Dear Application Selection Board,

I am writing in response to the call for volunteers for SSR2 review team. As Technology Risk professional with hands and eyes on information security & identification of emerging technology/information risks are the key driving force behind my participation.

Since last 5 years I've gained extensive knowledge in various vertical of Infrastructure and services domain in BFSI and Telecom industries. To be precise I've expertise and contribution in:

- IT Risk Assessment (ITRA) and Risk and Control Self-Assessment (RCSA) in large Financial organization using COBIT 5, NIST and IT SEC controls
- Information Security Management System (ISMS) assessment and implementation in line with ISO27001:2013
- Experience in creating/reviewing policies and procedures to ensure due care and due diligence to reduce the existing/emerging threats, vulnerabilities, and consequences.
- Understanding of current threat landscape and various ingress/egress threat vectors as well as experience in outlining the mitigation strategies for the same
- Through understanding of the advanced networking and endpoint security concepts
- Part of CISO Platform, India and have written few publications around Endpoint Security and Web application firewalls (WAF)

Working at ICANN would require capability to learn and implement new concepts to deliver value to the whole internet community as well as opportunity to make it more secure, stable and resilient.

Kindly take a moment to review my attached resume. Looking forward to hearing from you soon.

Regards

Rahul Sharma
