# Call for Volunteers for the Second Security, Stability, and Resiliency of the DNS (SSR2) Review Team

**To: SSR2 Team**

**ICANN Evaluators**

**15th September 2016**

**Letter of Motivation to Apply to the SSR2 Team**

According with https://www.icann.org/news/announcement-3-2016-06-30-en (SSR2 Call for volunteer) I would like to apply to this call for volunteer by this Letter of Motivation.

I am Samuel Guimarães Lima. Researcher, consultant and I am an Internet Society member ID: 117566, Founder member of the Special Interest Group Youth Observer, and an Open Forum member. It is my second time applying to the SSR2 Review Team process, the first one I thought I were not so well prepared and not engaged in many Internet Governance entities and activities and also ICANN´s process, model and structure, only researches.

I am brazilian living in ████████Brazil, so LAC geolocalization.

My motivation is mainly guided by the opportunity to contribute and maintain the continuous development of the Internet in a sustainable manner. The policy, infrastructure and all embedded systems that are part of the Internet ecosystem and multisectoralism. So I see this call for participation (Advisory Commitee and Independent Expert) an opportunity to make it happen, contribute to this legacy of reviewing policies and frameworks into the ICANN ecosystem, and sure learning more about Internet Governance.

-to Promote the open development, evolution and use of the Internet for all people;

-to Promote professional development and encouraging communities to give participation and leadership in areas important to the evolution of the Internet;

-To Provider Considerable information on the Internet;

-To provide domains distribution according to global cultures, and learn more and to implemente what is considered an abuse;

-To provide more security into the Internet DNS systems.

Respecfully,

Samuel Guimarães Lima
