Re: Letter of Intention to Apply for the SSR2-RT

In response to the call in June 2016 by ICANN for community volunteers to serve on the Second Security, Stability, and Resiliency of the DNS Review Team (SSR2-RT), I hereby submit my letter of intention to join the committee as an active member of the team.

As stated in the call, ICANN recognizes that Community-led reviews are an important mechanism for furthering ICANN's key objectives:

The key role of community is:

- Ensuring accountability, transparency and the interests of global Internet users;**
- Preserving security, stability and resiliency of the DNS;**
- Promoting competition, consumer trust and consumer choice;**
- WHOIS policy.**

It has been NARALO who has been consistent in keeping the issue of competition, consumer trust and consumer choice a priority to ATLARGE, ICANN CEO and the ICANN Board. As representing the end-users we need to keep this issue and the other ones to be front and centre in the review.

As a member of ATLARGE we are in the midst of a ATLARGE review and I am familiar with the process and mechanisms for an effective review.

I'm willing to learn and be part of a team with a diversity of interest and expertise and I believe I bring a set of skills and experience to enhance the group

Thanks

Glenn McKnight
