

Letter of motivation

Second Security, Stability, and Resiliency of the DNS

(SSR2) Review Team

Gaolei

I'm Gaolei, serving as technical director of ZDNS Co, and company provide back-end platform for new gTLD registries. Besides that, ZDNS serve as a registrar with IANA id 1723 in China.

During the past years of my career , I did plenty of technical work on supporting the registries and the registrars to develop TLD business. Such as EPP, WHOIS, DNS, DNSSEC, domain name pricing, IDN implementation,etc. We setup a large support community when helping the registries to conduct the new gTLD business. In this community registries and registrars can communicate on the concerned issues very efficiently, and the issues are not limited in technical scope and sometimes on business topics.

I think if I can take part in the SSR2 review team, I can bring the concerns of the registries and registrars we served and deliver the feedback of the community on some specific topics.

For me personally, It's a very good chance to get to know the ideas and concerns of the people from the other part of the world.

So I volunteer to serve for the Second Security, Stability, and Resiliency of the DNS Review Team and hope to contribute to it.
