

2. Motivation letter

Dear colleagues,

I'm willing to express my interest in participation in the Second Security, Stability, and Resiliency of the DNS Review Team. I have been working on domain- and DNS-related things for a long time, and I am highly interested in stability and resiliency of the root zone operations as well as other ICANN / IANA functions. Also, as a participant of a lot of regional meetings like local internet governance forums, I can say that internet sustainability is a subject of high interest in my region. So, as a speaker participating in such events, I am personally interested in ensuring that the current operational procedures take all relevant risks into account. I have discussed some of that risks and operational procedures with certain root server operators I know personally, but that's not enough. So, volunteering for the SSR2 team I hope to learn more about all operational details and provide valuable feedback.

I hope that my experience will make me a useful addition to the Review Team. Also, the knowledge I could gain during this event will certainly make my further talks on regional meetings more trustworthy and accurate.

Regards,
Anton Baskov

3. Affiliation with ICANN SO / AC

I'm not affiliated with any supporting organisation or advisory committee within ICANN.

4. Statement of Interest
