

khouloud Dawahi:have a good weekend .

Vaibhav Aggarwal:ciao
