

Letter of Motivation

Security, Stability, and Resiliency of the Domain Name System (SSR2) Review Team

Tigist Awoke WUBNEH

My motivation to volunteer in **Security, Stability, and Resiliency of the Domain Name System (SSR2) Review Team** derives from the importance of these aspects of the concept of learning about SSR2.

By being a member I would like to develop my skills, participate in the dialogue to identify community issues and concerns, to build global network of professionals, moreover to contribute my expertise and knowledge to improve ICANN as a representative of Ethiopia and to raise my female voice as a concerned personnel on the issue.

I have experience and proper education with the leading technology certification; which gives me a clear understanding of what internet, DNS, IP, protocol...mean and how they work. My organizational work experience is adverse, lecturing in Universities mostly on computer networking, worked as a programmer analyst and LAN administrator, working for the UN, and with a deep interest on ecommerce.

I am a member of continental base ICT alliance associations, forums and organizations which gives me access to my community easily. Served also as the executive committee member of the Ethiopian ICT professional association.

Personally I am excellent communicator with analytical skills always willing to learn and committed in what I do, and delivers on time.

I believe that I will be an asset for ICANN to be consider me to volunteer in SSR2Team.

Sincerely,

Tigist Awoke
