

Application for the position of Volunteer Review Team Member on the SSR2-RT
Motivation Letter for Zarko Kecic

It gives me a great pleasure to apply for the position of Volunteer Review Team Member on the SSR2-RT. After a few ICANN meetings that I have participated in, I have decided to move on, and to offer my knowledge, experience, effort and time in participating in the SSR2-RT.

In my previous career I worked on different job positions and possess widespread expertise in Information technology and security and business operations. My key task at the current position is to ensure stable and resilient operations of DNS services for .rs and .cpb top level domains. I believe that above mentioned broad experience corresponds well to the requirements for the position of team member on the SSR2-RT.

If selected, it would be a duty, as well a great honor to serve ICANN and Internet community and to contribute in improving the security, stability and resilience of one of the key services of the Internet.

Sincerely,

Zarko Kecic
