

Dear Sir/Madam,

My name is Paul Muchene and I aver my interest in becoming a volunteer for the Second Security, Stability and Resiliency of the DNS review Team. My background and expertise makes me a suitable candidate for this position.

As an ICANN fellow alumni possessing a technical background, I bring with me eleven years of professional experience in the Internet industry. I am a strong proponent of the open Internet architecture and it is worth building upon it as well as defending and preserving it for future posterity.

Having been involved in the deployment of core Internet infrastructure including recently a deployment of a mirror of the L-Root name server in Nairobi, I possess an understanding of the challenges of securing and protecting critical infrastructure. Therefore, I am both excited and willing to contribute my skills and expertise to the SSR2-RT to meet its desired outcomes and objectives.

With this in mind, I kindly request for a considerate review of my application and I look forward to your apt reply.

Yours Sincerely,

Paul Muchene
