

LETTER OF MOTIVATION

Hi, My Name is Rohit Bankoti from [REDACTED] (India). I am currently assigned with Mckinsey and Company, Gurgaon as Senior IT engineer. While from past experience I have been work as Pre-sales Engineer who carry out Proof of concept, Understand issue of clients and customer at different ground, Find out loopholes and fixed them with mitigation measure. From My Pre-sales cum Security Technical consultant I have managed around 100-120 clients directly and remotely which includes Government sector, Private firm, Media House, Finance, Hospitals, Hotels and more.

While For secure Web I am contributing as co-organizer for DUCKDUCKGO Search engine program, organizing different meetup and educating young ones and motivating resourceful generations. I am also part of different open source program and actively participate like Software Freedom Day, Hackaday, PyCon, India PERL, Ground Zero Summit (Asia biggest summit) and more.

My Motivation to be part and express my interest in joining the Security, Stability, and Resiliency. I think if I can take part in the SSR review team, I can bring the concerns of the registries and registrars regarding Country Code Names which is main challenge and many people treated it as easy going while in future it will create concern, As IPv4 goes over to IPv6. I will serve community by bring up some concern which are made at different platform with my contacts and can help community with some automation work.

So I volunteer to serve for the Second Security, Stability, and Resiliency of the Country Code Names Supporting Organization (ccNSO) and hope to contribute to it.

Thanks/Rohit Bankoti
