RE: LETTER OF MOTIVATION FOR JABHERA MATOGORO TO SERVE ON REVIEW TEAM – SSR2

Reference is made to the above heading.

I have read Call for Volunteers for the Second Security, Stability, and Resiliency of the DNS (SSR2) Review Team that is published at: https://www.icann.org/news/announcement-3-2016-06-30-en and understood the following:

ICANN is seeking for volunteers to serve on the Second Security, Stability, and Resiliency of the DNS Review Team (SSR2-RT) and the team will be responsible in:

- Participate in creation of review team governance documents, such as the terms of reference, scope of the review and the timeline;
- Review implementation of the first SSR Review Team's recommendations as approved by the ICANN Board;
- Select appropriate performance indicators and benchmarks, including considering those recommended by the first SSR Review Team, and those on which data has already been collected;
- Apply best practices designed to simplify and increase the effectiveness of Reviews as expressed in Reviews Policies, Procedures and Guidelines;
- Consider public, community and Board input and incorporate it as appropriate in Review Team recommendations;
- Determine whether additional data or analysis is needed and participate in an ensuing provider selection, if necessary;
- Provide timely updates to the community on the status of the Review Team's work;
- Analyze findings;
- Draw conclusions based on findings, develop useful and feasible recommendations;
- Provide guidance on prioritization of recommendations and definition of desired outcomes;
- Provide draft conclusions for input from community, staff and Board;
- Deliver a final Review Team report;
- Designate Review Team members to participate in the implementation planning work that follows the delivery of the final Review Team report.

Members of the Second Security, Stability, and Resiliency of the DNS Review Team (SSR2-RT) need to have the following skills and experiences:

- Internet Unique Identifiers, including; DNS (Domain Name System), IP Numbering, AS Numbers, and Protocol Parameters
- Mitigating Unique Identifier abuse
- Registry and Registration security and abuse
- Operation of the DNS root name system
- Understanding of malware and abuse vectors and mitigations
- Risk Assessment and Management
- Corporate Data Security and/or Business Systems
- Incident Response

With reference to the above criteria, skills and experiences required, I am therefore writing to inform you that I have all the required technical and general skills and more than 8 years experience in ICT sector. In brief;

I am is currently working as Assistant Lecturer in College of Informatics and Virtual Education of the University of Dodoma, Tanzania, East Africa. I graduated Master of Science in Computer Science from University of Dodoma and Bachelor of Science in Computer Science from University of Dar es Salaam in 2011 and 2008 respectively.

In September, 2009 I joined the University of Dodoma as Computer Programmer/Systems Analyst I responsible for examining current systems, talking to users for requirements gathering, producing specifications for new or modified systems, liaising with other IT staff to produce new systems, implementing new systems.
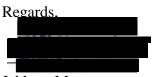

In December, 2012 I was re-categorized from technical to teaching position responsible in Teaching, Research and Consultancy services. As a teaching staff from Department of Computer Science, I have been teaching, Introduction to Information Technology, Information Security Management, ICT Research Methods and Security and Faulty Tolerance in Distributed Systems for Undergraduate students and Computer Network Design for Postgraduate students majoring in Computer Science, Information Technology, Telecommunication Engineering and Information Technology.

I have attended various national and international technical training and workshops including ICANN 54 Meeting; ISOC Africa Chapter Leader and AfPIF 2015 Meeting; Scalable Network Infrastructure; Computer Emergency Response Team; Cyber Security; Network Monitoring and Management; Windows Server 2012 Configuration and Administration; Systems and Network Security; Windows 8 Apps Development; Innovation and Entrepreneurship; Research Proposal and Scientific Paper Writing Skills; Advanced African Free/Open Source Software Business Models; Certificate course in Network Security UTL Technology, Bangalore, India and Six Months Research Fellowship in TV White Space Network in Indian Institute of Technology Bombay.

I am an active member and contributor to various technical bodies and mailing lists including Internet Corporation for Assigned Names and Numbers (ICANN), Internet Society (ISOC), Microsoft Innovation Center, African Network Information Center (AFRINIC) and OpenWRT.

Apart from a very strong technical profile and over 8 years experience in ICT Industry, I am also holding various senior and administrative positions such as Coordinator for Microsoft Innovation Center, Tanzania; Manager of Dodoma Internet Exchange Point and Secretary of Internet Society Tanzania Chapter.

All these skills and broad experience give me confidence that I qualify to serve as member in Second Security, Stability, and Resiliency of the DNS (SSR2) Review Team and all these will be of great help when undertaking various responsibilities related to this post.

Regards,

Jabhera Matogoro
